TABLES	7
INTRODUCTION	9
1 - GEOLOGY AND GEOMORPHOLOGY	11
1.1 - Geomorphology	11
1.2 - Geology	11
1.3 - Excavation	12
1.4 - Stratigraphy	16
1.4.1 - Profile description	16
1.4.2 - Cobble and gravel distribution	22
1.4.3 - Vertical artefact distribution	22
1.4.4 - Interpretation of the stratigraphy	25
2 - STRUCTURES	27
2.1 - Distribution of the artefact concentrations	27
2.2 - Correlation between organic and lithic material	27
2.3 - Other structures	36
3 - DEBITAGE	37
3.1 - Raw material availability	37
3.2 - Flint quality	37
3.3 - Flint types	38
3.4 - Nodule morphology	40
3.5 - Debitage products	40
3.6 - Productivity	49
4 - TOOLS	51
5 - REFITTING	63
6 - FUNCTIONAL ANALYSIS OF THE LITHICS by Veerle Rots	81
7 - DISCUSSION	83
7.1 - Stratigraphical position of Ahrensburgian sites	83
7.2 - Homogeneity of the sector assemblages	83
7.3 - The Ahrensburgian of the Low Countries	85
7.4 - The Ahrensburgian chronology	86
7.5 - Internal site organisation	86
7.6 - Zonhoven-Molenheide in a regional context	88
7.7 - The landscape at the occupation time	89
7.8 - Economic basis of the site	89
8 - CONCLUSIONS	91
9 - REFERENCES	93
