Preface	ix
Chapter 1. Functional Framework	1
§1.1. Basic Notation	1
§1.2. Functional Analysis Results	4
§1.3. Hölder Spaces	7
§1.4. Lebesgue Spaces	9
§1.5. Sobolev Spaces	13
§1.6. Orthogonal Bases in $H^m(\mathbb{R}^N)$	51
§1.7. Sobolev Spaces Involving Time	60
Chapter 2. Linear Equations	77
§2.1. Introduction	77
§2.2. The Hyperbolic Cauchy Problem	78
§2.3. Proof of Theorem 2.2.1	81
§2.4. Weak Solutions	104
§2.5. The Parabolic Cauchy Problem	107
Chapter 3. Quasi-linear Equations	119
§3.1. Introduction	119
§3.2. The Hyperbolic Cauchy Problem	122
§3.3. Proof of Theorem 3.2.1	131
§3.4. The Parabolic Cauchy Problem	145

Chapter 4. Global Existence	153
§4.1. Introduction	153
§4.2. Life Span of Solutions	155
§4.3. Non Dissipative Finite Time Blow-Up	159
§4.4. Almost Global Existence	171
§4.5. Global Existence for Dissipative Equations	175
§4.6. The Parabolic Problem	214
Chapter 5. Asymptotic Behavior	233
§5.1. Introduction	233
§5.2. Convergence $u^{\text{hyp}}(t) \rightarrow u^{\text{sta}}$	234
§5.3. Convergence $u^{\text{par}}(t) \rightarrow u^{\text{sta}}$	241
§5.4. Stability Estimates	244
§5.5. The Diffusion Phenomenon	278
Chapter 6. Singular Convergence	293
§6.1. Introduction	293
§6.2. An Example from ODEs	295
§6.3. Uniformly Local and Global Existence	301
§6.4. Singular Perturbation	305
§6.5. Almost Global Existence	326
Chapter 7. Maxwell and von Karman Equations	335
§7.1. Maxwell's Equations	335
§7.2. von Karman's Equations	343
List of Function Spaces	361
Bibliography	365
Index	375
