<b>Preface to the Fourth Edition</b>	<b>xxv</b>
<b>PART 1 BASIC CONCEPTS</b>	<b>1</b>
<b>1. Uses of Sample Surveys</b>	<b>3</b>
1.1 Why Sample Surveys Are Used, 3	
1.2 Designing Sample Surveys, 5	
1.2.1 Sample Design, 5	
1.2.2 Survey Measurements, 6	
1.2.3 Survey Operations, 6	
1.2.4 Statistical Analysis and Report Writing, 7	
1.3 Preliminary Planning of a Sample Survey, 7	
Exercises, 8	
Bibliography, 9	
<b>2. The Population and the Sample</b>	<b>11</b>
2.1 The Population, 11	
2.1.1 Elementary Units, 13	
2.1.2 Population Parameters, 13	
2.2 The Sample, 18	
2.2.1 Probability and Nonprobability Sampling, 18	
2.2.2 Sampling Frames, Sampling Units, and Enumeration Units, 19	
2.3 Sampling Measurements and Summary Statistics, 20	
2.2.4 Estimation of Population Characteristics, 22	

- 2.3 Sampling Distributions, 25
- 2.4 Characteristics of Estimates of Population Parameters, 30
  - 2.4.1 Bias, 31
  - 2.4.2 Mean Square Error, 32
  - 2.4.3 Validity, Reliability, and Accuracy, 35
- 2.5 Criteria for a Good Sample Design, 36
- 2.6 Summary, 37
- Exercises, 37
- Bibliography, 42

## **PART 2 MAJOR SAMPLING DESIGNS AND ESTIMATION PROCEDURES 43**

### **3. Simple Random Sampling 45**

- 3.1 What Is a Simple Random Sample?, 45
  - 3.1.1 How to Take a Simple Random Sample, 46
  - 3.1.2 Probability of an Element Being Selected, 47
- 3.2 Estimation of Population Characteristics Under Simple Random Sampling, 49
  - 3.2.1 Estimation Formulas, 49
  - 3.2.2 Numerical Computation of Estimates and Their Standard Errors, 50
- 3.3 Sampling Distributions of Estimated Population Characteristics, 55
- 3.4 Coefficients of Variation of Estimated Population Parameters, 58
- 3.5 Reliability of Estimates, 61
- 3.6 Estimation of Parameters for Subdomains, 64
- 3.7 How Large a Sample Do We Need?, 70
- 3.8 Why Simple Random Sampling Is Rarely Used, 75
- 3.9 Summary, 76
- Exercises, 76
- Bibliography, 79

### **4. Systematic Sampling 83**

- 4.1 How To Take a Systematic Sample, 83
- 4.2 Estimation of Population Characteristics, 84
- 4.3 Sampling Distribution of Estimates, 86
- 4.4 Variance of Estimates, 90
- 4.5 A Modification That Always Yields Unbiased Estimates, 92
- 4.6 Estimation of Variances, 100
- 4.7 Repeated Systematic Sampling, 103

4.7.1 Use of Stata For Estimation In Repeated Systematic Sampling, 107	
4.7.2 Use of SUDAAN for Estimation in Repeated Systematic Sampling, 109	
4.8 How Large a Sample Do We Need?, 111	
4.9 Using Frames That Are Not Lists, 113	
4.10 Summary, 114	
Exercises, 114	
Bibliography, 120	
<b>5. Stratification and Stratified Random Sampling</b>	<b>121</b>
5.1 What Is a Stratified Random Sample?, 121	
5.2 How to Take a Stratified Random Sample, 122	
5.3 Why Stratified Sampling? 122	
5.4 Population Parameters for Strata, 128	
5.5 Sample Statistics for Strata, 133	
5.6 Estimation of Population Parameters from Stratified Random Sampling, 134	
5.7 Summary, 139	
Exercises, 139	
Bibliography, 142	
<b>6. Stratified Random Sampling: Further Issues</b>	<b>143</b>
6.1 Estimation of Population Parameters, 143	
6.2 Sampling Distributions of Estimates, 144	
6.3 Estimation of Standard Errors, 146	
6.4 Estimation of Characteristics of Subgroups, 148	
6.5 Allocation of Sample to Strata, 150	
6.5.1 Equal Allocation, 151	
6.5.2 Proportional Allocation: Self-Weighting Samples, 151	
6.5.3 Optimal Allocation, 158	
6.5.4 Optimal Allocation and Economics, 160	
6.6 Stratification After Sampling, 168	
6.7 How Large a Sample Is Needed?, 175	
6.8. Construction of Stratum Boundaries and Desired Number of Strata, 179	
6.9 Summary, 183	
Exercises, 184	
Bibliography, 188	

