Introduction	1
1 The Basic Environment	13
1.1 Benchmark Model	14
1.2 Variants of the Benchmark Model	18
1.3 Further Readings	19
2 Pure Credit Economies	21
2.1 Credit with Commitment	22
2.2 Credit Default	26
2.3 Credit with Public Record Keeping	31
2.4 Credit with Reputation	38
2.5 Further Readings	44
Appendix	45
3 The Role of Money	47
3.1 Money Is Memory	48
3.2 Decentralizing Allocations	52
3.3 Further Readings	59
4 Money in Equilibrium	61
4.1 A Model of Divisible Money	62
4.1.1 Steady-State Equilibria	69
4.1.2 Nonstationary Equilibria	71
4.1.3 Sunspot Equilibria	74

4.2	Alternative Bargaining Solutions	76
4.2.1	Bargaining Set	77
4.2.2	The Nash Solution	79
4.2.3	The Proportional Solution	82
4.3	Walrasian Price Taking	84
4.4	Competitive Price Posting	86
4.5	Further Readings	91
	Appendix	93
5	Properties of Money	99
5.1	Divisibility of Money	101
5.1.1	Currency Shortage	102
5.1.2	Indivisible Money and Lotteries	107
5.1.3	Divisible Money	110
5.2	Portability of Money	111
5.3	Recognizability of Money	115
5.4	Further Readings	119
	Appendix	121
6	The Optimum Quantity of Money	127
6.1	Optimality of the Friedman Rule	129
6.2	Interest on Currency	133
6.3	Friedman Rule and the First Best	135
6.4	Necessity of the Friedman Rule	138
6.5	Feasibility of the Friedman Rule	142
6.6	Trading Frictions and the Friedman Rule	144
6.7	Distributional Effects of Monetary Policy	150
6.8	The Welfare Cost of Inflation	154
6.9	Further Readings	158
7	Information, Monetary Policy, and the Inflation–Output Trade-Off	161
7.1	Stochastic Money Growth	162
7.1.1	Symmetrically Uninformed Agents	164
7.1.2	Symmetrically Informed Agents	166
7.2	Bargaining under Asymmetric Information	167
7.3	Equilibrium under Asymmetric Information	174
7.4	The Inflation and Output Trade-Off	177
7.5	An Alternative Information Structure	184

- 7.6 Further Readings 188
- Appendix 189

- 8 Money and Credit 195**
 - 8.1 Dichotomy between Money and Credit 196
 - 8.2 Costly Record Keeping 202
 - 8.3 Strategic Complementarities and Payments 207
 - 8.4 Credit and Reallocation of Liquidity 214
 - 8.5 Short-Term and Long-Term Partnerships 219
 - 8.6 Further Readings 225
 - Appendix 227

- 9 Money, Negotiable Debt, and Settlement 229**
 - 9.1 The Environment 230
 - 9.2 Frictionless Settlement 233
 - 9.3 Settlement and Liquidity 236
 - 9.4 Settlement and Default Risk 242
 - 9.5 Settlement and Monetary Policy 246
 - 9.6 Further Readings 247
 - Appendix 248

- 10 Competing Media of Exchange 251**
 - 10.1 Money and Capital 252
 - 10.1.1 Linear Storage Technology 253
 - 10.1.2 Concave Storage Technology 257
 - 10.1.3 Capital and Inflation 260
 - 10.2 Dual Currency Payment Systems 262
 - 10.2.1 Indeterminacy of the Exchange Rate 263
 - 10.2.2 Cash-in-Advance with a Twist in a Two-Country Model 265
 - 10.3 Money and Nominal Bonds 270
 - 10.3.1 The Rate-of-Return Dominance Puzzle 271
 - 10.3.2 Money and Illiquid Bonds 273
 - 10.4 Recognizability and Rate-of-Return Dominance 274
 - 10.5 Pairwise Trade and Rate-of-Return Dominance 280
 - 10.6 Further Readings 282

- 11 Liquidity, Monetary Policy, and Asset Prices 285**
 - 11.1 A Monetary Approach to Asset Prices 286
 - 11.2 Monetary Policy and Asset Prices 291

11.3	Risk and Liquidity	295
11.4	The Liquidity Structure of Assets' Yields	300
11.5	Endogenous Recognizability, Information, and Liquidity	305
11.5.1	Equilibrium	306
11.5.2	Equilibria with Recognizable Assets	308
11.5.3	Equilibria with Unrecognizable Assets	309
11.5.4	Multiple Monetary Equilibria	310
11.6	Further Readings	313
	Appendix	314
12	Liquidity and Trading Frictions	317
12.1	The Environment	318
12.2	Equilibrium	320
12.3	Trading Frictions and Asset Prices	326
12.4	Intermediation Fees and Bid-Ask Spreads	329
12.5	Trading Delays	332
12.6	Further Readings	337
	Bibliography	339
	Index	357
