Preface.....	xv
The Authors	xix
1. Origin and Function of Soils.....	1
1.1 Introduction.....	1
1.1.1 Why Are We Concerned with Environmental Issues?.....	1
1.2 Soil Origin and Formation.....	2
1.2.1 Parent Material.....	2
1.2.2 Weathering of Rock.....	3
1.2.2.1 Natural Processes.....	3
1.2.2.2 Physical Weathering	4
1.2.2.3 Chemical Weathering	4
1.2.3 Processes of Chemical Weathering	6
1.2.4 Parent Material and Other Influences.....	7
1.2.4.1 Parent Material	7
1.2.4.2 Climate and Vegetation	7
1.2.4.3 Topography and Time	8
1.3 Soil Classification.....	8
1.3.1 Subdivision of Surficial Deposits.....	9
1.3.2 Soil Horizons.....	9
1.3.3 Classification for Engineering Purposes.....	11
1.3.3.1 Particle-Size Differentiation and Textural Classification	12
1.3.3.2 Particle-Size Distribution Curves	13
1.3.3.3 Atterberg Limits Classification	14
1.3.3.4 Unified Soil Classification System	15
1.4 Basic Soil Functions.....	17
1.4.1 Natural in Situ Role.....	19
1.4.2 In Situ Role with Human Intervention	20
1.4.3 Soil as a Resource Material.....	21
1.5 Concluding Remarks.....	22
1.5.1 Soil Functionality.....	22
References.....	24
2. Nature of Soils.....	25
2.1 Introduction.....	25
2.1.1 Soil Composition.....	25
2.1.2 Coarse-Grained Soils.....	26
2.1.3 Fine-Grained Soils	26

3.4.2.2	Tensiometer-Type Device for Laboratory Use	107
3.4.2.3	Pressure-Membrane Techniques.....	109
3.4.2.4	Vapour Pressure Technique.....	111
3.4.2.5	Thermocouple Psychrometer Measurements.....	111
3.4.3	Hysteresis of Soil–Water Potential Relationships.....	113
3.5	Water Uptake and Transfer.....	114
3.5.1	Moisture Transfer	115
3.5.1.1	Water Transfer and Wetting Front.....	116
3.5.1.2	Vapour Transfer	121
3.6	Chemical Reactions in Porewater	123
3.6.1	Acids, Bases, and pH	124
3.6.2	Acid-Base Reactions, Hydrolysis	126
3.6.3	Oxidation-Reduction (Redox) Reactions	126
3.7	Physical Reactions and Hydration.....	127
3.7.1	Hydrated Cations and Clay Minerals—From EXAFS Analyses	128
3.8	Concluding Remarks	129
	References	131
4.	Swelling Clays.....	133
4.1	Introduction	133
4.2	Swelling Phenomena	134
4.2.1	Pertinent Soil Characteristics	134
4.2.2	Mechanisms of Swelling.....	136
4.2.2.1	Scoping Calculations for Swelling Pressures.....	139
4.2.3	Swelling—Effect of Salt Concentration and Porewater Composition.....	141
4.2.3.1	Higher Valences and Mixtures of Cations.....	141
4.2.3.2	Influence of Exchangeable Cations.....	142
4.2.4	Compositional Effects	143
4.2.4.1	Surface Charge and Attractive Forces.....	143
4.2.4.2	Mineralogical Effect.....	145
4.3	Water Uptake and Swelling.....	146
4.3.1	Nature of Interlayer Water—From Molecular Dynamics Simulation	147
4.3.1.1	Interlayer Water	149
4.4	Water Movement	150
4.4.1	Wetting Front Advance	150
4.4.1.1	Analysis Using Material Coordinate System.....	152
4.4.1.2	Soil Particle Diffusivity Analysis.....	153
4.4.2	Water and Solid Content Profiles in Confined Swelling Clays	154

