

CONTENTS

<i>Contributors</i>	<i>xi</i>
<i>Preface</i>	<i>xv</i>
<i>Volume in Series</i>	<i>xix</i>
1. Isolation of Intraflagellar Transport Particle Proteins from <i>Chlamydomonas reinhardtii</i>	1
Elizabeth Richey and Hongmin Qin	
1. Introduction	2
2. Media	4
3. Isolating Flagella	5
4. Preparing Soluble Flagellar Proteins	9
5. Isolating IFT Particle Proteins by Fractioning Soluble Flagellar Proteins Through Sucrose Density Gradient	9
6. Isolating IFT Particle Proteins by Immunoprecipitation from Soluble Flagellar Proteins	14
7. Conclusions	15
Acknowledgments	15
References	16
2. Molecular Tools for Studying the Radial Spoke	19
Xiaoyan Zhu, Yi Liu, Priyanka Sivadas, Anjali Gupta, and Pinfen Yang	
1. Introduction	20
2. Recovery of Genomic DNA	21
3. Slot Lysis Assay for Large-Scale Screenings	24
4. DNA Alterations	26
5. Tagging	28
6. Ni-NTA Affinity Purification of the Radial Spoke Complex	30
7. Flagella Miniprep	33
8. Summary	34
Acknowledgments	34
References	34
3. Methods for Analysis of Calcium/Calmodulin Signaling in Cilia and Flagella	37
Christen G. DiPetrillo and Elizabeth F. Smith	
1. Introduction	38

2. Calcium Entry into the Intraflagellar Space	38
3. Calcium-Binding Proteins	39
4. Calcium-Induced Modulation of Motility	46
5. Summary	52
References	53
4. Analysis of Flagellar Protein Ubiquitination	59
Huan Long and Kaiyao Huang	
1. Introduction	60
2. Summary of Putative Ubiquitin, Ubiquitin-Like Proteins, E1,E2, and E3 in Flagella/Cilia	61
3. Determination of the Flagellar Localization of Candidate Proteins with Fluorescence Proteins	66
4. Analysis of the Free Ubiquitin in Flagella	66
5. <i>In Vitro</i> Ubiquitination System of Flagella	67
6. Analysis of Flagellar Ubiquitination During Flagellar Shortening	68
7. Analysis of Flagellar Ubiquitination During Mating	71
8. Summary	71
Acknowledgment	72
References	72
5. Analysis of Ciliary Import	75
John F. Dishinger, H. Lynn Kee, and Kristen J. Verhey	
1. Introduction	76
2. General Considerations	76
3. Analysis of the Permeability Barrier to Ciliary Entry Using Microinjection	78
4. Analysis of Ciliary Import by Fluorescence Recovery After Photobleaching	82
Acknowledgments	87
References	87
6. Analysis of Signaling Pathways Controlling Flagellar Movements in Mammalian Spermatozoa	91
Fang Xie, Edward M. Eddy, and Marco Conti	
1. Introduction	92
2. Spermatozoa Preparations	93
3. Expression of sAC in a Heterologous System	95
4. Measurement of Soluble Adenylyl Cyclase Activity	96
5. Measurement of cAMP Accumulation in Spermatozoa	99
6. Isolation of Macromolecular Complexes Including sAC	100
7. Summary	102

Acknowledgment	102
References	102
7. Analysis of Microtubule Plus-End-Tracking Proteins in Cilia	105
Jesper Larsen, Ilya Grigoriev, Anna Akhmanova, and Lotte B. Pedersen	
1. Introduction	106
2. Detection of EB Proteins in Cilia by Fluorescence Microscopy	107
3. Functional Analysis of EB Proteins in Cultures of Ciliated Mammalian Cells	115
4. Identification of EB-Binding Partners in Cilia	117
5. Summary	119
Acknowledgments	120
References	120
8. Biochemical and Physiological Analysis of Axonemal Dyneins	123
Stephen M. King	
1. Introduction	124
2. Axonemal Dynein Subcomplexes from Cytoplasm	125
3. Localization of Axonemal Dynein Components in <i>Chlamydomonas</i> Flagella	130
4. Analysis of Dynein-Driven Motility in <i>Chlamydomonas</i>	138
5. Conclusions	143
Acknowledgment	143
References	143
9. Measuring the Regulation of Dynein Activity During Flagellar Motility	147
Chikako Shingyoji	
1. Introduction	148
2. Materials and Methods	149
3. Important Parameters in Beating Flagella	152
4. Microtubule Sliding Induced by Dynein	157
5. Dynein Activation by Mechanical Force of Bending	163
6. Outlook	166
Acknowledgments	166
References	167
10. Analysis of Interactions Between Intraflagellar Transport Proteins	171
Robert H. Behal and Douglas G. Cole	
1. Introduction	172
2. Isolation of IFT Complexes from Isolated Flagella	174

