

CONTENTS

Preface	17
CAPTER I: Research Plan and Design	23
<i>1.1 First Steps for Consideration</i>	<i>24</i>
(1) Showing Interest and Curiosity	26
(2) Surveying and Reviewing the Literature	27
(3) Integration of Literature Review and Personal Intentions	55
<i>1.2 Theoretical and Practical Planning</i>	<i>60</i>
(1) Formulation of Basic Assumptions and/or Hypotheses	62
(1.1) Formulation of Hypotheses	64
(2) Selecting and Defining Variables	69
(3) Choosing Appropriate Measurement Concepts as well as Operational Definitions	73
(4) Research Design	75
(5) Research Control: Elimination of Alternative Explanations and Speculations	78
(5.1) Systemic Variance	82
(5.2) Error Variance	82
(6) Validity and Plausibility of Research Findings	86
(6.1) Conclusion Validity	86
(6.2) Internal Validity	88
(6.3) Construct Validity	90
(6.4) External Validity	91
(7) Sampling Procedures	92
(7.1) Non-Probability (Purposive Sampling)	94
(7.2) Sampling Framework	94
(7.3) Probability Sampling Methods in Regard to Number-Based Data ..	95
Simple Random Sampling	96
Systematic Random Sampling	96
Stratified Random Sampling	97

Cluster Sampling	101
Randomized Controlled Trials	102
Cohort Sample	102
Case-Control Sample	102
(8) Data Collection Techniques Considerations	102
(8.1) Observation	102
(8.2) Questioning	103
(8.3) Written or Other Resources	103
(8.4) Objective Data Collection	104
(9) Data Analysis Techniques Considerations	104
(10) Conducting a Pilot Study	105
(11) Preparing a Research Proposal—Basic Procedures	106
1.3 Summary and Presentation	108
(1) Relating Results to Basic Assumptions and/or Hypotheses	109
(2) Interpretation of Research Findings (i.e., “Discussion”)	110
(3) A Short Summary (Abstract)	114
(4) Submitting a Final Report	115
(5) Preparing a Research Report for Oral Presentation	117
(6) Examples of Studies Which Used Multi-method Methodology	121
<i>Summary</i>	124
<i>References</i>	125
<i>Recommended Literature</i>	125
CHAPTER II: Descriptive and Inferential Statistics	126
2.1 Numerical Strategies (Statistics)	126
(1) Levels of Measurement	128
(2) Descriptive Statistics and Techniques	131
(3) Describing Data Tables	132
(3.1) Proportions and Percentages	132
(3.2) Ratios	137
(3.3) Frequency Distributions and Grouping (Interval Scales)	138

(3.4)	Frequency Distributions and Grouping (Nominal Scales)	143
(3.5)	Case-Values / Charts	147
(3.6)	Histograms, Polygons (Frequencies and Shapes), Ogives	149
(3.7)	X-Y Plots-Association	153
(4)	Measures of Central and Dispersion Tendencies	155
(4.1)	Measures of Central Tendency	155
	Arithmetic Mean	155
	Weighted, Harmonic, Geometric Mean	158
	Median	159
	Mode	160
	Mean, Median and Mode in one Distribution	161
(4.2)	Measures of Dispersion	163
	Range	164
	Interquartile Range	164
	Mean Deviation	166
	Standard Deviation	166
	Coefficient of Variation	168
	Asymmetry	169
	Stem and Leaf Plot	172
	Box and Whisker Plot	174
(5)	The Normal Curve	176
(5.1)	Meaning of Measurement	176
(5.2)	Normal Curve and its Standard Units	177
(5.3)	T and H Values	183
(5.4)	Standardized Values, Tables, and Norms	184
(5.5)	Stanines	187
(5.6)	Standardized Profiles	188
	<i>Summary</i>	190
	<i>References</i>	190

CHAPTER III: Correlational Methods191

(1)	The Essence of Association Among Variables	194
-----	--	-----

(2)	Choosing the Association Method	201
(3)	Magnitude of an Association Between Variables	201
(4)	Association Between Variables With Nominal-Level Values	203
(4.1)	Chi-Square (χ^2) Test for Independence	207
(4.2)	Likelihood-Ratio Chi-Square	215
	Degrees of Freedom and Significance Level	215
(4.3)	Fisher Exact Test	219
(4.4)	Q ² Value	225
(4.5)	T ² Value	225
(4.6)	Cramer's V	225
(4.7)	Phi (ϕ) Value	226
(4.8)	Pearson's Contingency Coefficient (C)	226
(4.9)	Yule's Q	227
(4.10)	Goodman and Kruskal's Tau (τ)	228
(4.11)	Lambda (λ)	230
(4.12)	Odd Ratio	232
(4.13)	Hypothesis Testing For Two Proportions	233
(4.14)	Log Linear Analysis	235
(5)	Measures of Association for Ordinal Data	240
(5.1)	Gamma	240
(5.2)	Spearman Rank-Order Correlation Coefficient	243
(5.3)	Somer's D	245
(5.4)	Kendall's tau-b	245
(6)	Measures of Association for Interval/Ratio Data	246
(6.1)	Pearson's Product Moment Correlation	246
(6.2)	Partial Correlation	253
(6.3)	Linear Regression	258
(6.4)	Concerns in Regression Analysis	267
	Index of Fit	267
	Analysis of Residuals	268
	Transformation of Variables' Values	270
	Detection and Removal of Heteroscedastic Errors	273
	Qualitative/Dummy Variables	273
	Detection and Correction of Multicollinearity	274