4.5	Concluding Remarks.....	156
4.5.1	Swelling and Water Movement.....	156
4.5.2	Laboratory Measurement of Swelling	157
	References	160
5.	Stressors, Impacts, and Soil Functionality.....	163
5.1	Introduction	163
5.2	Stressor Sources and Stressors.....	164
5.2.1	Soil Environment.....	164
5.2.2	Types of Stressor Sources and Stressors.....	165
5.2.3	Natural Stressor Sources and Stressors.....	166
5.2.4	Anthropogenic Stressor Sources and Stressors.....	168
5.2.4.1	Industry Sources of Stressors	169
5.2.4.2	Constructed Facility—Geologic Containment of HLW	170
5.3	Stressor Impacts	172
5.3.1	Impacts on Soil Environment.....	172
5.3.2	Impacts on Soil Mass.....	174
5.3.2.1	Hydraulic.....	175
5.3.2.2	Mechanical.....	175
5.3.2.3	Thermal.....	176
5.3.2.4	Chemical.....	176
5.4	Soil Functionality Index (SFI).....	177
5.4.1	Soil Functionality Indicators.....	178
5.4.1.1	Selection of Indicators.....	180
5.4.2	Indicators and Soil Functionality Index.....	181
5.4.3	Application of SFI—An Example.....	183
5.5	Time-Related Change of Functionality.....	186
5.5.1	Time-Related Functionality.....	186
5.5.1.1	Time-Related Changes of Soil Attributes	187
5.5.2	Time-Related Changes of Long-Term Functionality.....	189
5.5.2.1	Influence of Anthropogenic Stressors.....	189
5.5.2.2	Influence of Natural Stressors	190
5.6	Concluding Remarks	191
	References	192
6.	Mechanical Properties.....	193
6.1	Introduction	193
6.2	Mechanical Attributes.....	194
6.2.1	Soil Deformation under Load	195
6.2.1.1	Yield and Failure in Soils	195
6.2.2	Plastic Potential.....	197
6.2.3	Flow Function.....	198

6.3	Concept of Effective Stress.....	200
6.3.1	Physical Concept.....	200
6.3.2	Physical Concept in Relation to Clays.....	201
6.3.2.1	Clays with Adsorbed Water Layers.....	201
6.3.2.2	High-Swelling Clays.....	203
6.4	Shear Strength of Soils.....	204
6.4.1	Laboratory Determinations.....	204
6.4.1.1	Triaxial Test System.....	205
6.4.1.2	Other Strength Test Systems.....	205
6.4.2	Yield and Failure Theories.....	207
6.4.2.1	Principal Stress Space.....	207
6.4.2.2	Yield Criteria.....	209
6.4.3	Mohr–Coulomb Theory.....	211
6.4.4	Yield/Failure Models.....	214
6.4.4.1	One-Parameter Models.....	214
6.4.4.2	Two-Parameter Models.....	215
6.4.4.3	Plasticity Models.....	216
6.5	Mechanisms in Granular Soil Strength.....	216
6.5.1	Frictional Resistance.....	216
6.5.2	Mohr Failure Envelopes—Sliding and Interlocking Friction.....	220
6.5.3	Volumetric Strain.....	221
6.6	Cohesive Soil Strength.....	223
6.6.1	Analytical and Physical Strength Parameters.....	223
6.6.2	Analytical Shear Strength Parameters.....	223
6.6.3	Mechanistic Analyses.....	224
6.6.4	c and ϕ Parameters and Properties.....	225
6.7	Porewater Pressure.....	226
6.7.1	Partly Saturated Soil Porewater Pressures.....	227
6.7.1.1	Pore Pressures in Granular Medium.....	227
6.7.1.2	Pore Pressures in Clays.....	229
6.7.2	Porewater Pressure Coefficients.....	229
6.8	Shear Resistance Mechanisms.....	232
6.8.1	Gravity Controlled.....	232
6.8.2	Bonding Effects.....	232
6.9	Compressibility and Consolidation.....	234
6.9.1	One-Dimensional Consolidation.....	236
6.9.1.1	Laboratory Test Data.....	237
6.9.2	Consolidation of Swelling Clays.....	241
6.10	Creep Behaviour.....	242
6.10.1	Creep in Clay: The Role of Microstructure.....	243
6.11	Concluding Remarks.....	245
6.11.1	Integrity and Environment Stressor Impacts.....	245

