

CONTENTS

<i>Contributors</i>	<i>xi</i>
<i>Preface</i>	<i>xvii</i>
<i>Volume in Series</i>	<i>xxi</i>
1. Non-Motile Primary Cilia as Fluid-Shear Stress Mechanosensors	1
Surya M. Nauli, Xingjian Jin, Wissam A. AbouAlaiwi, Wassim El-Jouni, Xuefeng Su, and Jing Zhou	
1. Introduction	2
2. Identification of Primary Cilium	3
3. Mechanosensory Cilia	6
4. Summary	17
Acknowledgments	17
References	17
2. Biomechanical Measurement of Kinocilium	21
Corrie Spoon and Wally Grant	
1. Introduction	22
2. Sample Preparation and Measurement	30
3. Determining Mechanical Properties from Experimental Measurements	34
4. Method Discussion	38
Acknowledgments	41
References	41
3. Analysis of Primary Cilia in Directional Cell Migration in Fibroblasts	45
Søren T. Christensen, Iben R. Veland, Albrecht Schwab, Michael Cammer, and Peter Satir	
1. Introduction	46
2. Localization of Primary Cilia by Immunofluorescence Microscopy	47
3. Cell Migration and Orientation of Primary Cilia in Scratch Assays	50
4. Cell Migration and Ciliary Signaling in Micropipette Assays	53
5. Summary	57
Acknowledgments	57
References	57

4. Sperm Patch-Clamp	59
Polina Lishko, David E. Clapham, Betsy Navarro, and Yuriy Kirichok	
1. Introduction	60
2. Equipment	65
3. Isolation of Spermatozoa for Patch-Clamp Experiments	67
4. Patch-Clamp Recording	71
5. Potential Pitfalls Associated with Sperm Patch Clamp	79
6. Conclusions	81
Acknowledgments	81
References	81
5. Laser Trap Measurements of Flagellar Membrane Motility	85
William H. Guilford and Robert A. Bloodgood	
1. Introduction	86
2. Laser Trap Overview	88
3. Measuring Flagellar Membrane Transport	91
Acknowledgments	105
References	105
6. Probing Ciliogenesis Using Micropatterned Substrates	109
Amandine Pitaval, Andreas Christ, Alexis Curtet, Qingzong Tseng, and Manuel Théry	
1. Introduction	110
2. Micropatterned Substrates Fabrication	112
3. Cells Plating on Micropatterned Slides	119
4. Cell Fixation and Immunofluorescence	122
5. Automated Image Acquisition	124
6. Automated Image Analysis	125
Acknowledgments	129
References	129
7. Fluorescent Imaging of <i>Drosophila melanogaster</i> Sperm in the Reproductive Tract: A New Model of Flagellar Motility	131
Xiangyi Lu	
1. Introduction	132
2. Imaging the Fly Sperm	140
3. The Fly Sperm as a Model for Studying Flagellar Motility	146

Acknowledgments	147
References	147
8. Visualization of Mouse Nodal Cilia and Nodal Flow	149
Shigenori Nonaka	
1. Introduction and Historical Overview	149
2. Tools and Solutions	151
3. Dissection Procedures	152
4. Observation by Light Microscopy	154
5. Discussion	156
References	156
9. Dissecting the Functional Interplay Between the TOR Pathway and the Cilium in Zebrafish	159
Shiaulou Yuan, Lu Zhao, and Zhaoxia Sun	
1. Introduction	160
2. Manipulation of the TOR Pathway in Zebrafish	161
3. Analysis of Cilia Length in Zebrafish	167
4. Cilia Motility and Fluid Flow Dynamics in the KV	174
5. Assessing for Laterality Defects in Zebrafish	181
6. Utilizing <i>Chlamydomonas</i> to Assay for TOR-Mediated Cilia Length Control	181
7. Summary	187
Acknowledgments	188
References	188
10. Using <i>Xenopus</i> Skin to Study Cilia Development and Function	191
Michael E. Werner and Brian J. Mitchell	
1. Introduction	192
2. Molecular Manipulation of <i>Xenopus</i> Ciliated Epithelia	192
3. Visualization of Cilia in <i>Xenopus</i> Embryos	199
4. Embryological Manipulations Useful for the Analysis of Ciliated Epithelia	207
5. Conclusion	215
Acknowledgments	215
References	215
11. Zebrafish Cilia	219
Iain Drummond and Christina Austin-Tse	
1. Introduction	220
2. Molecular Approaches to Ciliogenesis in Zebrafish	221

