

# Contents

List of Contributing Authors . . . . .	ix
Preface . . . . .	xv
<b>SECONDARY FLOWS IN RIVERS . . . . .</b>	<b>1</b>
<b>1 Secondary Flows in Rivers: Theoretical Framework, Recent Advances, and Current Challenges, Vladimir Nikora and André G. Roy . . . . .</b>	<b>3</b>
<b>2 Secondary Flows in Rivers: The Effect of Complex Geometry, Bruce MacVicar . . . . .</b>	<b>23</b>
<b>3 Aspects of Secondary Flow in Open Channels: A Critical Literature Review, Athanasios (Thanos) N. Papanicolaou . . . . .</b>	<b>31</b>
<b>SEDIMENT TRANSPORT . . . . .</b>	<b>37</b>
<b>4 Gravel Transport in Granular Perspective, Philippe Frey and Michael Church . . . . .</b>	<b>39</b>
<b>5 On Gravel Exchange in Natural Channels, Judith K. Haschenburger . . . . .</b>	<b>56</b>
<b>MODELLING MORPHODYNAMICS . . . . .</b>	<b>69</b>
<b>6 Morphodynamics of Bars in Gravel-bed Rivers: Bridging Analytical Models and Field Observations, Guido Zolezzi, Walter Bertoldi, and Marco Tubino . . . . .</b>	<b>71</b>
<b>7 Field Observations of Gravel-bed River Morphodynamics: Perspectives and Critical Issues for Testing of Models, Nicola Surian . . . . .</b>	<b>90</b>
<b>8 Morphodynamics of Bars in Gravel-bed Rivers: Coupling Hydraulic Geometry and Analytical Models, Robert G. Millar . . . . .</b>	<b>96</b>
<b>9 Modelling Sediment Transport and Morphodynamics of Gravel-bed Rivers, Erik Mosselman . . . . .</b>	<b>101</b>
<b>10 The Potential of using High-resolution Process Models to Inform Parameterizations of Morphodynamic Models, Richard J. Hardy . . . . .</b>	<b>116</b>
<b>11 The Importance of Off-channel Sediment Storage in 1-D Morphodynamic Modelling, J. Wesley Lauer . . . . .</b>	<b>123</b>
<b>RIVER RESTORATION AND REGULATION . . . . .</b>	<b>135</b>
<b>12 Stream Restoration in Gravel-bed Rivers, Peter R. Wilcock . . . . .</b>	<b>137</b>