(6.5)	Multiple Regression Model	274
	Selection of Variables in a Regression Equation	282
	Criteria for Evaluating Equations	282
	Selection of Variables: Stepwise Procedures	283
(6.6)	Hierarchical (Cluster) Linear Regression	284
(6.7)	Multi-Level (Hierarchical; Nested) Linear Models	287
(6.8)	Canonical Analysis	291
(6.9)	Factors, Clusters, Groups-Associations	296
(6.10)	Exploratory Factor Analysis (EFA)	298
(6.11)	Cluster Analysis	311
	<i>References</i>	322
(6.12)	Structural Equation Modeling in Sport Sciences	
	(R. Hanegby & D. Kaplan)	323
	From Path-Analysis to SEM	323
	Exploratory Factor Analysis (EFA) Vs Confirmatory Factor	
	Analysis (CFA)	325
	The General Model	326
	Multigroup Structural Equation Modeling	331
	Outline of Steps in Structural Equation Modeling	332
	Model Specification	332
	Identification	333
	Estimation	335
	Model Evaluation	339
	Model Modification	342
	Additional Topics in Structural Equation Modeling	351
	Missing Data	351
	Sampling Problems	354
	Growth Modeling	355
	Concluding Remarks	356
	<i>References</i>	358
	<i>Summary</i>	362

CHAPTER IV: Experimental Methods365

- (1) Sampling Distribution, Statistics, and Parameters 369
- (2) Characteristics of a Good Estimator 375
- (3) Confidence Interval of a Sample's Mean 376
- (4) Choosing the Sample Size 382
- (5) Uses of the Term Probability 383
- (6) Inferential Errors and Power 383
- (7) Choosing the Statistical Test 393
- (8) Tests of Significance for Interval/Ratio Level Measurement 395
 - (8.1) A Z-Test for a Simple Mean
(Population, Standard Deviation is Known) 395
 - (8.2) A t-Test for a Single Mean 397
- (9) A Z-Test for the Equality of Two Independent Means 402
- (10) A t-Test for the Equality of Two Independent Means 403
- (11) A t-Test for the Equality of Two Dependent (Paired Means) 410
- (12) Hypotheses Testing with more than Two Independent Samples:
One-Way Analysis of Variance (ANOVA) 415
 - (12.1) Post-Hoc Multiple Comparison Tests 427
 - (12.2) Expressing Differences Between Means in
Standardized Units-Effect Sizes 431
- (13) A Z-Test for Single Proportion 434
- (14) Ordinal Tests for Two or More Independent Samples 437
 - (14.1) Runs Test (Wald Wolfowitz) 437
 - (14.2) Mann-Whitney (U)/Wilcoxon (W) 440
 - (14.3) Kolmogorov-Smirnov (KS) Test 445
 - (14.4) Kruskal-Wallis H and Median Tests for more than Two Samples . . 448
- (15) Ordinal/Nominal Tests for Paired/Dependent Samples 449
 - (15.1) The McNemar Test for Binominal Distributions 449
 - (15.2) Wilcoxon Signed-Ranks Test 452
 - (15.3) Wilcoxon Signed-Ranks Test for Ordinal Data 452
- (16) Hypotheses Testing With k Independent Factors
(DV=Interval/Ratio Level Measurement) 457
- (17) Multivariate Analysis of Variance (MANOVA) 470

(18) Analysis of Covariance: Accounting for “Intervening Variables”	487
(19) Analysis of Repeated Measures (Trials) Designs	493
(20) Common Models in Experimentation	504
(20.1) Completely Randomized Design (CRD)	505
(20.2) Randomized Block Design (RBD)	506
(20.3) Latin Square Design (LSD)	507
(20.4) Incomplete Block Design (IBD)	509
(20.5) Factorial Design	509
(20.6) Nested Factors (Hierarchical Designs)	513
(20.7) Split-Plot Designs (SPD)	514
(21) Discriminant Analysis	516
(22) Integrating Research Findings: Meta Analysis	528
(23) Critical Review on Null Hypothesis Testing (NHT) and the Bayesian Alternative	534
<i>Summary</i>	539
<i>References</i>	540
<i>Recommended Literature</i>	541
(24) Single Subject Research: Roots, Rational and Methodology (E. Eldar) .	543
(24.1) Basic Features of Single Subject Research	544
(24.2) Single Subject Design versus Group Design	546
(24.3) Visual Analysis of Graphic Data	547
Baseline Logic for Internal Validity	549
Baseline Logic—Defined	549
Baseline Logic—Components	550
Effective Baseline Data	551
Intervention	551
Verification	552
Replication within the Research	553
Replication for Reliability and External Validity	553
(24.4) A-B Design	554
(24.5) Withdrawal Designs	554

