Preface	x
<b>PART I Foundations</b>	<b>3</b>
<b>1 Introduction</b>	<b>4</b>
1.1 From Darwin to Development	4
1.2 Development; and Evolutionary Changes in Development	9
1.3 Development and the Realm of Multicellularity	11
<b>2 What is Evo-Devo?</b>	<b>15</b>
2.1 Forerunners of Evo-Devo	15
2.2 Nineteenth-Century Comparative Embryology	16
2.3 Diverse Antecedents—1900–1980	19
2.4 Conclusions from History; Messages for the Present	24
2.5 The Advent of Evo-Devo in the 1980s	25
2.6 Broad and Narrow Views of Evo-Devo	27
2.7 Too Few Laws, Too Many Facts?	28
<b>3 Development, Cells and Molecules</b>	<b>34</b>
3.1 Analysing the Developing Organism	34
3.2 Cells and Development: The Basics	37
3.3 Genes: Structure, Expression and Developmental Function	40
3.4 Signalling Pathways Within and Between Cells	45
3.5 Signalling: From Cell to Embryo	48
3.6 Long-Range Signalling and Developmental Processes	51
<b>4 Natural Populations</b>	<b>54</b>
4.1 The Ecological Theatre and the Evolutionary Play	54
4.2 Types of Creature; Types of Population	55
4.3 Spatial Structure	60
4.4 Age Structure	64
4.5 Genetic Structure	65
4.6 Natural Selection	67

<b>PART II Developmental Repatterning</b>	<b>75</b>
<b>5 Mutation and Developmental Repatterning</b>	<b>77</b>
5.1 Mutation in Terms of Altered DNA Sequence	77
5.2 Mutation in Terms of Proximate Functional Consequences	80
5.3 Developmental Repatterning at Molecular and Higher Levels	82
5.4 Developmental Repatterning at the Level of the Whole Organism	88
5.5 Developmental Repatterning and Fitness	89
<b>6 Heterochrony</b>	<b>93</b>
6.1 What is Heterochrony?	93
6.2 Types and Levels of Heterochrony	94
6.3 Heterochrony at the Organismic Level	95
6.4 Heterochrony at the Molecular Level	99
6.5 Heterochrony and Fitness	102
<b>7 Heterotopy</b>	<b>106</b>
7.1 What is Heterotopy?	106
7.2 Heterotopic Processes Involving Left-Right Asymmetry	107
7.3 Heterotopic Processes Involving the A-P and D-V Axes	112
7.4 Other Types of Heterotopy	116
7.5 Concluding Remarks	119
<b>8 Heterometry</b>	<b>121</b>
8.1 What is Heterometry?	121
8.2 Increasing Relative Size	122
8.3 Decreasing Relative Size	124
8.4 Bi-directional Heterometry	128
8.5 Heterometric Compensation	132
<b>9 Heterotypy</b>	<b>135</b>
9.1 What is Heterotypy?	135
9.2 Altered Products of Developmental Genes	137
9.3 Altered Pigmentation	139
9.4 Altered Morphology and the Origin of Novelty	140
9.5 The Origin of New Cell Types	144
<b>10 The Integrative Nature of Repatterning</b>	<b>148</b>
10.1 Repatterning is a Complex Process	148
10.2 Different Kinds of Repatterning can Produce a Similar Result	149
10.3 Compound Repatterning at a Single Level of Organisation	151
10.4 The Kind of Repatterning can Change Between Levels of Organisation	155

10.5 Categories and Subcategories of Repatterning	157
10.6 The Causes of Repatterning	159
<b>11 Mapping Repatterning to Trees</b>	<b>161</b>
11.1 Pattern, Process, Homology and Trees	161
11.2 The Origin(s) of Animal Segmentation	163
11.3 The Vertebrate Fin-to-Limb Transition	169
11.4 The Origin of Flowers	176
11.5 General Conclusions on Repatterning and Selection	179
<b>PART III The Direction of Evolution</b>	<b>183</b>
<b>12 Adaptation, Coadaptation and Exaptation</b>	<b>185</b>
12.1 Natural Selection on a Continuously Variable Character	185
12.2 Natural Selection on Two Characters; and the Idea of an Adaptive Landscape	190
12.3 Developmental and Functional Coadaptation	191
12.4 Morphological Geometry and Selection	194
12.5 Long-term Evolution and Exaptation	196
<b>13 Developmental Bias and Constraint</b>	<b>200</b>
13.1 A Key Question about Evolution's Direction	200
13.2 Making Sure the Question is about Processes, not Terminology	204
13.3 Dependence versus Independence of Different Characters	208
13.4 Evo-Devo Meets Quantitative Genetics	209
13.5 Developmental Bias and 'Routine' Evolution	211
13.6 Developmental Bias and the Origin of Evolutionary Novelty	216
<b>14 Developmental Genes and Evolution</b>	<b>218</b>
14.1 The Direction of Evolution at the Developmental/Genetic Level	218
14.2 Developmental Genes: An Overview	219
14.3 Developmental Genes: Examples	223
14.4 The Hox Genes	225
14.5 Gene-Level Forms of Developmental Bias and Coadaptation	230
14.6 Changes in Regulatory versus Coding Regions of Genes	231
<b>15 Gene Co-option as an Evolutionary Mechanism</b>	<b>234</b>
15.1 What is Gene Co-option?	234
15.2 Co-option in the Evolution of Segments and Eyes	237
15.3 Appendage Evolution and Gene Co-option	241
15.4 Co-option in the Evolution of Zygomorphic Flowers	244
15.5 Evolution of the 'Genetic Toolkit'	245
15.6 Co-option, Exaptation and Developmental Bias	249
<b>16 Developmental Plasticity and Evolution</b>	<b>252</b>
16.1 Types of Developmental Plasticity	252
16.2 Discrete Variants: Winged and Wingless Forms of Insects	254

16.3 Meristic Variation: the Number of Segments in Centipedes	257
16.4 Continuous Variation: Plant Growth	259
16.5 Plasticity and Developmental Genes	260
16.6 The Evolution of Patterns of Plasticity	261
<b>17 The Origin of Species, Novelty and Body Plans</b>	<b>272</b>
17.1 Is Evolution Scale-dependent?	272
17.2 Speciation	273
17.3 The Origin of Novelty	281
17.4 Body Plans I: Overview	284
17.5 Body Plans II: the Origin of the Vertebrates	285
17.6 Body Plans III: the 'Cambrian Explosion'	286
<b>18 The Evolution of Complexity</b>	<b>291</b>
18.1 Defining Complexity	291
18.2 The Lack of a 'Law of Increasing Complexity'	293
18.3 Increases in the Complexity of Adults	299
18.4 Changes in the Complexity of Life-histories	302
18.5 Complexity at the Molecular Level	306
<b>PART IV Conclusions</b>	<b>311</b>
<b>19 Key Concepts and Connections</b>	<b>312</b>
19.1 Introduction: From Original Idea to Mature Scientific Discipline	312
19.2 A List of The Book's Main Points, and the Emergence of Key Concepts	314
19.3 How do They Inter-Connect?	319
<b>20 Prospects</b>	<b>327</b>
20.1 Introduction: From the Present into the Future	327
20.2 Molecular Evo-Devo	327
20.3 Integrative Evo-Devo and General Evolutionary Theory	332
20.4 Wider Challenges	334
Glossary	336
Appendix 1: A Little Bit of History	355
Appendix 2: Naming of Genes and Proteins	359
Appendix 3: Geological Time	363
Appendix 4: Inferring Evolutionary Trees from Comparative Data	366
References	370
Index	383
