## Part I Brain Spin Dynamics and the Multi-Quantum Magnetic Resonance Imaging

<b>1</b>	<b>Introduction</b> . . . . .	3
1.1	The Science of the Macroscopic World Around US . . . . .	3
1.2	The Internal Science of the Microscopic Brain . . . . .	4
1.3	The Nature's Invisible Science of Magnetic Order in the Brain. . . . .	6
1.4	The Familiar Gravitational Spinning Top and the Not so Familiar Atomic Magnetic Spinning Top. . . . .	8
1.4.1	The Gravitational Spinning Top (GST, The Gyro). . . . .	8
1.4.2	The Atomic Precessing Top: Case of Single Electron Orbiting Around Nucleus in an Atom . . . . .	10
1.4.3	Multi Electron Orbital Energy Levels in an Atom and Multi-Electron Interactions Within an Atom . . . . .	14
1.4.4	The Nuclear (Protons and Neutrons) Angular Momentum, the Nuclear Magnetic Moment and Interactions with the Atomic Ones . . . . .	21
1.4.5	The Precession of the Magnetic Moment $\mu$ of a Single Electron in an Atom, in an Externally Applied Magnetic Field . . . . .	23
1.4.6	The Conventional MRI: Echo Planar Imaging . . . . .	25
	References . . . . .	29
<b>2</b>	<b>Simplistic Theory of the Functions of the Ensemble of the Electrons, Atoms, Molecules, Nuclei, in the Brain</b> . . . . .	31
2.1	Simple Macroscopic Brain Model. . . . .	31
2.2	The Relationship Between the Angular Momentum L of the Orbiting Electron Around the Nucleus and the Associated Magnetic Moment $\mu_L$ . . . . .	34

2.2.1	The Induced Electrical Signals Created by the Incident RF Radiation . . . . .	34
2.2.2	The Magnitude and the Quantum Nature of the Atomic Magnetic Moment . . . . .	35
2.3	The Multi-Particle Angular Momentum Has a Resultant Due to the Internal Nuclear Magnetic Field of $\sim 1$ Tesla. . . . .	39
2.4	Application of an External Static Magnetic Field $H_z$ Along the Z-direction Suppresses the Random Internal Magnetic Order . . . . .	41
2.5	Effect of the Application of a Magnetic Field Gradient: Illustration of the Effect on a Single Spin (Orbiting Electron in an Atom). . . . .	43
2.6	The Quantum Model of the Brain. . . . .	44
2.7	Quantum Magnetic Resonance Imaging in Brain . . . . .	46
2.8	How QMRI Can Be Produced . . . . .	48
2.8.1	A Rough Radiation Dispersive Medium Model of the Brain . . . . .	48
2.8.2	A Pulse Sequence Used to Explore Quantum Model of the Brain . . . . .	54
<b>3</b>	<b>Practical Illustrations</b> . . . . .	<b>55</b>
3.1	Conventional MRI Techniques . . . . .	55
3.1.1	$T_1$ and $T_2$ Weighted Images: Wilson Disease . . . . .	55
3.1.2	J-Resolved 2D-Spectroscopy Imaging: Metabolite Concentrations . . . . .	56
3.1.3	Huntington’s Disease: 3 T (Tesla) MRI ( $T_1$ and $T_2$ Protocols) . . . . .	57
3.1.4	Sodium Long Component. . . . .	59
3.1.5	Water Diffusion in Human White Matter: Ischemic Stroke . . . . .	60
3.1.6	Neuromelanin in the Substantia Nigra Pars Compacta (SNc) and Locus Coeruleus (LC)-MRI-3D Gradient Echo: Magnetization Transfer Contrast (MTC) . . . . .	64
3.1.7	Metabolite Proton Mapping, Advanced Model: Neurologic Diseases . . . . .	65
3.1.8	J-Resolved Proton MRS Spectra, Neuro-Biological and Neuro-Psychiatric Disorders, Amino Acids: Glutamate (Glu) and Glutamine (Gln) . . . . .	65
3.2	Quantum Techniques. . . . .	67
3.2.1	Intermolecular Double-Quantum Coherence Imaging (iDQCI) in Human Brain. . . . .	67
3.2.2	Quantum Functional MRI (Q-fMRI): Intermolecular Multi-Quantum Coherence Imaging (iMQC). . . . .	69