	ABAB—Implementation555
	Experimental Control555
	Advantages556
	Limitations556
	Variation of Withdrawal Designs556
(24.6)	Multiple Baseline Designs557
	Basic Forms558
	Implementation559
	Experimental Control560
	Advantages561
	Limitations561
(24.7)	Variations to MB Designs561
	Delayed MB561
	Multiple Probe Design562
	Changing Criterion Design563
	Implementation563
	Experimental Control564
	Advantages565
	Limitations565
(24.8)	Comparative Designs565
	Multitreatment Design566
	Experimental Control567
	Advantages and Limitations567
(24.9)	Alternating Treatment Design567
	Implementation568
	Experimental Control569
	Advantages569
	Limitations569
	Conclusions570
	<i>References</i>572

CHAPTER V: An Introduction to Qualitative Research	575
5.1 Asking Qualitative Questions	579
5.2 Collecting Qualitative Information	581
(1) Observation	581
(1.1) Focus of Observation	581
(1.2) Researcher Role in Observation	584
(1.3) Duration of Observations	586
(1.4) Practical Issues of Observation	587
(2) Interviews	591
(2.1) The Unstructured Interview	591
(2.2) The Semi-structured Interview	593
(2.3) The Structured Interview	594
(2.4) Think-aloud Interview	595
(2.5) Focus Group Interview	596
(2.6) Practical Issues Surrounding Interviews	597
(3) Examining Documents	599
5.3 Designing Qualitative Studies	601
(1) Case Study	602
(2) Naturalistic Inquiry	604
(3) Ethnography	605
(4) Grounded Theory	607
(5) Phenomenology	607
(5) Critical Theory	608
5.4 Making Sense of Qualitative Data	609
(1) Organizing the Data	610
(2) Coding for Themes	612
(2.1) Naming Codes	614
(2.2) Level of Code Detail	615
(2.3) Saturation	615
(2.4) Checking Codes	615

(3)	Interpreting and Explaining the Data	616
(3.1)	Within-Case Displays	617
(3.2)	Cross-Case Displays	619
(3.3)	Contents of Data Displays	621
(3.4)	Making Meaning from Data Displays	621
(4)	Writing the Research Report	623
5.5	<i>Ensuring Rigor in Qualitative Research</i>	625
(1)	Match Data Collection and Analysis to the Research Question(s)	627
(2)	Be Systematic and Tactical	628
(3)	Dig Deep Enough	628
(4)	Document What You Do	629
(5)	Make Biases Explicit	623
(6)	Triangulate	636
	 <i>Summary</i>	 632
	<i>References</i>	633
	CHAPTER VI: Qualitative Research in Sport Psychology	637
6.1	<i>Discourse Analysis</i>	
	Mark Rapley, Edith Cowan University, Australia	640
(1)	Introduction	640
(2)	The Epistemological Position and Basic Principles of Discursive Psychology	643
(3)	The Discursive Psychological Approach: A Summary	645
(4)	The "Methodological" Approach to Discursive Psychology	646
(5)	"Tana Says it's Time to Move on": A Discursive Analysis of the Print Media and the Bernd Stange Controversy	647
(6)	A Discourse Analysis of the Use of Cultural Knowledge of "Psychological" States and the Management of Moral Accountability in Newspaper Texts ...	648
	 <i>References</i>	 656

6.2 *Constructivist Research: Methodology and Practice*

Kathleen Fahy and Karey Harrison, Newcastle University and University of Southern Queensland, Australia	660
(1) Critique of Positivism	661
(2) Interpretivism and Constructivism: 'Making Meaning of Actions'	673
(3) Comparison of Positivist and Constructivist Methodology	679
(4) Summary	681
(5) Turning Methodology into Methods	681
(6) Conclusion	698
<i>References</i>	700

6.3 *Postmodern and Feminist Qualitative Research: Methodology, Methods, and Practice*

Karey Harrison and Kathleen Fahy, University of Southern Queensland and Newcastle University, Australia	702
(1) Historical Overview of Feminism	703
(2) Feminist Theory and Sport Psychology	709
(3) Feminist Research: Advancing the Interests of Women	721
(4) Conclusion	737
<i>References</i>	739

6.4 *Computer-Aided Qualitative Research: A NUD*IST 4 Approach*

Andrea Lamont-Mills, University of Southern Queensland, Australia	741
(1) A Word of Warning—Computers and Qualitative Data Analysis	742
(2) What this Section Will Not Cover	744
(3) NUD*IST 4: The Logic and the Structure	744
(4) An Example: The Construction of Gender and Gender Identity in Elite Australian Sport	750
(5) Some Limitations of NUD*IST 4	752
<i>References</i>	753
