# Contents

	Contributors	v
	Preface	ix
1	<b>The Diversity of <i>Plasmodium</i> and other Haemosporidians: The Intersection of Taxonomy, Phylogenetics and Genomics</b> Ellen S. Martinsen and Susan L. Perkins	1
2	<b>The Apicomplexan Genomic Landscape: The Evolutionary Context of <i>Plasmodium</i></b> Jeremy D. DeBarry, Segun Fatumo and Jessica C. Kissinger	17
3	<b><i>Plasmodium</i> Genomics and the Art of Sequencing Malaria Parasite Genomes</b> Jane M. Carlton, Steven A. Sullivan and Karine G. Le Roch	35
4	<b>Genome Diversity and Applications in Genetic Studies of the Human Malaria Parasites <i>Plasmodium falciparum</i> and <i>Plasmodium vivax</i></b> Sittiporn Pattaradilokrat, Jianbing Mu, Philip Awadalla and Xin-zhuan Su	59
5	<b>Functional Genomics of <i>Plasmodium</i> Parasites</b> Zbynek Bozdech and Peter R. Preiser	91
6	<b><i>Plasmodium</i> Experimental Genetic Crosses</b> Lisa C. Ranford-Cartwright, Karen L. Hayton and Michael T. Ferdig	127
7	<b>Regulation of Gene Expression</b> Kirk W. Deitsch and Ron Dzikowski	145
8	<b>Invasion of Host Red Blood Cells by Malaria Parasites</b> Amy K. Bei and Manoj T. Duraisingh	169
9	<b>Host Cell Remodelling and Protein Trafficking</b> Silvia Haase, Hayley E. Bullen, Sarah C. Charnaud, Brendan S. Crabb, Paul R. Gilson and Tania F. de Koning-Ward	199

10	<b>Dissecting Mosquito–Parasite Interactions through Molecular Biology and Biochemistry: Genomic, Proteomic and Glycomic Analyses</b>	221
	Lindsay A. Parish, Lindsey S. Garver, David R. Colquhoun, Ceereena Ubaida Mohien, Elizabeth Weissbrod and Rhoel R. Dinglasan	
11	<b>The Malariaologist’s Molecular Toolbox</b>	249
	Alexander G. Maier
