

## Table of contents

Preface	11
<i>Willem Takken and Constantianus J.M. (Sander) Koenraadt</i>	
1. Introduction – who was there first?	13
<i>Willem Takken and Constantianus J.M. Koenraadt</i>	
<b>Fundamental aspects of vector-parasite interactions</b>	17
2. Impact of transgenic immune deployment on mosquito fitness	19
<i>Andrew D. Pike, Chris M. Cirimotich and George Dimopoulos</i>	
3. Plant-sugar feeding and vectorial capacity	35
<i>Chris M. Stone and Woodbridge A. Foster</i>	
4. Vector competence for arboviruses in relation to the larval environment of mosquitoes	81
<i>Barry W. Alto and L. Philip Lounibos</i>	
5. Relevant temperatures in mosquito and malaria biology	103
<i>Krijn P. Paaijmans and Matthew B. Thomas</i>	
6. Evolutionary aspects of <i>Anopheles-Plasmodium</i> interactions	123
<i>Louis Lambrechts and Jacob C. Koella</i>	
<b>Species-specific interactions</b>	139
7. Tick – <i>Borrelia</i> interactions: burden or benefit?	141
<i>Fedor Gassner and Nienke Hartemink</i>	
8. <i>Wolbachia</i> in <i>Aedes</i> mosquitoes: towards biological control of vector-borne diseases	155
<i>Luciano A. Moreira</i>	
9. Behaviour of sandflies infected with <i>Leishmania</i>	167
<i>Paul D. Ready and Matthew E. Rogers</i>	
<b>Strategic issues concerning vector-parasite interactions</b>	179
10. Modelling the control of mosquito-borne diseases	181
<i>Ace North and Penelope Hancock</i>	
11. Heterogeneity in malaria transmission: underlying factors and implications for disease control	197
<i>Teun Bousema and Amrisha Baidjoe</i>	

12. Considerations for male fitness in successful genetic vector control programs <i>Michelle E.H. Helinski and Laura C. Harrington</i>	221
<b>Epilogue</b>	245
13. Ecology of parasite-vector interactions: expect the unexpected <i>Constantianus J.M. Koenraadt and Willem Takken</i>	247