3.2.3	Triple Quantum Sodium MRI: Non-Human Primate Focal Brain Ischemia . . . . .	71
3.2.4	Selective Multiple Quantum Coherence (Sel-MQC) Technique: Fadu Tumor Located on the Leg of the Mouse . . . . .	72
	References . . . . .	74
<b>4</b>	<b>Quantum Spin Dynamics and the MRI . . . . .</b>	<b>75</b>
4.1	The Basics . . . . .	75
4.2	Multi-Dimensional Spin Space and the MRI . . . . .	77
4.3	Complimentary Nature of MRI and Quantum Computer (QCr) . . . . .	79
4.4	Multiple Quantum Coherences and Imaging . . . . .	81
4.5	The Matrix Concept: The Imaging of the Brain . . . . .	82
4.5.1	The Single Spin-Identical Spins Ensemble: Fundamental Spin Representation . . . . .	82
4.5.2	Quantification of Image Intensity and Contrast: The Spin Matrices . . . . .	83
	Reference . . . . .	85
<b>5</b>	<b>The Density Matrix Concept . . . . .</b>	<b>87</b>
5.1	The Single Spin (Identical Spins Ensemble) . . . . .	87
5.2	Two Spin System: The Density Matrix . . . . .	90
<b>6</b>	<b>The Imaging . . . . .</b>	<b>93</b>
6.1	$T_1$ and $T_2$ Weighted Images . . . . .	93
6.2	The $k$ (Wave Number)-Space Imaging . . . . .	94
6.3	Collection of Data in $k$ -Space and Transforming it to Obtain Image in Real ( $x, y, z$ ) Space . . . . .	96
	Reference . . . . .	97
<b>7</b>	<b>Future Horizons of the Brain Science . . . . .</b>	<b>99</b>
7.1	The Molecular Level Science of the Brain . . . . .	99
7.2	Quantum Horizons of the Brain . . . . .	101
7.2.1	Multi-Quantum Coherence in MR, FADU Tumor (A Primary Hypopharyngeal Tumor Grade 4) . . . . .	101
7.2.2	Sodium (Na) Double Quantum Filter: Spinal Disc Degeneration . . . . .	102
7.2.3	Double Quantum Coherence . . . . .	107
7.2.4	Zero Quantum Coherence . . . . .	109
7.2.5	Selective Multi-Quantum Coherence Imaging Using Chemical Shift Imaging Sequence: Clinically Detected Lactate Methyl Resonance . . . . .	110

7.2.6	Spectroscopic Lactate to Lipid Signal Enhancement: Spectral Selective (SS)-Elective MQ (Multi-Quantum) Coherences (SS-Seq MQC)-Dunning R3327-AT Prostate Cancer Cells. . . . .	112
7.2.7	Single-Quantum Coherence Spectroscopy, Alteration in Fatty Acyl Group Composition-Unsaturated Fatty Acidic: Association with Brain Cancer . . . . .	114
References	. . . . .	115
<b>8</b>	<b>Summary and Conclusion</b> . . . . .	117
References	. . . . .	123
<b>Part II Sodium Multi-Quantum Magnetic Resonance Imaging Diagnostics of Brain Tumors and Disorders</b>		
<b>9</b>	<b>Introduction</b> . . . . .	127
9.1	The Natural Magnetic Materials and the Human Body . . . . .	127
9.1.1	Nuclear Magnetic Resonance: Imaging (NMRI) and Spectroscopy . . . . .	127
9.1.2	The Nuclear Quadrupole Charge State in a Biological Medium Like Our Brain . . . . .	133
9.1.3	Nuclear Quadrupole Materials . . . . .	135
9.1.4	Human Brain: An Ensemble of Heterogeneous Spins Atomic and Nuclear . . . . .	138
9.1.5	Anisotropic Nuclear Charge Distribution and Its Intrinsic Consequences . . . . .	142
9.2	Electrostatic Charges: Statics and Dynamics . . . . .	145
9.2.1	Single Point Charges: Electric Potential and Electric Field in Free Space . . . . .	145
9.2.2	Electric Dipole Moment . . . . .	148
9.2.3	Electric Quadrupole Moment . . . . .	152
9.2.4	Atomic and Nuclear Magnetic Dipole Moment . . . . .	154
9.3	Electric Quadrupole and Magnetic Dipole Interaction System . . . . .	165
9.3.1	Na Magnetic (Spin 3/2): Electric Quadrupole System . . . . .	165
9.3.2	The Electric-Magnetic Interaction Energy: Simple Concepts . . . . .	167

