1	Introduction	17
2	Sudden Death or Glorious Convalescence: Risk Transfers, Cross-country Spillovers and Sovereign Defaults	19
2.1	Introduction	19
2.2	Related Literature	20
2.3	Theoretical Motivation	22
2.4	Fiscal Positions and Default Risks	25
2.4.1	Cost of public debt in the euro area	26
2.4.2	Market-based implicit default probabilities	28
2.5	Channels of Risk Transfers	33
2.5.1	Primary data set	35
2.5.2	Risk transfer from the private to the public sector	36
2.5.3	Cross-country spillovers	37
2.5.4	<i>Implications of the results</i>	41
2.6	Conclusion	44
3	On the Sustainability of sub-national Government Finance – A Panel Data Approach	47
3.1	Introduction	47
3.2	Theoretical Concepts and Related Literature	47
3.2.1	Role of Public Debt	48
3.2.2	Devolution tendencies	54
3.2.3	Institutions to contain indebtedness	58
3.3	Empirics	62
3.3.1	Data Description	63
3.3.2	Econometric Models and Results	66
3.3.3	Static Analysis	66
3.3.4	Dynamic Analysis	69

3.4	Application to Germany	70
3.5	Conclusion	75
4	Two-sided Certification: The market for Rating Agencies	77
4.1	Introduction	77
4.2	Related literature	78
4.3	The Setup	79
4.4	Optimal behaviour of a monopolistic certifier	81
4.4.1	The market without the certifier	81
4.4.2	One-sided certification	83
4.4.3	Comparison of one-sided certification	88
4.4.4	Two-sided certification	90
4.5	Application to the Rating Market	95
4.6	Conclusion	100
5	The Fiscal-Financial Transmission Channel: Asset pricing in Germany	103
5.1	Introduction	103
5.2	Related Literature	104
5.3	Taxation	107
5.3.1	Construction of the Effective Marginal Tax Rate	108
5.3.2	Application to the German Tax System	110
5.3.3	Effective Marginal Tax rate in Germany	115
5.4	Empirics	116
5.4.1	Macroeconomic Environment	116
5.4.2	Estimations and results	118
5.5	Results and Transmission channel	123
5.6	Conclusion	124
6	Conclusion and Discussion	127
A	Appendix: Sudden Death or Glorious Convalescence: Risk Transfers, Cross-country Spillovers and Sovereign Defaults	133
A.1	Computation of market-implied default probabilities	133

A.2	Stylised sovereign balance sheet	134
A.3	Sources of risk for the public balance sheet	135
A.4	Financial market rescue measures: Direct impact	136
A.5	Financial market rescue measures: Contingent liability	137
A.6	Risk-neutral default probabilities compared to rating assignments	138
A.7	Standard deviation of default probabilities of selected Euro area countries	139
A.8	Key variables applied in the panel estimations	139
A.9	Exposure of banks in sample countries	140
B	Appendix: On the Sustainability of sub-national Government Finance – A Panel Data Approach	143
B.1	Institutional rules and deficits	143
B.2	Empirical results	144
C	Appendix: Two-sided Certification: The market for Rating Agencies	145
C.1	Summary results	145
C.2	Appendix Proofs	146
C.2.1	Proof of Proposition 4	146
C.2.2	Proof of Lemma 1	146
C.2.3	Proof of Lemma 2	146
C.2.4	Proof of Proposition 5	146
C.2.5	Proof of Lemma 3	147
C.2.6	Proof of Lemma 4	147
C.2.7	Proof of Lemma 5	148
C.2.8	Proof of Proposition 6	148
C.2.9	Proof of Corollary 6	149
C.2.10	Proof of Lemma 8	149
C.2.11	Proof of Lemma 8	149
C.2.12	Proof of Lemma 9	149
C.2.13	Proof of Lemma 10	150
C.2.14	Proof of Proposition 7	151

D Appendix: The Fiscal-Financial Transmission Channel: Asset pricing in Germany	153
D.1 Construction of the effective tax rate	153
D.2 Differences of the imputation systems: full imputation system	154
D.3 Differences of the imputation systems: half income system	155
D.4 Sources of variables	156
D.5 Price-Earnings Ratios in Selected Countries	157
Bibliography	159