<b>7. Ratio Estimation</b>	<b>189</b>
7.1 Ratio Estimation Under Simple Random Sampling, 190	
7.2 Estimation of Ratios for Subdomains Under Simple Random Sampling, 198	
7.3 Poststratified Ratio Estimates Under Simple Random Sampling, 200	
7.4 Ratio Estimation of Totals Under Simple Random Sampling, 204	
7.5 Comparison of Ratio Estimate with Simple Inflation Estimate, 210	
7.6 Approximation to the Standard Error of the Ratio Estimated Total, 211	
7.7 Determination of Sample Size, 212	
7.8 Regression Estimation of Totals, 213	
7.9 Ratio Estimation in Stratified Random Sampling, 215	
7.10 Summary, 218	
Exercises, 218	
Bibliography, 222	
<b>8. Cluster Sampling: Introduction and Overview</b>	<b>223</b>
8.1 What Is Cluster Sampling? 224	
8.2 Why Is Cluster Sampling Widely Used? 226	
8.3 A Disadvantage of Cluster Sampling: High Standard Errors, 228	
8.4 How Cluster Sampling Is Treated in This Book, 229	
8.5 Summary, 229	
Exercises, 230	
Bibliography, 230	
<b>9. Simple One-Stage Cluster Sampling</b>	<b>231</b>
9.1 How to Take a Simple One-Stage Cluster Sample, 232	
9.2 Estimation of Population Characteristics, 232	
9.3 Sampling Distributions of Estimates, 250	
9.4 How Large a Sample Is Needed?, 254	
9.5 Reliability of Estimates and Costs Involved, 256	
9.6 Choosing a Sampling Design Based on Cost and Reliability, 258	
9.7 Summary, 263	
Exercises, 263	
Bibliography, 268	
<b>10. Two-Stage Cluster Sampling: Clusters Sampled with Equal Probability</b>	<b>269</b>
10.1 Situation in Which all Clusters Have the Same Number $N_i$ of Enumeration Units, 270	

- 10.1.1 How to Take a Simple Two-Stage Cluster Sample, 270
- 10.1.2 Estimation of Population Characteristics, 271
- 10.1.3 Estimation of Standard Errors, 273
- 10.1.4 Sampling Distribution of Estimates, 284
- 10.1.5 How Large a Sample Is Needed? 289
- 10.1.6 Choosing the Optimal Cluster Size  $\bar{n}$  Considering Costs, 292
- 10.1.7 Some Shortcut Formulas for Determining the Optimal Number  $\bar{n}$ , 295
- 10.2 Situation in Which Not All Clusters Have the Same Number  $N_i$  of Enumeration Units, 300
  - 10.2.1 How to Take a Simple Two-Stage Cluster Sample for This Design, 300
  - 10.2.2 Estimation of Population Characteristics, 301
  - 10.2.3 Estimation of Standard Errors of Estimates, 301
  - 10.2.4 Sampling Distribution of Estimates, 311
  - 10.2.5 How Large a Sample Do We Need? 314
  - 10.2.6 Choosing the Optimal Cluster Size  $\bar{n}$  Considering Costs, 317
- 10.3 Systematic Sampling as Cluster Sampling, 319
- 10.4 Summary, 320
- Exercises, 321
- Bibliography, 330