6.11.2	Soil Performance under Loading Stresses	246
6.11.2.1	Yield and Failure Theories.....	246
6.11.2.2	Porewater Pressure.....	247
	References	248
7.	Thermal and Hydraulic Properties.....	249
7.1	Introduction	249
7.2	Thermal Properties	250
7.2.1	Heat-Mass Simultaneous Flow	250
7.2.2	Fourier-Type Heat Flow	251
7.2.3	Thermal Properties.....	253
7.2.3.1	Thermal Conductivity	254
7.2.3.2	Thermal Diffusivity	255
7.2.3.3	Heat Capacity.....	255
7.3	Water Movement under Thermal Gradient.....	256
7.3.1	Thermally Induced Vapour Movement	256
7.3.2	Thermally Induced Liquid Water Movement.....	257
7.3.3	Thermal Gradients and Water Content Profiles	259
7.4	Hydraulic Properties	261
7.4.1	Water Permeability	263
7.4.1.1	Darcy Model.....	263
7.4.1.2	Darcy Permeability Coefficient	264
7.4.1.3	Effect of High Hydraulic Gradients.....	266
7.4.1.4	Darcy Model with Permeant Properties	267
7.4.2	Permeability and Soil Structure.....	268
7.4.2.1	Kozeny–Carman Permeability Coefficient	268
7.4.3	Soil Strata and Hydraulic Properties	270
7.4.3.1	Finger Flow	271
7.4.3.2	Water Flow in Layered Soils.....	273
7.4.4	Void Space and Hydraulic–Thermal Properties	273
7.4.4.1	Flow-Through Channels	274
7.4.4.2	Deep Percolation of Water.....	275
7.5	Swelling Clay Hydraulic Conductivity	276
7.5.1	Hydraulic Conductivity and Clay Structure	276
7.5.2	Laboratory Test for Permeability	277
7.5.2.1	Oedometer-Type Permeameter.....	278
7.5.2.2	Triaxial-Type Permeameter.....	278
7.6	Vapour and Gas Conductivities	279
7.6.1	Steady-State Experiments	279
7.6.2	Unsteady-State Experiments	280
7.7	Concluding Remarks	281
	References	282

8. Sorption Properties and Mechanisms	285
8.1 Introduction.....	285
8.2 Solutes, Contaminants, and Pollutants.....	285
8.2.1 Transport of Contaminants.....	287
8.3 Contaminant Interactions with Soil Particles.....	289
8.3.1 Contaminants of Interest.....	289
8.3.1.1 Inorganic Contaminants.....	289
8.3.1.2 Organic Contaminants.....	291
8.3.2 Surface Properties and Interactions.....	292
8.3.2.1 Clay Minerals.....	293
8.3.2.2 Oxides and Soil Organic Matter.....	294
8.3.2.3 Surface Functional Groups of Organic Chemical Contaminants.....	294
8.3.2.4 Clay Particle Interaction with Organic Chemical Functional Groups.....	297
8.4 Contaminant Sorption Mechanisms.....	298
8.4.1 Physical Adsorption (Physisorption).....	299
8.4.2 Chemical Adsorption (Chemisorption).....	301
8.4.3 Specific Adsorption.....	302
8.4.4 Rate-Limiting Processes—Heavy Metals.....	304
8.5 Laboratory Determination of Partitioning.....	305
8.5.1 Batch Equilibrium Tests and Adsorption Isotherms.....	307
8.5.1.1 Inorganic Contaminants.....	307
8.5.1.2 Organic Chemical Contaminants.....	310
8.5.2 Column Leaching Tests.....	314
8.5.2.1 Breakthrough Curves.....	318
8.6 Partitioning and Soil Composition.....	320
8.6.1 Inorganic Contaminants.....	320
8.6.1.1 Selective Sequential Extraction (SSE) Technique.....	320
8.6.2 Organic Chemical Contaminants.....	324
8.7 Concluding Remarks.....	328
References.....	330
9. Mobility and Attenuation of Contaminants	333
9.1 Introduction.....	333
9.2 Interactions and Mobility.....	334
9.2.1 Inorganic Contaminants.....	334
9.2.1.1 Soil Fractions and Sorption Sites.....	334
9.2.1.2 pH and Chemical Buffering.....	336
9.2.1.3 pH and Precipitation.....	336
9.2.1.4 Selectivity, Affinity, and Preferential Sorption.....	338
9.2.1.5 Ligands in Porewater.....	340

