Foreword *v*

Preface to the fifth edition *vii*

Acknowledgements *xiii*

List of contributors *xv*

List of abbreviations *xix*

Introduction

**Introduction and classification
of autonomic disorders** *3*

Roger Bannister and Christopher J. Mathias

**Historical perspectives on the
autonomic nervous system** *10*

Tilli Tansey

PART I

Scientific Aspects of Structure and Function

**1. Neurobiology of the autonomic
nervous system** *21*

Wilfrid Jänig and Elspeth M. McLachlan

**2. Central nervous control of the
cardiovascular system** *35*

J.F.R. Paton and K.M. Spyer

**3. Neurotransmitters and neuromodulators
in the central nervous system and
cardiovascular regulation** *52*

Eduardo E. Benarroch

4. Adrenergic and cholinergic receptors *65*

Mike Schachter and P.A. van Zwieten

**5. Structural and chemical organization
of the autonomic nervous system with
special reference to non-adrenergic,
non-cholinergic transmission** *72*

Geoffrey Burnstock

6. Autonomic surgical neuroanatomy *83*

Sanjay Purkayastha, J. Anthony Firth
and Ara W. Darzi

**7. Autonomic and neurohumoral control
of the cerebral circulation** *90*

Michael A. Moskowitz, Melanie C.
Sharp and Robert Macfarlane

**8. Vestibular system influences on
respiratory muscle activity and
cardiovascular functions** *97*

Bill J. Yates and Adolfo M. Bronstein

9. Neural control of the urinary bladder *108*

William C. de Groat

**10. The autonomic neuroscience
of sexual function** *119*

Kevin E. McKenna

**11. Molecular genetics and the
autonomic nervous system** *132*

Stephen J. Peroutka

PART II

Physiology and Pathophysiology Relevant to Autonomic Failure

**12. Functional neuroimaging of
autonomic control** *143*

Hugo D. Critchley and Christopher J. Mathias

- 13. Autoregulation and autonomic control of the cerebral circulation: implications and pathophysiology** 169
Peter J. Goadsby
- 14. Autonomic control of the airways** 175
Peter J. Barnes
- 15. Autonomic function at high altitudes** 184
Mark Drinkhill, Maria Rivera-Ch and Roger Hainsworth
- 16. The gut and the autonomic nervous system** 194
Anne E. Bishop and Julia M. Polak
- 17. Nausea, vomiting, and the autonomic nervous system** 205
Paul L.R. Andrews
- 18. The influence of the autonomic nervous system on metabolic function** 220
Ian A. Macdonald
- 19. The kidney and the sympathetic nervous system** 229
Edward J. Johns
- 20. Pain and the sympathetic nervous system: pathophysiological mechanisms** 236
Wilfrid Jänig
- 21. Temperature regulation and the autonomic nervous system** 247
Kenneth J. Collins
- PART III
Clinical Autonomic Testing**
- 22. Investigation of autonomic disorders** 259
Christopher J. Mathias, David A. Low, Valeria Iodice and Roger Bannister
- 23. Measurement of heart rate and blood pressure to evaluate disturbances in neurocardiovascular control** 290
Wouter Wieling and John M. Karemaker
- 24. Computer analysis of blood pressure and heart rate variability in subjects with normal and abnormal autonomic cardiovascular control** 307
G. Parati, M. Di Rienzo, P. Castiglioni and G. Mancia
- 25. Intraneural recordings of normal and abnormal sympathetic activity in humans** 323
B. Gunnar Wallin
- 26. Biochemical investigation of autonomic function—measurement of catecholamines and metabolites, and the use of spillover and allied techniques to determine regional sympathetic activation** 332
Murray Esler and Gavin Lambert
- 27. Autonomic function and the gastrointestinal tract** 344
D.G. Thompson and D.L. Wingate
- 28. Postprandial hypotension in autonomic disorders** 354
Christopher J. Mathias and Karen Jones
- 29. Cardiovascular effects of water ingestion in autonomic failure** 371
Timothy M. Young and Christopher J. Mathias
- 30. Exercise-induced hypotension in autonomic disorders** 381
Antonio Claudio Lucas da Nóbrega, David A. Low and Christopher J. Mathias
- 31. Evaluation of sudomotor function** 395
Phillip A. Low and Robert D. Fealey
- 32. Treatment of hyperhidrosis** 404
Markus Naumann and Christopher J. Mathias
- 33. Assessment of sleep disturbances in autonomic failure** 410
Sudhansu Chokroverty
- 34. Vestibular and autonomic interaction** 424
Linda Luxon and Waheeda Pagarkar
- 35. Epilepsy and the overlap with autonomic disorders** 435
John S. Duncan and Helen J. Cross
- 36. Pupil abnormality in autonomic disorders** 445
F.D. Bremner and S.E. Smith
- 37. Investigation and treatment of bladder dysfunction in diseases affecting the autonomic nervous system** 454
Soumendran N. Datta and Clare J. Fowler
- 38. Investigation and treatment of sexual dysfunction in autonomic diseases** 463
Stacy Elliott

