

Contents

<i>Preface</i>	vii
1. Introduction: Science and Common Sense	1
2. Patterns of Scientific Explanation	15
<i>Illustrations of Scientific Explanation</i>	15
<i>Four Types of Explanation</i>	20
<i>Do the Sciences Explain?</i>	26
3. The Deductive Pattern of Explanation	29
<i>Explanations of Individual Events</i>	30
<i>Explanations of Laws</i>	33
<i>Generality in Explanations</i>	37
<i>Epistemic Requirements for Explanations</i>	42
4. The Logical Character of Scientific Laws	47
<i>Accidental and Nomic Universality</i>	49
<i>Are Laws Logically Necessary?</i>	52
<i>The Nature of Nomic Universality</i>	56
<i>Contrary-to-fact Universals</i>	68
<i>Causal Laws</i>	73
5. Experimental Laws and Theories	79
<i>Grounds for the Distinction</i>	81
<i>Three Major Components in Theories</i>	90
<i>Rules of Correspondence</i>	97
	xi

6. The Cognitive Status of Theories	106
<i>The Role of Analogy</i>	107
<i>The Descriptive View of Theories</i>	117
<i>The Instrumentalist View of Theories</i>	129
<i>The Realist View of Theories</i>	141
7. Mechanical Explanations and the Science of Mechanics	153
<i>What Is a Mechanical Explanation?</i>	153
<i>The Logical Status of the Science of Mechanics</i>	174
8. Space and Geometry	203
<i>The Newtonian Solution</i>	203
<i>Pure and Applied Geometry</i>	215
9. Geometry and Physics	234
<i>Alternative Geometries and Their Interrelations</i>	235
<i>The Choice of Geometry</i>	253
<i>Geometry and Relativity Theory</i>	267
10. Causality and Indeterminism in Physical Theory	277
<i>The Deterministic Structure of Classical Mechanics</i>	278
<i>Alternative Descriptions of Physical State</i>	285
<i>The Language of Quantum Mechanics</i>	293
<i>The Indeterminism of Quantum Theory</i>	305
<i>The Principle of Causality</i>	316
<i>Chance and Indeterminism</i>	324
11. The Reduction of Theories	336
<i>The Reduction of Thermodynamics to Statistical Mechanics</i>	338
<i>Formal Conditions for Reduction</i>	345
<i>Nonformal Conditions for Reduction</i>	358
<i>The Doctrine of Emergence</i>	366
<i>Wholes, Sums, and Organic Unities</i>	380

12. Mechanistic Explanation and Organismic Biology	398
<i>The Structure of Teleological Explanations</i>	401
<i>The Standpoint of Organismic Biology</i>	428
13. Methodological Problems of the Social Sciences	447
<i>Forms of Controlled Inquiry</i>	450
<i>Cultural Relativity and Social Laws</i>	459
<i>Knowledge of Social Phenomena as a Social Variable</i>	466
<i>The Subjective Nature of Social Subject Matter</i>	473
<i>The Value-Oriented Bias of Social Inquiry</i>	485
14. Explanation and Understanding in the Social Sciences	503
<i>Statistical Generalizations and Their Explanations</i>	503
<i>Functionalism in Social Science</i>	520
<i>Methodological Individualism and Interpretative Social Science</i>	535
15. Problems in the Logic of Historical Inquiry	547
<i>The Central Focus of Historical Study</i>	547
<i>Probabilistic and Genetic Explanations</i>	551
<i>Recurrent Issues in Historical Inquiry</i>	576
<i>Determinism in History</i>	592
<i>Index</i>	607