9.2.2	Organic Chemical Compounds	343
9.2.2.1	NAPLs Mobility	344
9.2.2.2	Vapour Phase and Volatilization	346
9.3	Mobility and Attenuation	347
9.3.1	Physicochemical Forces and Transport of Contaminants	348
9.3.2	Modelling for Macroscopic Transport of Contaminants	351
9.3.2.1	Diffusion and Advection	351
9.3.2.2	Irreversible and Reversible Sorption/ Partition Models	354
9.3.2.3	Coupled Flow of Water and Contaminants	356
9.4	Microstructure and Diffusive Transport	358
9.4.1	Soil Structure Control	359
9.4.2	Molecular Diffusion Coefficient	361
9.5	Attenuation of Organic Chemicals	362
9.5.1	Abiotic and Biotic Processes	363
9.5.1.1	Hydrolysis	364
9.5.1.2	Oxidation-Reduction Reactions	366
9.5.2	Organic Halogen Compounds	367
9.6	Concluding Remarks	369
	References	370
10.	Environmental Soil Behaviour	375
10.1	Introduction	375
10.2	Soil Evolution and Ageing Processes	376
10.2.1	Natural Ageing Processes	376
10.2.2	Soil Fractions and Natural Ageing Processes	377
10.2.3	Transformation of Clay Minerals	378
10.2.3.1	Weathering Processes	378
10.2.3.2	Illitization from Smectite	379
10.2.4	Biotransformation of Clay Minerals	381
10.2.4.1	Structural Iron Reduction	383
10.2.4.2	Microbial Dissolution of Clay Minerals	384
10.3	Time-Related Changes and Soil Evolution	386
10.3.1	Stressors and Time-Related Activities	388
10.3.2	Transported Contaminants and Soil Permeability	388
10.3.3	Transported Contaminants and Soil Compression	390
10.4	Biodegradation and Biotransformation of Contaminants	392
10.4.1	Biodegradation of Organic Contaminants	394
10.4.1.1	Alkanes and Cycloalkanes	394
10.4.1.2	Gasoline Components BTEX and Methyl Tertiary-Butyl Ether (MTBE)	395
10.4.1.3	Halogenated Aliphatic and Aromatic Compounds	395

10.4.2	Biotransformation of Inorganic Contaminants	396
10.4.2.1	Bacterial Metabolism of Nitrogen and Sulphur	397
10.4.3	Natural Attenuation of Contaminants.....	398
10.4.3.1	Monitored Natural Attenuation.....	398
10.4.3.2	Attenuation of Organic Chemical Compounds.....	400
10.4.3.3	Attenuation of Heavy Metals	402
10.4.4	Enhanced and Engineered Natural Attenuation of Contaminants.....	403
10.4.4.1	Biostimulation.....	403
10.4.4.2	Bioaugmentation	403
10.4.4.3	Geochemical and Biogeochemical Intervention.....	404
10.4.4.4	Permeable Reactive Barriers (PRBs).....	404
10.5	Freeze–Thaw Seasonal Impact.....	406
10.5.1	Freezing and Frost Penetration.....	406
10.5.1.1	Freezing Index	406
10.5.1.2	Geothermal Profiles	407
10.5.1.3	Frost Penetration.....	408
10.5.1.4	Frost Heave and Heaving Pressures.....	411
10.5.1.5	Cyclical Effect of Freeze–Thaw	414
10.5.2	Unfrozen Water in Frozen Soils.....	415
10.5.3	Water Movement in Frozen Soils.....	416
10.5.4	Salt Concentration and Unfrozen Water Content—Swelling Clays	417
10.6	Concluding Remarks.....	420
	References	421
	Index.....	425
