# CONTENTS

Contributors	ix
Preface	xiii
Acknowledgments	xv
<b>PART I — Imaging Instrumentation</b>	
1. High-Resolution Imaging of Cellular Processes in <i>Caenorhabditis elegans</i> <i>Amy S. Maddox and Paul S. Maddox</i>	
I. Microscope Stand	4
II. Objective Lenses and Resolution	5
III. Transmitted Light Imaging	8
IV. Fluorescence Imaging	11
V. Detectors	13
VI. Confocal Imaging	16
VII. Deconvolution Imaging	19
VIII. Whole Worm (Adult and Larval Stages)	21
IX. Embryos	25
References	33
2. Immunofluorescence Microscopy <i>Diane C. Shakes, David M. Miller III and Michael L. Nonet</i>	
I. Introduction	36
II. Preparing Specimens for Immunolocalization Studies	42
III. Preparation of Antibodies to Nematode Antigens	54
IV. Microscopy: Necessary Equipment and Imaging Tips	58
V. Concluding Remarks	60
VI. Recipes	60
References	62
3. Fluorescent Protein Methods: Strategies and Applications <i>Harald Hutter</i>	
I. Introduction	68
II. Methods	70
III. Adopting New Fluorescent Proteins for Use in <i>C. elegans</i>	80
References	89

4. Modern Electron Microscopy Methods for <i>C. elegans</i> <i>David H. Hall, Erika Hartwig and Ken C.Q. Nguyen</i>	
I. Introduction	94
II. Modern Electron Microscopes	94
III. Alternate Immersion Fixation Techniques	97
IV. Serial Thin Sectioning	116
V. ImmunoEM Protocols	124
VI. Alternate Methods to Post Stain Thin Sections	126
VII. Electron Tomography	130
VIII. Emerging EM Technologies	134
IX. Computer-Based Analytical Tools	140
X. Landmarks for Recognizing Tissues	145
Acknowledgments	146
References	147
<b>PART II — Cell Biology</b>	
5. Culture and Manipulation of Embryonic Cells <i>Lois G. Edgar and Bob Goldstein</i>	
I. Introduction: Uses and Limitations of the System	154
II. Embryo Devitellinization and Blastomere Isolation	159
III. Culture Methods	163
IV. Drug Treatments	165
V. Radioactive Labeling	166
VI. Fixation, Cytochemistry, and Electron Microscopy	166
VII. Solutions and Culture Media	170
References	174
6. Laser Microsurgery in <i>Caenorhabditis elegans</i> <i>Christopher Fang-Yen, Christopher V. Gabel, Aravinthan D. T. Samuel, Cornelia I. Bargmann and Leon Avery</i>	
I. Overview	178
II. Identifying Cells in <i>C. elegans</i>	180
III. Laser Ablation Theory and Apparatus	186
IV. Laser Killing of Cells	192
V. Assessing Damage to the Operated Cell	198
VI. Unintended Damage	199
VII. Laser Cutting of Nerve Fibers	199
VIII. Related Methods	201
Acknowledgments	203
References	203
7. Methods in Cell Biology: Analysis of Cell Polarity in <i>C. elegans</i> Embryos <i>Olaf Bossinger and Carrie R. Cowan</i>	
I. Introduction	208
II. Methods for Analyzing Gene Function	212

III. Analyzing Cell Polarity: Protein and Organelle Localization	215
IV. Dynamics of Polarity Establishment	222
V. Summary	233
References	233
8. Analysis of Membrane-Bound Organelles	
<i>Hanna Fares and Alexander M. van der Bliek</i>	
I. Introduction	240
II. Visualizing Organelles	240
III. Functional Studies	250
IV. Protein Extract and Organelle Isolation	259
V. Summary	261
VI. Acknowledgments	261
References	262
9. <i>C. elegans</i> Cell Cycle Analysis	
<i>Sander van den Heuvel and Edward T. Kipreos</i>	
I. Introduction	266
II. Types of <i>C. elegans</i> cell cycles	266
III. Using the <i>C. elegans</i> Lineage to Follow Cell Divisions	270
IV. Methods of Developmental Synchronization	272
V. Quantification of DNA Content	275
VI. Detection of Different Cell Cycle Phases	278
VII. Common cell Cycle Phenotypes and Potential Interpretations	285
References	290
<b>PART III—Physiology</b>	
10. Methods for Studying Programmed Cell Death in <i>C. elegans</i>	
<i>Yi-chun Wu, Xiaochen Wang and Ding Xue</i>	
I. Introduction	298
II. Methods	299
III. Conclusions	316
Acknowledgments	317
References	317
11. Methods for Studying the DNA Damage Response in the <i>Caenorhabditis elegans</i> Germ Line	
<i>Ashley L. Craig, Sandra C. Moser, Aymeric P. Bailly and Anton Gartner</i>	
I. Introduction	322
II. Assay Development	326
III. Assays	333
IV. Materials	347

V. Discussion	348
Acknowledgments	349
References	349
12. Analysis of Aging in <i>Caenorhabditis elegans</i>	
<i>Deepti S. Wilkinson, Rebecca C. Taylor, and Andrew Dillin</i>	
I. Introduction	354
II. Aging Pathways and Their Mechanism of Action	355
III. Life-Span Analysis	358
IV. Analysis and Interpretation of Lifespan Data	367
V. Measurement of Age-Related Changes	368
VI. Conclusion	375
Acknowledgments	376
References	376
13. Analyses of <i>C. elegans</i> Fat Metabolic Pathways	
<i>Alexandre Guimarães de Almeida Barros, Jason Liu, George A. Lemieux, Brendan C. Mullaney, and Kaveh Ashrafi</i>	
I. Introduction	384
II. Staining of Fixed Animals and Histochemical Methods	386
III. Biochemical Methods	390
IV. Biochemical Measurements of Metabolic Rates	396
V. Visualization of Fat Depots and Fat Metabolism Using Vital Dyes	398
VI. Visualizing Hypodermal, Intestinal, and Gonad Lipid Stores using Nile Red	400
VII. Fatty Acid Uptake	403
VIII. Raman Scattering-Based Methods of Lipid Imaging in <i>C. elegans</i>	404
IX. Summary	405
Acknowledgements	405
References	406
14. Electrophysiological Methods for <i>Caenorhabditis elegans</i> Neurobiology	
<i>Miriam B. Goodman, Theodore H. Lindsay, Shawn R. Lockery, Janet E. Richmond</i>	
I. Introduction	410
II. Recording Currents from Identified Neurons	411
III. Recording Synaptic Events from Identified Neurons	417
IV. Recording Currents and Synaptic Events at the Neuromuscular Junction	420
V. Materials	428
VI. Discussion	433
VII. Summary	433
Acknowledgments	434
References	434
Index	437
Volumes in Series	449
