

Contents

1	Black Holes: Big Picture	1
1.1	Gravity and Black Holes	1
1.2	Brief History of Black Holes	8
1.3	'Dark Stars' vs. Black Holes	12
1.4	Final State of Stellar Evolution	15
1.5	Equilibrium of Gravitating Systems	19
1.6	Important Notions of Astrophysics	22
1.7	Black Holes in Astrophysics and Cosmology	26
1.8	Stellar-Mass Black Holes	29
1.9	Supermassive Black Holes	34
1.10	Primordial Black Holes	40
1.11	Black Holes in Theoretical Physics	41
1.12	Black Holes and Extra Dimensions	44
2	Physics in a Uniformly Accelerated Frame	47
2.1	Minkowski Spacetime and Its Symmetries	47
2.2	Minkowski Spacetime in Curved Coordinates	50
2.3	Uniformly Accelerated Reference Frame	57
2.4	Homogeneous Gravitational Field	59
2.5	Causal Structure	63
2.6	Wick's Rotation in the Rindler Space	65
3	Riemannian Geometry	67
3.1	Differential Manifold. Tensors	67
3.2	Metric	74
3.3	Covariant Derivative	79
3.4	Lie and Fermi Transport	81
3.5	Curvature Tensor	84
3.6	Parallel Transport of a Vector	90
3.7	Spacetime Symmetries	97
3.8	Submanifold	102
3.9	Integration	106
4	Particle Motion in Curved Spacetime	109
4.1	Equations of Motion	109
4.2	Phase Space	114
4.3	Complete Integrability	120

5	Einstein Equations	127
5.1	Einstein–Hilbert Action	127
5.2	Einstein Equations	129
5.3	Linearized Gravity	135
5.4	Gravitational radiation	142
5.5	Gravity in Higher-Dimensions	149
6	Spherically Symmetric Black Holes	162
6.1	Spherically Symmetric Gravitational Field	162
6.2	Schwarzschild–de Sitter Metric	166
6.3	Global Structure of the Schwarzschild Spacetime	172
6.4	Black Hole Interior	178
6.5	Painlevè–Gullstrand Metric	180
6.6	Eddington–Finkelstein Coordinates	181
6.7	Charged Black Holes	181
6.8	Higher-Dimensional Spherical Black Holes	182
7	Particles and Light Motion in Schwarzschild Spacetime	185
7.1	Equations of Motion	185
7.2	Particle Trajectories	188
7.3	Kepler’s Law	196
7.4	Light Propagation	200
7.5	Ray-Tracing in Schwarzschild Spacetime	211
7.6	Black Hole as a Gravitational Lens	215
7.7	Radiation from an Object Moving Around the Black Hole	223
7.8	Equations of Motion in ‘Tilted’ Spherical Coordinates	230
7.9	Magnetized Schwarzschild Black Hole	230
7.10	Particle and Light Motion Near Higher-Dimensional Black Holes	236
8	Rotating Black Holes	242
8.1	Kerr Spacetime	242
8.2	Ergosphere. Horizon	246
8.3	Particle and Light Motion in Equatorial Plane	257
8.4	Spinning up the Black Hole	268
8.5	Geodesics in Kerr Spacetime: General Case	272
8.6	Light Propagation	276
8.7	Hidden Symmetries of Kerr Spacetime	286
8.8	Energy Extraction from a Rotating Black Hole	289
8.9	Black Holes in External Magnetic Field	293
9	Classical and Quantum Fields near Black Holes	298
9.1	Introduction	298
9.2	Static Field in the Schwarzschild Spacetime	299
9.3	Dimensional Reduction	302
9.4	Quasinormal Modes	307
9.5	Massless Fields in the Kerr Spacetime	314

9.6	Black Hole in a Thermal Bath	315
9.7	Hawking Effect	320
9.8	Quantum Fields in the Rindler Spacetime	325
9.9	Black Hole Thermodynamics	336
9.10	Higher-Dimensional Generalizations	340
10	Black Holes and All That Jazz	347
10.1	Asymptotically Flat Spacetimes	347
10.2	Black Holes: General Definition and Properties	355
10.3	Black Holes and Search for Gravitational Waves	362
10.4	'Black Holes' in Laboratories	370
10.5	Black Holes in Colliders?	376
10.6	Higher-Dimensional Black Holes	382
10.7	Wormholes	393
10.8	'Time Machine' Problem	399
Appendix A	Fundamental Constants and Units	408
A.1	Fundamental Constants	408
A.2	Planck Units	408
A.3	Conversion Factors	408
A.4	Various Scales of Masses	409
A.5	Milky Way Galaxy Observational Data	409
A.6	Universe Observational Data	409
A.7	Dimensionless Entropy (S/k_B)	409
Appendix B	Gauss–Codazzi Equations	410
B.1	Gauss–Codazzi Equations	410
B.2	Static Surface in a Static Spacetime	411
Appendix C	Conformal Transformations	412
Appendix D	Hidden Symmetries	414
D.1	Conformal Killing Tensor	414
D.2	Killing–Yano Tensors	414
D.3	Primary Killing Vector	417
D.4	Properties of the Primary Killing Vector	418
D.5	Secondary Killing Vector	418
D.6	Darboux Basis	420
D.7	Canonical Form of Metric	422
D.8	Separation of Variables in Canonical Coordinates	425
D.9	Higher-Dimensional Generalizations	425
D.10	Higher-Dimensional Kerr–NUT-(A)dS Metric	428
Appendix E	Boundary Term for the Einstein–Hilbert Action	431
E.1	An Example Illustrating the Problem	431
E.2	Boundary Term for the Einstein–Hilbert Action	432
E.3	Boundary Term for the Euclidean Einstein–Hilbert Action	434

Appendix F Quantum Fields	435
F.1 Classical Oscillator	435
F.2 Quantum Oscillator	437
F.3 Quantum Field in Flat Spacetime	442
F.4 Quantum Theory in (1+1)-Spacetime	454
References	463
Index	477