PART IV**Primary Autonomic Failure: Clinical and Pathological Studies in Pure Autonomic Failure, Multiple System Atrophy, and Parkinson's disease**

39. **Clinical features and evaluation of the primary chronic autonomic failure syndromes** 485
Roger Bannister, Valeria Iodice, Ekawat Vichayanrat and Christopher J. Mathias
40. **Neuroimaging in autonomic failure syndromes** 498
David J. Brooks
41. **Neuropathology of multiple system atrophy** 504
Janice L. Holton and Tamas Revesz
42. **Autonomic ganglia and preganglionic neurons in autonomic failure** 512
Margaret R. Matthews
43. **Experimental models to define multiple system atrophy and autonomic failure** 523
Nadia Stefanova and Gregor K. Wenning
44. **Development of Parkinson's disease-related pathology in the enteric and central nervous systems** 531
Heiko Braak and Kelly Del Tredici-Braak
45. **Parkinson's disease and autonomic failure** 548
Pietro Cortelli and Christopher J. Mathias
46. **Treatment of the motor disorders of multiple system atrophy** 563
Uday Muthane and Andrew J. Lees
47. **Treatment of orthostatic hypotension** 569
Christopher J. Mathias, Valeria Iodice, David A. Low and Roger Bannister

PART V**Peripheral Autonomic Neuropathies**

48. **Familial dysautonomia** 587
Felicia B. Axelrod
49. **Dopamine-beta-hydroxylase deficiency—with a note on other genetically determined causes of autonomic failure** 597
Christopher J. Mathias and Roger Bannister
50. **Hereditary amyloid neuropathy** 613
Sinéad M. Murphy and Mary M. Reilly

51. **Autonomic dysfunction in peripheral nerve disease** 627
Michael Donaghy
52. **Autoimmune and paraneoplastic autonomic neuropathies** 636
Steven Vernino and Angela Vincent
53. **Autonomic failure in diabetes** 646
Michael Edmonds

PART VI**Other Disorders Associated with Autonomic Dysfunction**

54. **Introduction to neurocardiology** 669
Martin A. Samuels
55. **Transient loss of consciousness** 677
J. Gert van Dijk
56. **Syncope and fainting: classification and pathophysiological basis** 690
Roger Hainsworth and Victoria E. Claydon
57. **Cardiac causes of syncope** 701
Abhay Bajpai and A. John Camm
58. **Paediatric aspects of neurally (autonomic) mediated syncope** 714
John B.P. Stephenson
59. **Syncope in the elderly** 722
Rose Anne Kenny and Blair Grubb
60. **Situational syncope** 730
C.T. Paul Krediet and Wouter Wieling
61. **Postural orthostatic tachycardia syndrome** 747
Phillip A. Low
62. **Circulatory shock** 754
Niels H. Secher and Johannes J. Van Lieshout
63. **Cardiac failure and the autonomic nervous system** 761
Gary S. Francis and Jay N. Cohn
64. **Phaeochromocytoma: a clinical chameleon** 770
Graeme Eisenhofer, Jacques W.M. Lenders, William M. Manger and Karel Pacak
65. **Sympathetic neural mechanisms in hypertension** 786
Krzysztof Narkiewicz and Virend K. Somers

- 66. Autonomic disturbances in spinal cord lesions** 797
Christopher J. Mathias, David A. Low and Hans L. Frankel
- 67. Autonomic disorders affecting cutaneous blood flow** 818
Peter D. Drummond
- 68. Autonomic aspects of migraine: pathophysiology and treatment** 829
Lars Lykke Thomsen and Jes Olesen
- 69. Mechanisms underlying complex regional pain syndrome** 835
Ralf Baron and Wilfrid Jänig
- 70. Ageing and the autonomic nervous system** 847
Lewis A. Lipsitz and Vera Novak
- 71. Drugs, chemicals, and toxins that alter autonomic function** 860
Anne L. Tonkin and Derek B. Frewin
- 72. Surgery and the autonomic nervous system** 868
Omer Aziz, Marios Nicolaou and Ara W. Darzi
- Index** 879
