Contents

1	**A General Life Insurance Model**		1
	1.1	Introduction	1
	1.2	Examples	2
		1.2.1 Types of Life Insurance	2
		1.2.2 Methods of Financing	4
	1.3	The Insurance Model	4
2	**Stochastic Processes**		7
	2.1	Definitions	7
	2.2	Markov Chains on a Countable State Space	10
	2.3	Markov Chains in Continuous Time and Kolmogorov's Differential Equations	14
	2.4	Examples	18
3	**Interest Rate**		21
	3.1	Introduction	21
	3.2	Definitions	21
	3.3	Models for the Interest Rate Process	23
	3.4	Stochastic Interest Rate	26
		3.4.1 Discrete Time Interest Rate Models	27
		3.4.2 Continuous Time Interest Rate Models	27
4	**Cash Flows and the Mathematical Reserve**		29
	4.1	Introduction	29
	4.2	Examples	29
	4.3	Fundamentals	30
	4.4	Deterministic Cash Flows	33
	4.5	Stochastic Cash Flows	36
	4.6	Mathematical Reserve	39

digitalisiert durch DEUTSCHE NATIONAL BIBLIOTHEK

4.7 Recursion Formulas for the Mathematical Reserves 43
4.8 Calculation of the Premiums 45

5 Difference Equations and Differential Equations 53
5.1 Introduction 53
5.2 Thiele's Differential Equations 53
5.3 Examples: Thiele's Differential Equation 56
5.4 Differential Equations for Moments of Higher Order 59
5.5 The Distribution of the Mathematical Reserve 67

6 Examples and Problems From Applications 73
6.1 Introduction 73
6.2 Monthly and Quarterly Payments 73
6.3 Pensions with Guaranteed Payment Periods 75
6.4 Refund Guarantee 77
6.5 Insurances with Stochastic Interest Rate 79
6.6 Disability Insurance 82

7 Hattendorff's Theorem 85
7.1 Introduction 85
7.2 Hattendorff's Theorem: General Setting 85
7.3 Hattendorff's Theorem: Markov Model 88

8 Unit-Linked Policies 93
8.1 Introduction 93
8.2 Pricing Theory 95
8.2.1 Definitions 95
8.2.2 Arbitrage 98
8.2.3 Continuous Time Models 103
8.3 The Economic Model 104
8.4 Calculation of Single Premiums 107
8.4.1 Pure Endowment Policy 107
8.4.2 Term Life Insurance 109
8.5 Thiele's Differential Equation 110

9 Policies with Stochastic Interest Rate 115
9.1 Introduction 115
9.2 The Vasicek Model 115
9.3 Value of the Portfolio 116
9.4 A Model for the Interest Rate Structure 125
9.5 Thiele's Differential Equation 129

10 Technical Analysis 133
10.1 Classical Technical Analysis 133
10.2 Profit Testing 135
10.3 Embedded Value 136
10.3.1 State Space 137
10.3.2 Discount Function 138
10.3.3 Definition of the Policy Functions 138
10.3.4 Examples 139

11 Abstract Valuation 145
11.1 Framework: Valuation Portfolios 145
11.2 Cost of Capital 149
11.3 Inclusion in the Markov Model 153
11.4 Asset Liability Management 155

12 Policyholder Bonus Mechanism 163
12.1 Concept of Surplus: Traditional Approach and Legal Quote 163
12.2 Portfolio Calculations 166
12.3 Portfolio Dynamics and ALM 168
12.4 Variable Annuities (VA) 171
12.4.1 Introduction 171
12.4.2 Product Design 176

Appendix A: Notes on Stochastic Integration 185

Appendix B: Examples 195

Appendix C: Mortality Rates in Germany 199

Appendix D: Mortality Rates in Switzerland 203

Appendix E: Java Code for the Calculation of the Markov Model . . . 207
