|---------------------------------------------------------|-----------|
| Preface | xv |
| 1 Introduction | 1 |
| 1.1 What Is Monte Carlo? | 1 |
| 1.2 A Brief History of Monte Carlo | 2 |
| 1.3 Monte Carlo as Quadrature | 8 |
| 1.4 Monte Carlo as Simulation | 12 |
| 1.5 Preview of Things to Come | 15 |
| 1.6 Summary | 16 |
| 2 The Basis of Monte Carlo | 21 |
| 2.1 Single Continuous Random Variables | 22 |
| 2.1.1 Probability Density Function | 22 |
| 2.1.2 Cumulative Distribution Function | 23 |
| 2.1.3 Some Example Distributions | 23 |
| 2.1.4 Population Mean, Variance, and Standard Deviation | 25 |
| 2.1.5 Sample Mean, Variance, and Standard Deviation | 27 |
| 2.2 Discrete Random Variables | 29 |
| 2.3 Multiple Random Variables | 31 |
| 2.3.1 Two Random Variables | 31 |
| 2.3.2 More Than Two Random Variables | 33 |
| 2.3.3 Sums of Random Variables | 34 |
| 2.4 The Law of Large Numbers | 35 |
| 2.5 The Central Limit Theorem | 37 |
| 2.6 Monte Carlo Quadrature | 39 |
| 2.7 Monte Carlo Simulation | 41 |
| 2.8 Summary | 44 |
| 3 Pseudorandom Number Generators | 47 |
| 3.1 Linear Congruential Generators | 48 |
| 3.2 Structure of the Generated Random Numbers | 49 |
| 3.3 Characteristics of Good Random Number Generators | 52 |
| 3.4 Tests for Congruential Generators | 52 |
| 3.4.1 Spectral Test | 52 |
| 3.4.2 Number of Hyperplanes | 53 |
| 3.4.3 Distance between Points | 53 |
| 3.4.4 Other Tests | 53 |

| | | |
|----------|--------------------------------------------------|-----------|
| 3.5 | Practical Multiplicative Congruential Generators | 54 |
| 3.5.1 | Generators with $m = 2^a$ | 54 |
| 3.5.2 | Prime Modulus Generators | 56 |
| 3.5.3 | A Minimal Standard Congruential Generator | 57 |
| 3.5.4 | Coding the Minimal Standard | 57 |
| 3.5.5 | Deficiencies of the Minimal Standard Generator | 59 |
| 3.5.6 | Optimum Multipliers for Prime Modulus Generators | 59 |
| 3.6 | Shuffling a Generator's Output | 60 |
| 3.7 | Skipping Ahead | 61 |
| 3.8 | Combining Generators | 62 |
| 3.8.1 | Bit Mixing | 62 |
| 3.8.2 | The Wichmann-Hill Generator | 62 |
| 3.8.3 | The L'Ecuyer Generator | 62 |
| 3.9 | Other Random Number Generators | 63 |
| 3.9.1 | Multiple Recursive Generators | 63 |
| 3.9.2 | Lagged Fibonacci Generators | 64 |
| 3.9.3 | Add-with-Carry Generators | 64 |
| 3.9.4 | Inversive Congruential Generators | 65 |
| 3.9.5 | Nonlinear Congruential Generators | 65 |
| 3.10 | Summary | 65 |
| 4 | Sampling, Scoring, and Precision | 69 |
| 4.1 | Sampling | 69 |
| 4.1.1 | Inverse CDF Method for Continuous Variables | 70 |
| 4.1.2 | Inverse CDF Method for Discrete Variables | 72 |
| 4.1.3 | Rejection Method | 74 |
| 4.1.4 | Composition Method | 76 |
| 4.1.5 | Rectangle-Wedge-Tail Decomposition Method | 78 |
| 4.1.6 | Sampling from a Nearly Linear PDF | 79 |
| 4.1.7 | Composition-Rejection Method | 79 |
| 4.1.8 | Ratio of Uniforms Method | 80 |
| 4.1.9 | Sampling from a Joint Distribution | 80 |
| 4.1.10 | Sampling from Specific Distributions | 81 |
| 4.2 | Scoring | 82 |
| 4.2.1 | Statistical Tests to Assess Results | 83 |
| 4.2.2 | Scoring for "Successes-Over-Trials" Simulation | 85 |
| 4.2.3 | Use of Weights in Scoring | 86 |
| 4.2.4 | Scoring for Multidimensional Integrals | 87 |
| 4.3 | Accuracy and Precision | 89 |
| 4.3.1 | Factors Affecting Accuracy | 89 |
| 4.3.2 | Factors Affecting Precision | 90 |
| 4.4 | Summary | 93 |
| 5 | Variance Reduction Techniques | 97 |
| 5.1 | Use of Transformations | 100 |