## **11. Cluster Sampling in Which Clusters Are Sampled with Unequal Probability: Probability Proportional to Size Sampling 331**

- 11.1 Motivation for *Not* Sampling Clusters with Equal Probability, 332
- 11.2 Two General Classes of Estimators Valid for Sample Designs in Which Units Are Selected with Unequal Probability, 336
  - 11.2.1 The Horvitz-Thompson Estimator, 336
  - 11.2.2 The Hansen-Hurwitz Estimator, 337
- 11.3 Probability Proportional to Size Sampling, 340
  - 11.3.1 Probability Proportional to Size Sampling with Replacement: Use of the Hansen-Hurwitz Estimator, 342
  - 11.3.2 PPS Sampling When the Measure of Size Variable Is not the Number of Enumeration Units, 350
  - 11.3.3 How to Take a PPS Sample with Replacement, 353
  - 11.3.4 Sequential Methods of PPS Sampling with Replacement—Chromy's Probability with Minimum Replacement (PMR) Method, 353
  - 11.3.5 How Large a Sample Is Needed for a Two-Stage Sample in Which Clusters Are Selected PPS with Replacement? 356

11.3.6 Telephone PPS Sampling: The Mitofsky-Waksberg Method of Random Digit Dialing, 359	
11.4 Further Comment on PPS Sampling, 361	
11.5 Summary, 361	
Exercises, 362	
Bibliography, 364	
<b>12. Variance Estimation in Complex Sample Surveys</b>	<b>367</b>
12.1 Linearization, 368	
12.2 Replication Methods, 373	
12.2.1 The Balanced Repeated Replication Method, 373	
12.2.2 Jackknife Estimation, 381	
12.2.3 Estimation of Interviewer Variability by Use of Replicated Sampling (Interpenetrating Samples), 384	
12.3 Summary, 386	
Exercises, 387	
Technical Appendix, 390	
Bibliography, 392	
<b>PART 3 SELECTED TOPICS IN SAMPLE SURVEY METHODOLOGY</b>	<b>395</b>
<b>13. Nonresponse and Missing Data in Sample Surveys</b>	<b>397</b>
13.1 Effect of Nonresponse on Accuracy of Estimates, 397	
13.2 Methods of Increasing the Response Rate in Sample Surveys, 399	
13.2.1 Increasing the Number of Households Contacted Successfully, 399	
13.2.2 Increasing the Completion Rate in Mail Questionnaires, 400	
13.2.3 Decreasing the Number of Refusals in Face-to-Face Telephone Interviews, 400	
13.2.4 Using Endorsements, 401	
13.3 Mail Surveys Combined with Interviews of Nonrespondents, 402	
13.3.1 Determination of Optimal Fraction of Initial Nonrespondents to Subsample for Intensive Effort, 403	
13.3.2 Determination of Sample Size Needed for a Two-Stage Mail Survey, 405	
13.4 Other Uses of Double (or Two-Phase) Sampling Methodology, 406	
13.5 Item Nonresponse: Methods of Imputation, 408	

