

Contents

Part I Setting the Scene

- 1 **Sustainable Bioenergy Production: An Integrated Perspective** 3
Hans Ruppert, Martin Kappas, and Jens Ibendorf
- 2 **Bioenergy Villages in Germany: Applying the Göttingen
Approach of Sustainability Science to Promote Sustainable
Bioenergy Projects** 37
Peter Schmuck, Swantje Eigner-Thiel, Marianne Karpenstein-Machan,
Benedikt Sauer, Hans Ruppert, Walter Girschner, and Folker Roland

Part II Do We Have Enough? – Biomass Potentials for Energy Generation

- 3 **Estimation of Global Bioenergy Potentials
and Their Contribution to the World’s Future
Energy Demand – A Short Review** 75
Martin Kappas
- 4 **A Process-Based Vegetation Model for Estimating
Agricultural Bioenergy Potentials** 97
Markus Tum, Kurt P. Günther, and Martin Kappas
- 5 **Modelling Site-Specific Biomass Potentials** 111
Roland Bauböck

Part III Can Bioenergy Production Be Environmentally Sound?

- 6 **Integrative Energy Crop Cultivation as a Way to a More
Nature-Orientated Agriculture** 143
Marianne Karpenstein-Machan

7	Scale-Relevant Impacts of Biogas Crop Production: A Methodology to Assess Environmental Impacts and Farm Management Capacities	181
	Wiebke Saathoff, Christina von Haaren, and Michael Rodé	
Part IV Economic Optimisation of Bioenergy Production		
8	Optimising Bioenergy Villages' Local Heat Supply Networks	219
	Anke Daub, Harald Uhlemair, Volker Ruwisch, and Jutta Geldermann	
Part V Bridging Bioenergy Production and Society		
9	Growth of Biogas Production in German Agriculture: An Analysis of Farmers' Investment Behaviour	241
	Karol Granoszewski, Christian Reise, Achim Spiller, and Oliver Musshoff	
10	Social Acceptance of Bioenergy Use and the Success Factors of Communal Bioenergy Projects	293
	André Wüste and Peter Schmuck	
11	Applying the Sustainability Science Principles of the Göttingen Approach to Initiate Renewable Energy Solutions in Three German Districts	319
	Peter Schmuck, Marianne Karpenstein-Machan, and André Wüste	
12	Assessment of Different Bioenergy Concepts in Terms of Sustainable Development	339
	Swantje Eigner-Thiel, Meike Schmehl, Jens Ibendorf, and Jutta Geldermann	
Part VI Combustion of Biomass for Heat and Power		
13	Emissions of Organic and Inorganic Pollutants During the Combustion of Wood, Straw and Biogas	387
	Torben Seidel, Jürgen Orasche, Hans Ruppert, Jürgen Schnelle-Kreis, and Hans Hartmann	
Part VII Bioenergy from Polluted Soils		
14	Bioenergy Production as an Option for Polluted Soils – A Non-phytoremediation Approach	425
	Benedikt Sauer and Hans Ruppert	
	Index	445