| | | |
|----------|---------------------------------------------------------|------------|
| 5.2 | Importance Sampling | 101 |
| 5.2.1 | Application to Monte Carlo Integration | 105 |
| 5.3 | Systematic Sampling | 107 |
| 5.3.1 | Comparison to Straightforward Sampling | 109 |
| 5.3.2 | Systematic Sampling to Evaluate an Integral | 110 |
| 5.3.3 | Systematic Sampling as Importance Sampling | 110 |
| 5.4 | Stratified Sampling | 111 |
| 5.4.1 | Comparison to Straightforward Sampling | 112 |
| 5.4.2 | Importance Sampling Versus Stratified Sampling | 113 |
| 5.5 | Correlated Sampling | 113 |
| 5.5.1 | Correlated Sampling With One Known Expected Value | 114 |
| 5.5.2 | Antithetic Variates | 117 |
| 5.6 | Partition of the Integration Volume | 121 |
| 5.7 | Reduction of Dimensionality | 121 |
| 5.8 | Russian Roulette and Splitting | 122 |
| 5.8.1 | Application to Monte Carlo Simulation | 123 |
| 5.9 | Combinations of Different Variance Reduction Techniques | 124 |
| 5.10 | Biased Estimators | 125 |
| 5.11 | Improved Monte Carlo Integration Schemes | 126 |
| 5.11.1 | Weighted Monte Carlo Integration | 127 |
| 5.11.2 | Monte Carlo Integration with Quasirandom Numbers | 129 |
| 5.12 | Summary | 129 |
| 6 | Markov Chain Monte Carlo | 133 |
| 6.1 | Markov Chains to the Rescue | 133 |
| 6.1.1 | Ergodic Markov Chains | 136 |
| 6.1.2 | The Metropolis-Hastings Algorithm | 137 |
| 6.1.3 | The Myth of Burn-in | 143 |
| 6.1.4 | The Proposal Distribution | 144 |
| 6.1.5 | Multidimensional Sampling | 148 |
| 6.1.6 | The Gibbs Sampler | 152 |
| 6.2 | Brief Review of Probability Concepts | 153 |
| 6.3 | Bayes Theorem | 154 |
| 6.4 | Inference and Decision Applications | 159 |
| 6.4.1 | Implementing MCMC with Data | 161 |
| 6.5 | Summary | 166 |
| 7 | Inverse Monte Carlo | 171 |
| 7.1 | Formulation of the Inverse Problem | 173 |
| 7.1.1 | Integral Formulation | 174 |
| 7.1.2 | Practical Formulation | 175 |
| 7.1.3 | Optimization Formulation | 176 |
| 7.1.4 | Monte Carlo Approaches to Solving Inverse Problems | 176 |
| 7.2 | Inverse Monte Carlo by Iteration | 177 |
| 7.3 | Symbolic Monte Carlo | 178 |
| 7.3.1 | Uncertainties in Retrieved Values | 179 |

| | | |
|----------|-------------------------------------------------------------|------------|
| 7.3.2 | The PDF Is Fully Known | 181 |
| 7.3.3 | The PDF Is Unknown | 185 |
| 7.3.4 | Unknown Parameter in Domain of x | 194 |
| 7.4 | Inverse Monte Carlo by Simulation | 196 |
| 7.4.1 | A Simple Two-Dimensional World | 196 |
| 7.5 | General Applications of IMC | 199 |
| 7.6 | Summary | 199 |
| 8 | Linear Operator Equations | 203 |
| 8.1 | Linear Algebraic Equations | 203 |
| 8.1.1 | Solution of Linear Equations by Random Walks | 204 |
| 8.1.2 | Solution of the Adjoint Linear Equations by Random Walks | 207 |
| 8.1.3 | Solution of Linear Equations by Finite Random Walks | 209 |
| 8.2 | Linear Integral Equations | 211 |
| 8.2.1 | Monte Carlo Solution of a Simple Integral Equation | 212 |
| 8.2.2 | A More General Procedure for Integral Equations | 214 |
| 8.3 | Linear Differential Equations | 216 |
| 8.3.1 | Monte Carlo Solutions of Linear Differential Equations | 217 |
| 8.3.2 | Continuous Monte Carlo for Laplace's Equation | 218 |
| 8.3.3 | Generalization to Three Dimensions | 220 |
| 8.3.4 | Continuous Monte Carlo for Poisson's Equation | 222 |
| 8.3.5 | The Two-dimensional Helmholtz Equation | 225 |
| 8.3.6 | The Three-dimensional Helmholtz Equation | 229 |
| 8.4 | Eigenvalue Problems | 230 |
| 8.5 | Summary | 231 |
| 9 | The Fundamentals of Neutral Particle Transport | 235 |
| 9.1 | Description of the Radiation Field | 236 |
| 9.1.1 | Directions and Solid Angles | 236 |
| 9.1.2 | Particle Density | 238 |
| 9.1.3 | Flux Density | 239 |
| 9.1.4 | Fluence | 240 |
| 9.1.5 | Current Vector | 241 |
| 9.2 | Radiation Interactions with the Medium | 242 |
| 9.2.1 | Interaction Coefficient Macroscopic Cross Section | 242 |
| 9.2.2 | Attenuation of Uncollided Radiation | 244 |
| 9.2.3 | Average Travel Distance Before an Interaction | 245 |
| 9.2.4 | Scattering Interaction Coefficients | 245 |
| 9.2.5 | Microscopic Cross Sections | 247 |
| 9.2.6 | Reaction Rate Density | 249 |
| 9.3 | Transport Equation | 251 |
| 9.3.1 | Integral Forms of the Transport Equation | 255 |
| 9.4 | Adjoint Transport Equation | 261 |
| 9.4.1 | Derivation of the Adjoint Transport Equation | 262 |

