

Contents

1 Preface	1
2 Signaling via Competing Products	9
2.1 Introduction	9
2.2 The Model	13
2.3 Signaling Possibilities and Optimal Selling Policies	15
2.3.1 Symmetric Information about Quality	16
2.3.2 Maximal Asymmetric Information	20
2.3.3 Selling Strategies with Partially Informed Consumers	20
2.4 Strategic Competition and Welfare Considerations	30
2.5 Conclusion	36
2.6 Appendix	39
2.6.1 Summary Results	39
2.6.2 Example Calculations	39
2.6.3 Proofs	42
3 Bilateral Search and Horizontal Heterogeneity	54
3.1 Introduction	54
3.2 The Model	57
3.3 Optimal Search Policies	60

3.3.1	No Vertical Heterogeneity	60
3.3.2	Introducing Vertical Heterogeneity (“Two circles”)	65
3.3.3	Comparative Statics	76
3.4	An Example	79
3.5	Extensions and Discussion	83
3.5.1	More than Two Types of Income	83
3.5.2	Different Distribution for Taste-Related Payoff	86
3.6	Conclusion	87
3.7	Appendix	89
4	Two-Sided Certification	95
4.1	Introduction	95
4.2	The Setup	98
4.3	Optimal Behavior of a Monopolistic Certifier	100
4.3.1	The Market without the Certifier	100
4.3.2	One-Sided Certification	102
4.3.3	Comparison of One-Sided Certification	109
4.3.4	Two-Sided Certification	111
4.3.5	Exclusive-Buyer Certification	118
4.4	Application to the Rating Market	120
4.5	Conclusion	123
4.6	Appendix	126
4.6.1	Summary Results	126
4.6.2	Proofs	127