13	<b>River Restoration: Widening Perspectives</b> , <i>Nicholas J. Clifford</i> . . . . .	150
14	<b>Restoring Geomorphic Resilience in Streams</b> , <i>Noah P. Snyder</i> . . . . .	160
15	<b>The Geomorphic Response of Gravel-bed Rivers to Dams: Perspectives and Prospects</b> , <i>Gordon E. Grant</i> . . . . .	165
16	<b>Mitigating Downstream Effects of Dams</b> , <i>David Gaeuman</i> . . . . .	182
<b>ECOLOGICAL ASPECTS OF GRAVEL-BED RIVERS</b> . . . . .		<b>191</b>
17	<b>River Geomorphology and Salmonid Habitat: Some Examples Illustrating their Complex Association, from Redd to Riverscape Scales</b> , <i>Michel Lapointe</i> . . . . .	193
18	<b>Incorporating Spatial Context into the Analysis of Salmonid–Habitat Relations</b> , <i>Christian E. Torgersen, Colden V. Baxter, Joseph L. Ebersole, and Robert E. Gresswell</i> . . . . .	216
19	<b>Animals and the Geomorphology of Gravel-bed Rivers</b> , <i>Stephen P. Rice, Matthew F. Johnson, and Ian Reid</i> . . . . .	225
20	<b>Geomorphology and Gravel-bed River Ecosystem Services: Workshop Outcomes</b> , <i>Normand Bergeron and Joanna Eyquem</i> . . . . .	242
<b>TOOLS FOR STUDY</b> . . . . .		<b>259</b>
21	<b>Remote Sensing of the Hydraulic Environment in Gravel-bed Rivers</b> , <i>W. Andrew Marcus</i> . . . . .	261
22	<b>LiDAR and ADCP Use in Gravel-bed Rivers: Advances Since GBR6</b> , <i>David J. Milan and George L. Heritage</i> . . . . .	286
23	<b>Remotely Sensed Topographic Change in Gravel Riverbeds with Flowing Channels</b> , <i>D. Murray Hicks</i> . . . . .	303
24	<b>Modern Digital Instruments and Techniques for Hydrodynamic and Morphologic Characterization of River Channels</b> , <i>Marian Muste, Dongsu Kim, and Venkatesh Merwade</i> . . . . .	315
25	<b>Mapping Water and Sediment Flux Distributions in Gravel-bed Rivers Using ADCPs</b> , <i>Colin D. Rennie</i> . . . . .	342
<b>STEEP CHANNELS</b> . . . . .		<b>351</b>
26	<b>Recent Advances in the Dynamics of Steep Channels</b> , <i>Francesco Comiti and Luca Mao</i> . . . . .	353
27	<b>Examining Individual Step Stability within Step-pool Sequences</b> , <i>Joanna Crowe Curran</i> . . . . .	378
28	<b>Alluvial Steep Channels: Flow Resistance, Bedload Transport Prediction, and Transition to Debris Flows</b> , <i>Dieter Rickenmann</i> . . . . .	386
<b>SEMI-ALLUVIAL CHANNELS</b> . . . . .		<b>399</b>
29	<b>Semi-alluvial Channels and Sediment-Flux-Driven Bedrock Erosion</b> , <i>Jens M. Turowski</i> . . . . .	401
30	<b>Transport Capacity, Bedrock Exposure, and Process Domains</b> , <i>Thomas E. Lisle</i> . . . . .	419
31	<b>Nomenclature, Complexity, Semi-alluvial Channels and Sediment-flux-driven Bedrock Erosion</b> , <i>Lyubov V. Meshkova, Paul A. Carling, and Thomas Buffin-Bélanger</i> . . . . .	424

<b>RIVER CHANNEL CHANGE</b> . . . . .	<b>433</b>
<b>32 Changes in Channel Morphology Over Human Time Scales</b> , <i>John M. Buffington</i> . . . . .	<b>435</b>
<b>33 Channel Response and Recovery to Changes in Sediment Supply</b> , <i>Marwan A. Hassan and André E. Zimmermann</i> . . . . .	<b>464</b>
<b>34 Alluvial Landscape Evolution: What Do We Know About Metamorphosis of Gravel-bed Meandering and Braided Streams?</b> , <i>François Métivier and Laurie Barrier</i> . . . . .	<b>474</b>
<b>35 Differences in Sediment Supply to Braided and Single-Thread River Channels: What Do the Data Tell Us?</b> , <i>John Pitlick, Erich R. Mueller, and Catalina Segura</i> . . . . .	<b>502</b>
<b>36 Can We Link Cause and Effect in Landscape Evolution?</b> , <i>Thomas J. Coulthard and Marco J. Van De Wiel</i> . . . . .	<b>512</b>
<b>ICE IN GRAVEL-BED RIVERS</b> . . . . .	<b>523</b>
<b>37 River-Ice Effects on Gravel-Bed Channels</b> , <i>Robert Ettema and Edward W. Kempema</i> . . . . .	<b>525</b>
<b>38 Is There a Northern Signature on Fluvial Form?</b> , <i>James P. McNamara</i> . . . . .	<b>541</b>
<b>39 Long-term and Large-scale River-ice Processes in Cold-region Watersheds</b> , <i>Etienne Boucher, Yves Bégin, Dominique Arseneault, and Taha B.M.J. Ouarda</i> . . . . .	<b>546</b>
<b>Index</b> . . . . .	<b>555</b>