| | | |
|-----------|-------------------------------------------------------------|------------|
| 9.4.2 | Utility of the Adjoint Solution | 263 |
| 9.5 | Summary | 265 |
| 10 | Monte Carlo Simulation of Neutral Particle Transport | 269 |
| 10.1 | Basic Approach for Monte Carlo Transport Simulations | 270 |
| 10.2 | Geometry | 270 |
| 10.2.1 | Combinatorial Geometry | 271 |
| 10.3 | Sources | 273 |
| 10.3.1 | Isotropic Sources | 273 |
| 10.4 | Path-Length Estimation | 274 |
| 10.4.1 | Travel Distance in Each Cell | 274 |
| 10.4.2 | Convex versus Concave Cells | 275 |
| 10.4.3 | Effect of Computer Precision | 275 |
| 10.5 | Purely Absorbing Media | 277 |
| 10.6 | Type of Collision | 278 |
| 10.6.1 | Scattering Interactions | 279 |
| 10.6.2 | Photon Scattering from a Free Electron | 283 |
| 10.6.3 | Neutron Scattering | 284 |
| 10.7 | Time Dependence | 285 |
| 10.8 | Particle Weights | 286 |
| 10.9 | Scoring and Tallies | 286 |
| 10.9.1 | Fluence Averaged Over a Surface | 287 |
| 10.9.2 | Average Fluence in a Volume: Path-Length Estimator | 288 |
| 10.9.3 | Average Fluence in a Volume: Reaction-Density Estimator | 289 |
| 10.9.4 | Average Current Through a Surface | 290 |
| 10.9.5 | Fluence at a Point: Next-Event Estimator | 290 |
| 10.9.6 | Flow Through a Surface: Leakage Estimator | 292 |
| 10.10 | An Example of One-Speed Particle Transport | 293 |
| 10.11 | Monte Carlo Based on the Integral Transport Equation | 296 |
| 10.11.1 | Integral Transport Equation | 296 |
| 10.11.2 | Integral Equation Method as Simulation | 299 |
| 10.12 | Variance Reduction and Nonanalog Methods | 300 |
| 10.12.1 | Importance Sampling | 300 |
| 10.12.2 | Truncation Methods | 302 |
| 10.12.3 | Splitting and Russian Roulette | 302 |
| 10.12.4 | Implicit Absorption | 303 |
| 10.12.5 | Interaction Forcing | 303 |
| 10.12.6 | Exponential Transformation | 303 |
| 10.13 | Summary | 304 |
| A | Some Common Probability Distributions | 307 |
| A.1 | Continuous Distributions | 307 |
| A.1.1 | Uniform Distribution | 308 |
| A.1.2 | Exponential Distribution | 310 |
| A.1.3 | Gamma Distribution | 312 |

| | | |
|----------|--------------------------------------------------------------|------------|
| A.1.4 | Beta Distribution | 314 |
| A.1.5 | Weibull Distribution | 316 |
| A.1.6 | Normal Distribution | 317 |
| A.1.7 | Lognormal Distribution | 319 |
| A.1.8 | Cauchy Distribution | 319 |
| A.1.9 | Chi-Squared Distribution | 321 |
| A.1.10 | Student's t Distribution | 322 |
| A.1.11 | Pareto Distribution | 323 |
| A.2 | Discrete Distributions | 324 |
| A.2.1 | Bernoulli Distribution | 325 |
| A.2.2 | Binomial Distribution | 326 |
| A.2.3 | Geometric Distribution | 329 |
| A.2.4 | Negative Binomial Distribution | 329 |
| A.2.5 | Poisson Distribution | 330 |
| A.3 | Joint Distributions | 333 |
| A.3.1 | Multivariate Normal Distribution | 333 |
| A.3.2 | Multinomial Distribution | 334 |
| B | The Weak and Strong Laws of Large Numbers | 337 |
| B.1 | The Weak Law of Large Numbers | 337 |
| B.2 | The Strong Law of Large Numbers | 339 |
| B.2.1 | Difference Between the Weak and Strong Laws | 339 |
| B.2.2 | Other Subtleties | 340 |
| C | Central Limit Theorem | 341 |
| C.1 | Moment Generating Functions | 341 |
| C.1.1 | Central Moments | 342 |
| C.1.2 | Some Properties of the MGF | 342 |
| C.1.3 | Uniqueness of the MGF | 344 |
| C.2 | Central Limit Theorem | 344 |
| D | Some Popular Monte Carlo Codes for Particle Transport | 347 |
| D.1 | COG | 347 |
| D.1.1 | Current Version | 347 |
| D.1.2 | Principal Authors | 347 |
| D.1.3 | Operating Systems | 347 |