9.4	$^{23}\text{Na}$ Electric-Quadrupole Magnetic-Dipole Systems: Practical Examples . . . . .	168
9.4.1	Quadrupole Electric-Dipole Magnetic Spin 3/2 System (Molecular Structure-Quantum Energy Diagrams) . . . . .	168
9.4.2	Spectroscopy (Simple Theory) Quadrupolar Interactions Dispersion versus Absorption Plots (DISPA) . . . . .	170
9.4.3	Electric-Magnetic (Double Quantum) Resonance Spectroscopy (Theory) Spin 3/2 System ( $\text{Cl}^-$ ) . . . . .	172
9.4.4	NMRI (Nuclear Magnetic Resonance Imaging) Short $T_2$ Component (Human Model), Sodium $^{23}\text{Na}$ (3/2 Spin System) . . . . .	174
9.4.5	NMR Spectroscopy (Animal model): Double Quantum Intracellular Sodium Coherence Transfer . . . . .	175
9.4.6	Triple Quantum Filtered (MRI) Sodium Ion Imaging (Animal Model) . . . . .	176
	References . . . . .	178
<b>10</b>	<b>Biomedical Diamagnetic Spin and Electric-Quadrupole Interaction Systems . . . . .</b>	<b>181</b>
10.1	Sodium-Potassium Ion Binding: Biological Systems . . . . .	181
10.2	Spin 3/2 Dynamics Density Matrix Approach NMR Experiments . . . . .	185
10.3	Sodium Signals: Via Central Transition . . . . .	188
10.4	Intracellular $\text{Na}^+$ Red Blood Cells Animal Model . . . . .	190
10.5	Triple Quantum Filtered NMR Animal Model . . . . .	194
	References . . . . .	196
<b>11</b>	<b>Practical Illustrations Sodium Spectroscopy and Imaging: Clinical Applications . . . . .</b>	<b>197</b>
11.1	Vasogenic Edema: Experimental Canine/Human Model . . . . .	197
11.2	Tissue Sodium Concentration Tissue Viability (Stroke): Human Model (Conventional MRI) . . . . .	199
11.3	Human Brain In-vivo Sodium MRI: Soft Inversion Recovery (Conventional Versus Quantum MRI) . . . . .	202
11.4	Statistically Optimal MRI Acquisition (General) . . . . .	204
11.5	Spin 3/2 Bi-Exponential Relaxation Multi-Quantum Filtration Technique ( $^{23}\text{Na}$ Spectroscopy) . . . . .	206
11.6	Sodium Twisted Projection Imaging (TPI)/Conventional MRI (ADC Maps) Human Model . . . . .	209

11.7	Human Brain: Diffusion Weighted Magnetic Resonance Spectroscopy (MRS) And Imaging (Conventional MRI) . . . . .	210
11.8	Human Brain Metabolites: Proton $T_1$ and $T_2$ Relaxation Times (Conventional MRI) . . . . .	213
11.9	Relaxation Times: Human Abdominal And Pelvic Tissue (Conventional MRI) . . . . .	214
11.10	Human Brain: $T_1$ And $T_2$ Relaxation Times Regional Differences (Conventional MRI) . . . . .	218
11.11	Tissue Sodium Concentration: Human Brain Tumors (Conventional MRI) . . . . .	220
11.12	Tissue sodium Concentration: Myocardial Infarction Human Model (Conventional MRI). . . . .	221

<b>14</b>	<b>Appendices . . . . .</b>	<b>245</b>
14.1	Appendices A. . . . .	245
14.1.1	An Electric Current in a Straight Copper Wire Generates a Magnetic Field Around it and a Magnetic Field Created in Space Generates Electric Current in a Copper Coil Placed in the Field . . . . .	245
14.1.2	The Atomic Magnetic Dipole Moment. . . . .	246
14.1.3	The Nuclear Magnetic Dipole Moment . . . . .	248
14.1.4	The Nuclear Gyromagnetic Ratio (NGMR or $\gamma_N$ ) . . . . .	248
14.1.5	The Precessional Frequency of the Nuclear Magnetic Moment, with the Applied Magnetic Field . . . . .	249
14.1.6	Energy Split in the Spins (Dipole Magnetic Moments) in a Magnetic Field . . . . .	250
14.1.7	Spin Echo . . . . .	250
14.1.8	The Longitudinal Relaxation Time $T_1$ . . . . .	250
14.1.9	The Transverse Relaxation Time $T_2$ . . . . .	251
14.1.10	The Gradient Echo . . . . .	251
14.1.11	Spin Encoding in the Brain Using Radio Frequency (RF) Radiation . . . . .	252

