
Contents

Preface	ix
Abbreviations	x
1 Introduction to Drug Targets and Molecular Pharmacology	1
1.1 Introduction to molecular pharmacology	1
1.2 Scope of this textbook	2
1.3 The nature of drug targets	3
1.4 Future drug targets	7
1.5 Molecular pharmacology and drug discovery	11
References	12
2 Molecular Cloning of Drug Targets	13
2.1 Introduction to molecular cloning – from DNA to drug discovery	13
2.2 'Traditional' pharmacology	14
2.3 The relevance of recombinant DNA technology to pharmacology/drug discovery	14
2.4 The 'cloning' of drug targets	15
2.5 What information can DNA cloning provide?	20
2.6 Comparing the pharmacologic profile of the 'cloned' and the 'native' drug target	23
2.7 Reverse pharmacology illustrated on orphan GPCRs	24
2.8 Summary	27
References	27
3 G Protein-coupled Receptors	31
3.1 Introduction to G protein-coupled receptors	31
3.2 Heterotrimeric G-proteins	36
3.3 Signal transduction pathways	40
3.4 Desensitisation and down-regulation of GPCR signalling	44
3.5 Constitutive GPCR activity	45
3.6 Promiscuous G-protein coupling	47
3.7 Agonist-directed signalling	48
3.8 Allosteric modulators of GPCR function	49
3.9 Pharmacological chaperones for GPCRs	50
3.10 GPCR dimerisation	51
3.11 GPCR splice variants	63
3.12 Summary	67
References	67
Useful Web sites	70
4 Ion Channels	71
4.1 Introduction	71
4.2 Voltage-gated ion channels	73

4.3	Other types of voltage-gated ion channels	89
4.4	Ligand-gated ion channels	109
4.5	Summary	125
	References	125
5	Transporter Proteins	129
5.1	Introduction	129
5.2	Classification	129
5.3	Structural analysis of transporters	132
5.4	Transporter families of pharmacological interest	133
5.5	Transporters and cellular homeostasis	167
5.6	Summary	169
	References	169
6	Cystic Fibrosis: Alternative Approaches to the Treatment of a Genetic Disease	175
6.1	Introduction	175
6.2	Cystic fibrosis transmembrane conductance regulator	179
6.3	Mutations in CFTR	183
6.4	Why is cystic fibrosis so common?	184
6.5	Animal models of Cystic fibrosis	186
6.6	Pharmacotherapy	186
6.7	Gene therapy	191
6.8	Conclusion	195
	References	196
7	Pharmacogenomics	201
7.1	Types of genetic variation in the human genome	201
7.2	Thiopurine S-methyltransferase and K ⁺ channel polymorphisms	202
7.3	Polymorphisms affecting drug metabolism	204
7.4	Methods for detecting genetic polymorphisms	209
7.5	Genetic variation in drug transporters	211
7.6	Genetic variation in G protein coupled receptors	215
7.7	Summary	225
	References	225
	Useful Web sites	226
8	Transcription Factors and Gene Expression	227
8.1	Control of gene expression	227
8.2	Transcription factors	229
8.3	CREB	233
8.4	Nuclear receptors	238
8.5	Peroxisome proliferator-activated receptors	240
8.6	Growth factors	247
8.7	Alternative splicing	247
8.8	RNA editing	251
8.9	The importance of non-coding RNAs in gene expression	257
8.10	Summary	270
	References	271
9	Cellular Calcium	277
9.1	Introduction	277
9.2	Measurement of calcium	278

9.3	The exocrine pancreas	289
9.4	Calcium signalling in pancreatic acinar cells	292
9.5	Nuclear calcium signalling	303
9.6	Conclusions	310
	References	311
10	Genetic Engineering of Mice	315
10.1	Introduction to genetic engineering	315
10.2	Genomics and the accumulation of sequence data	315
10.3	The mouse as a model organism	318
10.4	Techniques for genetic engineering	319
10.5	Examples of genetically-engineered mice	332
10.6	Summary	334
	References	334
11	Signalling Complexes: Protein-protein Interactions and Lipid Rafts	339
11.1	Introduction to cell signalling complexes	339
11.2	Introduction to GPCR interacting proteins	340
11.3	Methods used to identify GPCR interacting proteins	340
11.4	Functional roles of GPCR interacting proteins	345
11.5	GPCR signalling complexes	348
11.6	GPCR and ion channel complexes	355
11.7	Ion channel signalling complexes	356
11.8	Development of pharmaceuticals that target GPCR interacting proteins	356
11.9	Development of pharmaceuticals that target protein-protein interactions	356
11.10	Lipid rafts	357
11.11	Receptor-mediated endocytosis	361
11.12	Summary	364
	References	364
12	Recombinant Proteins and Immunotherapeutics	367
12.1	Introduction to immunotherapeutics	367
12.2	Historical background of immunotherapeutics	368
12.3	Basis of immunotherapeutics	368
12.4	Types of immunotherapeutics	369
12.5	Humanisation of antibody therapy	372
12.6	Immunotherapeutics in clinical practice	376
12.7	Advantages and disadvantages of immunotherapy	378
12.8	The future	379
12.9	Summary	380
	References	380
	Glossary	381
	Index	403
