<i>Foreword</i>	ix
<b>1 The Shift to Organic Food</b>	<b>1</b>
Background	1
Organic regulations	3
Consumer perceptions	7
Analysis of the topic	9
References	10
<b>2 Consumer Concerns About Food</b>	<b>13</b>
The concerns	14
Consumer concerns and attitudes	16
Food regulations	20
Justification for consumer attitudes about the safety of organic and conventional foods	21
Range of organic foods	22
References	23
<b>3 Vegetable Produce</b>	<b>25</b>
Pest and disease control	25
Documented findings on pesticide residues	27
Other chemical contaminants	33
Other toxic and antinutritional compounds in produce	35
Hormones	35
Can organic produce cause food poisoning?	36
Nutrient concentrations	42
Organoleptic quality	51
Identification of organic produce	53
Food from afar	54
Finally: watch which salad veg you eat	55
Conclusions	55
References	56
<b>4 Fruit</b>	<b>61</b>
Pesticide residues	61
Other risks with fruit	68
Chemical residues	68
Microbial problems	70

	Mycotoxins	70
	Cloning and gene-modified fruit	71
	Nutrient concentrations	72
	Appearance and organoleptic qualities	83
	Preserves	86
	Conclusions	88
	References	89
<b>5</b>	<b>Cereal Grains</b>	<b>93</b>
	Pesticide residues	93
	Chemical residues	96
	Other issues relating to grains	97
	Mycotoxins: are organic grains less safe?	98
	Gene-modified crops	102
	Nutritional and organoleptic qualities	103
	Wheat	104
	Oats	108
	Barley	108
	Conclusions	108
	References	109
<b>6</b>	<b>Meat</b>	<b>111</b>
	Chemical and pesticide residues	111
	Organic meat	116
	Hormones	121
	Hormone residue levels in meats. Do government agencies monitor for these?	123
	Developing countries	124
	Antibiotics	125
	Bacterial contamination of meat	127
	Cloning	129
	Mad-cow disease	131
	Contaminated beef products implicated	132
	Gene modification	133
	Nutritional and organoleptic qualities	135
	Beef	135
	Pork	141
	Poultry	146
	Fish	150
	Conclusions	157
	References	158
<b>7</b>	<b>Milk and Milk Products</b>	<b>163</b>
	The hormone issue	163
	Raw milk	165

---

Antibiotic residues	167
Pesticide and chemical residues	168
Nutritional and organoleptic qualities	170
Research findings	170
Consumer findings	175
Conclusions	179
References	180
<b>8 Eggs</b>	<b>183</b>
Cholesterol	184
<i>Salmonella</i> and food-poisoning	187
Contamination with residues	191
Antibiotics	191
Chemical residues	192
Egg quality	198
Research findings	198
Consumer findings	203
Conclusions	203
References	204
<b>9 Is Organic Food Safer?</b>	<b>207</b>
Residues	207
Vegetable produce	207
Fruit	208
Cereal grains	208
Meat	208
Milk	209
Eggs	209
Food poisoning	210
Mycotoxins	211
Other anti-nutrients	211
Nitrate	211
Significance of the findings in relation to health	213
Other research on food and health	216
Health of farmers and farm workers	219
Other approaches	221
Conclusions	222
References	223
<b>10 Is Organic Food More Nutritious and “Tasty”?</b>	<b>227</b>
Reviews	227
Analysis by food group	237
Vegetable produce	237
Fruit	238
Cereal grains	239

Meat	239
Milk	239
Eggs	240
Taste	240
References	240
<b>11 Psychology of Organic Food Choice</b>	<b>243</b>
The safety issue	244
Nutritional quality and taste	244
Environmental issues	248
Image	252
Conclusions	256
References	256
<b>12 Conclusions</b>	<b>259</b>
Reference	263
<i>Appendix</i>	265
<i>Index</i>	267