3. Isolation of IFT Complex A from Whole Cell Extracts	177
4. Architectural Analysis of IFT Complex B	181
5. Bacterially Based Interaction Analysis of IFT B Proteins	185
6. Yeast-Based Interaction Analysis of IFT A Proteins	188
7. Summary	190
Acknowledgments	191
References	191
11. Analysis of Ciliary Membrane Protein Dynamics Using SNAP Technology	195
John A. Follit and Gregory J. Pazour	
1. Introduction	195
2. Generation of SNAP-Tagged Ciliary Targeted Proteins	197
3. Pulse-Chase Analysis of the Trafficking of Fibrocystin-SNAP to the Cilium	198
4. Example Protocol	201
5. Future Prospects	203
Acknowledgment	203
References	203
12. Engineering Oscillating Microtubule Bundles	205
Timothy Sanchez and Zvonimir Dogic	
1. Introduction	206
2. Purification and Preparation of Proteins	208
3. Depletion-Driven Bundling of MTs	212
4. Glass Surface Treatment, Acrylamide Coating, and Flow Cell Construction	214
5. Active MT Bundle Samples	216
6. Protocol Qualifications and Outlook	222
Acknowledgments	223
References	223
13. Purification of Exosome-Like Vesicles from Urine	225
Christopher Y. Chen, Marie C. Hogan, and Christopher J. Ward	
1. Introduction	226
2. Materials	229
3. Collecting Crude ELVs	230
4. Removing the Tamm-Horsfall Protein	233
5. Fractionation	235
6. Downstream Processing	238
7. Conclusions	238
References	239

14. Electron Microscopy of Flagella, Primary Cilia, and Intraflagellar Transport in Flat-Embedded Cells	243
Michaela Rogowski, Dirk Scholz, and Stefan Geimer	
1. Introduction	244
2. Preparing <i>Chlamydomonas reinhardtii</i> and Monolayers of Mammalian Culture Cells for Flat Embedding	247
3. Dehydration, Infiltration, and Flat Embedding	249
4. Preparation of Blocks and Ultramicrotomy	252
5. Summary	254
Acknowledgments	260
References	261
15. <i>In vivo</i> Imaging of IFT in <i>Chlamydomonas</i> Flagella	265
Karl F. Lehtreck	
1. Introduction	266
2. Sample Preparation	268
3. Visualizing IFT by DIC	271
4. Visualizing IFT by TIRFM	272
5. Analysis of IFT Using Kymograms	278
6. Open Questions and Future Directions	280
7. Useful Links	281
8. Summary	282
Acknowledgements	282
References	282
16. Measuring Rates of Intraflagellar Transport Along <i>Caenorhabditis elegans</i> Sensory Cilia Using Fluorescence Microscopy	285
Ingrid Brust-Mascher, Guangshuo Ou, and Jonathan M. Scholey	
1. Introduction	286
2. Preparation of Living Transgenic <i>C. elegans</i> Expressing Fluorescent IFT Proteins	287
3. Direct Tracking of IFT Proteins Using Spinning Disc Confocal Microscopy and Kymography	292
4. Indirect Estimation of the Rates of IFT using Fluorescence Recovery After Photobleaching and Mathematical Modeling	295
5. Summary	300
Acknowledgments	302
References	302

17. 3D Structural Analysis of Flagella/Cilia by Cryo-Electron Tomography	305
Khanh Huy Bui and Takashi Ishikawa	
1. Introduction	306
2. Purification of Flagella	307
3. Preparation of Specimens for Cryo-ET	307
4. Cryo-Electron Microscopy and Data Acquisition	308
5. Tomogram Reconstruction	309
6. Subtomogram Averaging	310
7. Classification	318
8. Studying the Interaction of the Flagellar Component	319
9. Outlook	321
References	322
18. Electron Tomography of IFT Particles	325
Gaia Pigino, Francesca Cantele, Elisa Vannuccini, Salvatore Lanzavecchia, Eugenio Paccagnini, and Pietro Lupetti	
1. Introduction	326
2. Overview of Electron Tomography	328
3. Sample Preparation	329
4. Tomography Data Collection	331
5. Tomographic Reconstruction	332
Acknowledgments	340
References	340
19. Reconstitution of Flagellar Sliding	341
Joshua Alper, Veikko Geyer, Vikram Mukundan, and Jonathon Howard	
1. Introduction	344
2. Culturing <i>Chlamydomonas</i> Cells	344
3. Purifications	350
4. Reconstitution Assays	357
5. Summary	368
References	368
<i>Author Index</i>	371
<i>Subject Index</i>	389
