

Contents

- Preface to the third edition, vii
- Preface to the second edition, viii
- Preface to the first edition, ix
- 1 Introduction: basic concepts and methodology, 1**
 - 1.1 Introduction, 1
 - 1.2 Basic concepts, 1
 - 1.3 Methodology, 6
 - 2 Siliciclastic sediments I: sandstones, conglomerates and breccias, 11**
 - 2.1 Introduction, 11
 - 2.2 Sediment texture, 11
 - 2.3 Sedimentary structures, 21
 - 2.4 Palaeocurrent analysis, 40
 - 2.5 Detrital components of siliciclastic sediments, 42
 - 2.6 Classification of siliciclastic sediments, 48
 - 2.7 Petrography and origin of principal sandstone types, 50
 - 2.8 Sandstone composition, provenance and tectonic setting, 53
 - 2.9 Sandstone diagenesis, 55
 - 2.10 Porosity and permeability, 62
 - 2.11 Depositional environments of sandstones and coarser clastics, 65
 - 3 Siliciclastic sediments II: mudrocks, 92**
 - 3.1 Introduction, 92
 - 3.2 Textures and structures of mudrocks, 92
 - 3.3 The colour of mudrocks, 96
 - 3.4 Mineral constituents of mudrocks, 97
 - 3.5 The formation and distribution of clay minerals in modern sediments, 99
 - 3.6 Diagenesis of clay minerals and mudrocks, 102
 - 3.7 Mudrocks and their depositional environments, 103
 - 4 Limestones, 110**
 - 4.1 Introduction, 110
 - 4.2 Mineralogy of carbonate sediments, 111
 - 4.3 Components of limestones, 111
 - 4.4 Classification of limestones, 128
 - 4.5 Limestone grain size and texture, 130
 - 4.6 Sedimentary structures of limestones, 130
 - 4.7 Carbonate diagenesis, 134
 - 4.8 Dolomitization, dedolomitization and silicification, 146
 - 4.9 Porosity in carbonate sediments, 151
 - 4.10 Carbonate depositional environments and facies, 151
 - 5 Evaporites, 166**
 - 5.1 Introduction, 166
 - 5.2 Gypsum and anhydrite, 169
 - 5.3 Halite, 174
 - 5.4 Other evaporite minerals and their occurrence, 176
 - 5.5 Evaporite dissolution and replacement, 178
 - 5.6 Evaporite sequences and discussion, 178
 - 6 Sedimentary iron deposits, 182**
 - 6.1 Introduction, 182
 - 6.2 Source and transportation of iron, 182
 - 6.3 The formation of the principal iron minerals, 183
 - 6.4 Occurrence and petrography of the iron minerals, 186
 - 6.5 Precambrian iron-formations and Phanerozoic ironstones, 189
 - 6.6 Bog iron ores, 192
 - 6.7 Ferromanganese nodules and crusts, and metalliferous sediments, 192
 - 7 Sedimentary phosphate deposits, 194**
 - 7.1 Introduction, 194
 - 7.2 Mineralogy, 194
 - 7.3 Nodular and bedded phosphorites, 194
 - 7.4 Bioclastic and pebble-bed phosphorites, 197
 - 7.5 Guano and ocean-island phosphorites, 198
 - 8 Coal, oil shale and petroleum, 199**
 - 8.1 Introduction, 199
 - 8.2 Modern organic deposits, 199
 - 8.3 Ancient organic deposits, 200

- 8.4 Coals and the coal series, 200
- 8.5 Coal petrology, 202
- 8.6 Coal formation and rank, 204
- 8.7 Occurrence of coal, 205
- 8.8 Oil shales, 206
- 8.9 Formation of kerogen, 207
- 8.10 Petroleum, 207

9 Cherts and siliceous sediments, 212

- 9.1 Introduction, 212
- 9.2 Chert petrology, 212
- 9.3 Bedded cherts, 212
- 9.4 Nodular cherts, 218
- 9.5 Non-marine siliceous sediments and cherts, 219

10 Volcaniclastic sediments, 221

- 10.1 Introduction, 221
- 10.2 Autoclastic deposits, 222
- 10.3 Pyroclastic-fall deposits, 223
- 10.4 Pyroclastic-flow and -surge deposits, 224
- 10.5 Hydroclastites: hyaloclastites and hyalotuffs, 226
- 10.6 Epiclastic volcanogenic deposits, 228
- 10.7 Diagenesis of volcaniclastic sediments, 228

References, 231

Index, 251

Colour plates fall between p. 118 and p. 119
