

Contents

Introduction	viii
1. Planning	1
1.1 The scientific method	1
1.2 Types of experiment/project	3
1.3 Getting data – using a spreadsheet	3
1.4 Hypothesis testing	4
1.5 Data types	4
1.6 Sampling effort	7
1.7 Tools of the trade	12
1.8 The R program	13
1.9 Excel	19
2. Data recording	23
2.1 Collecting data – who, what, where, when	23
2.2 How to arrange data	25
3. Beginning data exploration – using software tools	29
3.1 Beginning to use R	29
3.2 Manipulating data in a spreadsheet	37
3.3 Getting data from Excel into R	55
4. Exploring data – looking at numbers	57
4.1 Summarising data	58
4.2 Distribution	61
4.3 A numerical value for the distribution	67
4.4 Statistical tests for normal distribution	75
4.5 Distribution type	76
4.6 Transforming data	81
4.7 When to stop collecting data? The running average	84
4.8 Statistical symbols	88

5. Exploring data – which test is right?	91
5.1 Hypothesis testing	91
5.2 Choosing the correct test	92
6. Exploring data – using graphs	95
6.1 Exploratory graphs	95
6.2 Graphs to illustrate differences	98
6.3 Graphs to illustrate links	99
6.4 Graphs – a summary	102
7. Tests for differences	103
7.1 Differences: <i>t</i> -test	103
7.2 Differences: <i>U</i> -test	112
7.3 Paired tests	117
8. Tests for linking data – correlations	123
8.1 Correlation: Spearman’s rank test	123
8.2 Pearson’s product moment	130
8.3 Correlation tests using Excel	134
8.4 Correlation tests using R	139
8.5 Curved linear correlation	143
9. Tests for linking data – associations	147
9.1 Association: Chi-squared test	147
9.2 Goodness of fit test	153
9.3 Using R for Chi-squared tests	154
9.4 Using Excel for Chi-squared tests	157
10. Differences between more than two samples	161
10.1 Using R for more complex statistical analyses	161
10.2 Analysis of variance	164
10.3 Kruskal–Wallis test	186
11. Tests for linking several factors	195
11.1 Multiple regression	195
11.2 Curved-linear regression	212
12. Reporting results	239
12.1 Presenting findings	239
12.2 Publishing	239
12.3 Reporting results of statistical analyses	240
12.4 Graphs	241
12.5 More about graphs in R	273
12.6 Worked example graph data in R	296
12.7 Graphs: a summary	309
12.8 Writing papers	310

12.9 Plagiarism	311
12.10 References	312
12.11 Poster presentations	313
12.12 Giving a talk (PowerPoint)	314
13. Summary	315
<i>Glossary</i>	317
<i>Index</i>	322
