

# Table of Contents

<b>1 Introduction</b>	<b>1</b>
1.1 Motivation . . . . .	1
1.2 Methodological Framework . . . . .	5
1.3 Outline of the Thesis . . . . .	6
<b>2 The Effect of Preschool Attendance on Secondary School Track Choice: Evidence from Siblings</b>	<b>10</b>
2.1 Introduction . . . . .	10
2.2 Germany's Preschool and School System . . . . .	13
2.3 Empirical Strategy and Data . . . . .	15
2.3.1 Estimation Strategy . . . . .	15
2.3.2 Data on Preschool Attendance and Secondary School Track Choice . . . . .	19
2.4 Results . . . . .	24
2.4.1 OLS Results . . . . .	24
2.4.2 Sibling Models . . . . .	26
2.4.3 Robustness Checks . . . . .	36
2.4.4 Cognitive Skills as Dependent Variable . . . . .	43
2.5 Conclusion . . . . .	45
<b>3 Age at Preschool Entrance and Noncognitive Skills before School: An Instrumental Variable Approach</b>	<b>49</b>
3.1 Introduction . . . . .	49
3.2 Germany's Preschool System and the Month of Birth Instrument . . . . .	53
3.3 Empirical Strategy and Data . . . . .	58
3.3.1 Estimation Strategy . . . . .	58
3.3.2 Data on Preschool Entrance and Noncognitive Skills . . . . .	61
3.4 Results . . . . .	67
3.4.1 First Stage Results . . . . .	67

3.4.2	Effects of Age at Preschool Entrance on Noncognitive Skills . . .	70
3.4.3	Robustness Checks . . . . .	75
3.5	Conclusion . . . . .	81
<b>4</b>	<b>Public Child Care and Mothers' Labor Supply:</b>	
	<b>Evidence from Age Cut-offs</b>	<b>86</b>
4.1	Introduction . . . . .	86
4.2	Germany's Child Care System and the Cut-off Rules . . . . .	90
4.3	Empirical Strategy and Data . . . . .	91
4.3.1	Estimation Strategy . . . . .	91
4.3.2	Data on Child Care and Mothers' Outcomes . . . . .	93
4.4	Results . . . . .	98
4.4.1	Reduced form: Eligibility for Child Care and Mothers' Labor Supply . . . . .	98
4.4.2	2SLS: Child Care Attendance and Mothers' Labor Supply . . .	108
4.4.3	Robustness Checks . . . . .	117
4.5	Conclusion . . . . .	122
<b>5</b>	<b>Identifying the Incidence of "Grading on a Curve":</b>	
	<b>A Within-Student Across-Subject Approach</b>	<b>124</b>
5.1	Introduction . . . . .	124
5.2	The German School System and Teacher Grading . . . . .	127
5.3	Empirical Strategy and Data . . . . .	129
5.3.1	Estimation Strategy . . . . .	129
5.3.2	Data on German Fourth-Grade Students from PIRLS . . . . .	132
5.4	Results . . . . .	138
5.4.1	Pooled OLS Models and Correlated Random Effects Model . . .	138
5.4.2	First-Differenced Model . . . . .	141
5.4.3	Effect Heterogeneity . . . . .	145
5.5	The Association Between Relative Grading and Students' Learning Effort . . . . .	149
5.6	Conclusion . . . . .	154
<b>6</b>	<b>Policy Conclusions</b>	<b>161</b>
	<b>Literature</b>	<b>165</b>