14.1.12	The Brain: A Complex Ensemble of Spins . . . . .	254
14.1.13	Distant Dipole Field . . . . .	255
14.2	Appendices B . . . . .	257
14.2.1	Single Spin Rotation in Space and Time . . . . .	257
14.2.2	Two Spin System . . . . .	262
14.2.3	Two Spin System: The Density Matrix . . . . .	263
14.2.4	Multiple-Quantum Correlations: Two Spin System . . . . .	268
14.2.5	MRI: A Single Proton System . . . . .	269
14.2.6	Sixteen Spin Matrices of the Two Spins (I and S) System: Cartesian Coordinate System (CCS). . . . .	278
14.2.7	Two Dimensional Homonuclear Correlation Spectroscopy (COSY): Cartesian Coordinate System (CCS). . . . .	281
14.2.8	Spherical Basis System (SBS) for Two Spins (I and S) . . . . .	282
14.2.9	Spherical Basis: Effect of Application of a Pulse Along a General $\varphi$ Axis, Precession About z Axis and the J-Coupling . . . . .	283
14.2.10	Spherical Basis COSY: Effect of Application of Two $90^\circ$ Pulses Along x Axis to the I Spins of a Two Spins (I and S) System. . . . .	285
14.2.11	Spherical Basis: Double Quantum Filter (DQF): Correlation Spectroscopy (COSY) Two Spin System/Coherence Pathway Selection by Phase Cycling . . . . .	285
14.2.12	Multiple Coherence Transfer Pathways: Selection Rules . . . . .	286
14.2.13	Multi-Quantum Spectroscopy . . . . .	288
14.2.14	NMR Multi-Quantum Spectroscopy and Brain Science/Practical Illustration. . . . .	291
14.3	Appendix A1 . . . . .	292
14.3.1	Relaxation Rates: Chemical Exchange . . . . .	292
14.3.2	Dispersion Verses Absorption (DISPA) NMR Spectrum-Dynamic Frequency Shifts . . . . .	297
14.3.3	Potassium Imaging Versus Sodium Imaging. . . . .	300
14.3.4	Triple Quantum Filtered Sodium Imaging . . . . .	301
14.3.5	Three Dimensional Fast K-Space Sodium Imaging . . . . .	303

14.3.6	Double Quantum Filter Single Spin $I = 1$ (Deuterium System) . . . . .	305
14.3.7	Quadrupolar Relaxation Rates: The Multi-Quantum Coherences . . . . .	309
14.3.8	Multi-Quantum Filters Spin $3/2$ Nuclei . . . . .	313
14.3.9	Triple Quantum Filtering: Sodium NMRI. . . . .	316
14.3.10	Quadrupole Interactions: Quantum Biexponential Relaxation . . . . .	316
14.3.11	Multiple-Quantum Spectroscopy $3/2$ Spins-Isotropic Phase. . . . .	317
14.3.12	Triple Quantum Filtered Sodium MRI. . . . .	320
14.3.13	Triple Quantum Filtered Sodium MRI-Spin $3/2$ Dynamics . . . . .	323
14.3.14	Brain Tissue Sodium: Focal Cerebral Ischemia—Animal Model . . . . .	326
14.3.15	Sodium Imaging; Triple Quantum. . . . .	328
14.3.16	Sodium Imaging: Triple Quantum Filtration. . . . .	332
14.3.17	Sodium Imaging Double Quantum Filtration . . . . .	335
14.3.18	NMR Chemical Shift Imaging . . . . .	337
14.3.19	Is MRI A Diffraction Phenomena? NO it is not. But, Yes it is . . . . .	339
14.3.20	Double Quantum Coherence: Superparamagnetic Iron Oxide Nano particles (SPIONS) Animal Model/Prostate—Tumor Mouse. . . . .	350
14.3.21	MRI Thermal (Temperature) Imaging . . . . .	351
14.3.22	Alzheimer Disease (AD) Chemistry Model I . . . . .	353
14.3.23	Alzheimer Disease (AD) Chemistry Model II. . . . .	354
14.3.24	Carbon—Carbon ( $^{13}\text{C}$ — $^{13}\text{C}$ ) Multi-Quantum Coherence Imaging . . . . .	356
14.3.25	Separation of Fast Sodium Component . . . . .	358
14.3.26	Quadrupolar-Coupling $^{23}\text{Na}$ NMR. . . . .	358
14.3.27	Loss of Cell Ion Homeostasis and Cell Viability in the Brain . . . . .	362
14.3.28	Nuclear Magnetic Dipole (Spin $1/2$ Nuclei) and Quadrupolar Nuclei/Courtesy (I) . . . . .	363
14.3.32	Molecular Qudrupole Moment: Electric Field Gradient Interactions . . . . .	364

14.3.33	Quadrupole Nuclei: Disordered Systems . . . . .	370
14.3.34	The Basics: The Quadrupole Nuclear-Magnetic Dipole Interaction Energy . . . . .	372
	References . . . . .	374
	<b>Glossary . . . . .</b>	<b>377</b>
