reface	
1. Introduction: Science and Common Sense	1
2. Patterns of Scientific Explanation	15
Illustrations of Scientific Explanation	15
Four Types of Explanation	20
Do the Sciences Explain?	26
3. The Deductive Pattern of Explanation	29
Explanations of Individual Events	30
Explanations of Laws	33
Generality in Explanations	37
Epistemic Requirements for Explanations	42
4. The Logical Character of Scientific Laws	47
Accidental and Nomic Universality	49
Are Laws Logically Necessary?	52
The Nature of Nomic Universality	56
Contrary-to-fact Universals	68
Causal Laws	73
5. Experimental Laws and Theories	79
Grounds for the Distinction	81
Three Major Components in Theories	90
Rules of Correspondence	97
	xi

6.	The Cognitive Status of Theories	106
	The Role of Analogy	107
	The Descriptive View of Theories	117
	The Instrumentalist View of Theories	129
	The Realist View of Theories	141
7.	Mechanical Explanations and the Science	
	of Mechanics	153
	What Is a Mechanical Explanation?	153
	The Logical Status of the Science of Mechanics	174
8.	Space and Geometry	203
	The Newtonian Solution	203
	Pure and Applied Geometry	215
9.	Geometry and Physics	234
2.	Alternative Cermetries and Their Interrelations	235
	The Choice of Geometry	253
	Geometry and Relativity Theory	267
10.	Causality and Indeterminism in Physical	
	Theory	277
	The Deterministic Structure of Classical Mechanics	278
	Alternative Descriptions of Physical State	285
	The Language of Quantum Mechanics	293
	The Indeterminism of Quantum Theory	305
	The Principle of Causality	316
	Chance and Indeterminism	324
11.	The Reduction of Theories	336
	The Reduction of Thermodynamics to Statistical	
	Mechanics	338
	Formal Conditions for Reduction	345
	The Doctrine of Emergence	338 9 <i>00</i>
	Wholes Sums and Organic Unities	300 320
		000

	Contents	xiii
12.	Mechanistic Explanation and Organismic	
	Biology	398
	The Structure of Teleological Explanations	401
	The Standpoint of Organismic Biology	428
13.	Methodological Problems of the Social	
	Sciences	447
	Forms of Controlled Inquiru	450
	Cultural Relativity and Social Laws	459
	Knowledge of Social Phenomena as a Social Variable	466
	The Subjective Nature of Social Subject Matter	473
	The Value-Oriented Bias of Social Inquiry	485
14.	Explanation and Understanding in the	
	Social Sciences	503
	Statistical Generalizations and Their Explanations	503
	Functionalism in Social Science	520
	Methodological Individualism and Interpretative Social	
	Science	535
15.	Problems in the Logic of Historical Inquiry	547
	The Control Focus of Historical Study	517
	Probabilistic and Canatic Frylanations	551
	Recurrent Issues in Historical Inquiru	576
	Determinism in History	599
	2 ciclining in action y	002