3. Wholmount Confocal Imaging of Zebrafish Cilia	231
4. Electron Microscopy Methods for Fish Cilia	237
5. Live Imaging of Zebrafish Cilia Using <i>arl13b:GFP</i> Expression	239
6. Summary	240
Acknowledgments	241
References	241
12. Analysis of Ciliary Assembly and Function in Planaria	245
Panteleimon Rompolas, Juliette Azimzadeh, Wallace F. Marshall, and Stephen M. King	
1. Introduction	246
2. Maintaining Planarians in the Lab	247
3. Genetic Manipulation of Planaria	250
4. Imaging Planarian Cilia	254
5. Planaria Gliding and Ciliary Motility Assays	259
6. Summary	262
References	263
13. Discovery and Functional Evaluation of Ciliary Proteins in <i>Tetrahymena thermophila</i>	265
Jacek Gaertig, Dorota Wloga, Krishna Kumar Vasudevan, Mayukh Guha, and William Dentler	
1. Introduction	266
2. Cell Culture	267
3. Deciliation, Purification, and Fractionation of Cilia	269
4. Localization of Proteins in <i>Tetrahymena</i>	273
5. Phenotypic Studies on Live Ciliary Mutants	280
6. Summary	282
Acknowledgments	282
References	282
14. Analysis of Ciliogenesis in Primary Culture Mouse Tracheal Epithelial Cells	285
Eszter K. Vladar and Steven L. Brody	
1. Introduction	286
2. Generation of MTEC Cultures	287
3. Staging Ciliogenesis in MTEC Preparations	296
4. Assessment of Ciliogenesis and MCCs by Transmission Electron Microscopy	300
5. Gene Transfer, Drug Treatment, and FACS of MTEC Preparations	303

6. Summary	308
Acknowledgments	308
References	308
15. Isolation of Mammalian Primary Cilia	311
Hiroaki Ishikawa and Wallace F. Marshall	
1. Introduction	312
2. Cell Culture	314
3. Isolation of Mammalian Primary Cilia	316
4. Protein Correlation Profiling	319
5. Immunofluorescence Microscopy of Primary Cilia	320
6. Summary	322
Acknowledgments	323
References	323
16. Finding Ciliary Genes: A Computational Approach	327
Johan Henriksson, Brian P. Piasecki, Kristina Lend, Thomas R. Bürglin, and Peter Swoboda	
1. Introduction	328
2. Choice of Bioinformatics Software	331
3. Retrieving Genome (Sequence) Data	332
4. Finding Orthologous Genes	333
5. Searching Sequences for Regulatory Elements	336
6. Scoring Candidate Genes	339
7. Summary and Discussion	345
Acknowledgments	347
References	347
17. Chemical Screening Methods for Flagellar Phenotypes in <i>Chlamydomonas</i>	351
Prachee Avasthi and Wallace F. Marshall	
1. Introduction	352
2. Screen Design Considerations	353
3. Flagellar Length Assay	356
4. Deflagellation Assay	357
5. Motility Assay	358
6. Nonflagellar Phenotypes	359
7. Data Analysis	362
8. Target Validation and Identification	366

9. Summary	367
Acknowledgments	368
References	368
18. Centrosome Isolation and Analysis by Mass Spectrometry-Based Proteomics	371
Lis Jakobsen, Jacob Morville Schrøder, Katja M. Larsen, Emma Lundberg, and Jens S. Andersen	
1. Introduction	372
2. Centrosome Isolation	374
3. Centrosome Protein Identification	380
4. Probing Centrosome Protein Properties by Quantitative Proteomics	386
5. Summary	390
Acknowledgments	390
References	391
<i>Author Index</i>	395
<i>Subject Index</i>	413