13.5.1 Mechanisms by Which Missing Values Arise, 408	
13.5.2 Some Methods for Analyzing Data in the Presence of Missing Values, 411	
13.5.3 Some Imputation Methods, 412	
13.6 Multiple Imputation, 416	
13.7 Summary, 419	
Exercises, 419	
Bibliography, 425	
<b>14. Selected Topics in Sample Design and Estimation</b>	<b>427</b>
<b>Methodology</b>	
14.1 World Health Organization EPI Surveys: A Modification of PPS Sampling for Use in Developing Countries, 427	
14.2 Quality Assurance Sampling, 429	
14.3 Sample Sizes for Longitudinal Studies, 432	
14.3.1 Simple Random Sampling, 433	
14.3.2 Simple One-Stage Cluster Sampling, 434	
14.3.3 Cluster Sampling with More Than One Domain, 435	
14.4 Estimation of Prevalence of Diseases from Screening Studies, 436	
14.5 Estimation of Rare Events: Network Sampling, 440	
14.6 Estimation of Rare Events: Dual Samples, 444	
14.7 Estimation of Characteristics for Local Areas: Synthetic Estimation, 446	
14.8 Extraction of Sensitive Information: Randomized Response Techniques, 449	
14.9 Summary, 451	
Exercises, 451	
Bibliography, 452	
<b>15. Telephone Survey Sampling</b>	<b>455</b>
<i>Michael W. Link and Mansour Fahimi</i>	
15.1 Introduction, 455	
15.1.1 The Twentieth Century, 455	
15.1.2 The Twenty-First Century, 456	
15.2 History of Telephone Sampling in the United States, 456	
15.2.1 Early Design of Telephone Surveys, 457	
15.2.2 Random Digit Dialing, 457	
15.2.3 Mitofsky-Waksberg Sampling Method, 458	
15.2.4 List-Assisted Random Digit Dialing Methods, 458	
15.3 Within-Household Selection Techniques, 459	
15.3.1 Probability-Based Methods, 460	
15.3.2 Quasi-Probability Methods, 460	

- 15.3.3 Nonprobability Methods, 461
- 15.3.4 Minimally Intrusive Method, 461
- 15.4 Steps in the Telephone Survey Process, 461
  - 15.4.1 Computer-Assisted Telephone Interviewing, 462
  - 15.4.2 Quality Control in Telephone Surveys, 463
- 15.5 Drawing and Managing a Telephone Survey Sample, 463
  - 15.5.1 Drawing the Sample, 463
  - 15.5.2 Managing the Sample, 464
  - 15.5.3 Developing an Analysis File, 465
  - 15.5.4 Data Weighting and Adjustment, 466
- 15.6 Post-Survey Data Enhancement Procedures, 466
  - 15.6.1 Data Weighting, 466
  - 15.6.2 Steps in the Weighting Process, 466
  - 15.6.3 Compensation for Exclusion of Nontelephone Households, 474
- 15.7 Imputation of Missing Data, 476
- 15.8 Declining Coverage and Response Rates, 477
- 15.9 Addressing the Problems with Cell Phones, 478
  - 15.9.1 Research on Cell Phone Surveys, 479
  - 15.9.2 Sampling from the Cell Phone Frame, 479
- 15.10 Address-Based Sampling, 482
- Exercises, 483
- Bibliography, 483

## **16. Constructing the Survey Weights**

489

*Paul P. Biemer and Sharon L. Christ*

- 16.1 Introduction, 489
- 16.2 Objectives of Weighting, 492
  - 16.2.1 Basic Concepts, 492
  - 16.2.2 Weighting to Reduce Frame Bias, 494
  - 16.2.3 Weighting to Reduce Nonresponse Bias, 495
  - 16.2.4 Weighting to Reduce Sampling Variance, 496
- 16.3 Constructing the Sampling Weights, 498
  - 16.3.1 Base Weights, 499
  - 16.3.2 Nonresponse Adjustments, 501
  - 16.3.3 Frame Coverage Adjustments, 505
  - 16.3.4 Constructing the Final Weights, 510
- 16.4 Estimation and Analysis Issues, 511
  - 16.4.1 Effect of Weighting on the Variance, 511
  - 16.4.2 Using Weights in Analysis, 513
- 16.5 Summary, 514
- Bibliography, 515

<b>17 Strategies for Design-Based Analysis of Sample Survey Data</b>	<b>517</b>
17.1 Steps Required for Performing a Design-Based Analysis, 518	
17.2 Analysis Issues for “Typical” Sample Surveys, 528	
17.3 Summary, 535	
Technical Appendix, 535	
Bibliography, 536	
<b>Appendix</b>	<b>537</b>
<b>Answers to Selected Exercises</b>	<b>543</b>
<b>Index</b>	<b>571</b>
