

Contents

Preface	ix
Introduction	xi
About the Authors	xvii
CHAPTER 1	
The Economic Environment	1
1.1 Introduction	1
1.2 Inflation and Unemployment	5
1.3 Central Banks and the Money Supply	6
1.4 The Business Cycle	9
1.5 Predicting the Future?	11
1.6 Economic Indicators	11
CHAPTER 2	
Risk: An Introduction	17
2.1 What Is Risk?	17
2.2 Risks of Financial Instruments	19
2.3 Operational Risk	43
2.4 What Risks Are in Your Portfolio? Hidden Hazards	44
2.5 Hedging Market Risks	47
CHAPTER 3	
Asset Modeling	51
3.1 Asset Value	51
3.2 Financial Models	55
3.3 Valuation Principles	70
3.4 Discount Rates Selection	74
3.5 Cash Flow Projection and Asset Valuation	80
3.6 Stochastic Asset Valuation	82
3.7 The Monte Carlo Method	88
3.8 Stochastic Extrapolation	100

CHAPTER 4

Market Exposures and Factor Sensitivities	103
4.1 From Valuation to Responses and Sensitivities	103
4.2 Response Matrix and Scenario Grid	105
4.3 Stress-Testing	109
4.4 Sensitivities	110
4.5 Interest Rate Sensitivities: Duration, PV01, Convexity, Key Rate Measures	126
4.6 Numerical Evaluation of Sensitivities	137
4.7 Performance Attribution and Completeness Test	139

CHAPTER 5

Quantifying Portfolio Risks	145
5.1 The Nature of Risk	145
5.2 Standard Risk Measures	149
5.3 Optimal Hedge Sizing	160
5.4 Tail-Risk Measures	162

CHAPTER 6

The Decision to Hedge	171
6.1 To Hedge or Not to Hedge?	171
6.2 The Hedging Process	178

CHAPTER 7

Constructing a Hedge	193
7.1 An Ideal Hedge	193
7.2 A Sample Hedge	194
7.3 Static and Dynamic Hedging	200
7.4 Proxy Hedging	205
7.5 Protection versus Upside	208
7.6 Basis Risk	211
7.7 Unintended Consequences	213
7.8 Hedging Credit Risk	214
7.9 Hedging Prepayment, Redemption, and Other Human Behavior Risks	221
7.10 Execution	223

APPENDIX A

Basics of Probability Theory	227
-------------------------------------	------------

APPENDIX B	
Elements of Statistics and Time Series Analysis	247
References	255
Glossary	259
Index	281
