Table of Contents

Introduction aux Processus de Markov a Parametre Dans Z_ν **1**
F. Spitzer

Chapitre I Champs aléatoires et limites thermodynamiques 2
Chapitre II Etats de Markov et de Gibbs finis 12
Chapitre III Les états de Markov et de Gibbs sur Z_ν 15
Chapitre IV Transition de phase pour le modéle d'Ising d'un gaz 30
Chapitre V Caractérisation variationnelle des états de Gibbs 45
Chapitre VI Evolutions temporelles 53
Chapitre VII Champs de Markov gaussiens 66
Bibliographie 73

The Stochastic Evolution of Infinite systems of Interacting articles **77**
T.M. Liggett

Introduction 78

Part I Spin-Flip Processes 80

Chapter 1 Existence Results and First Ergodic Theorems 80
Chapter 2 The Use of Coupling Techniques 89
Chapter 3 The Use of Duality Techniques 94
Chapter 4 Other Results 101

Part II Exclusion Processes 106

Chapter 1 Existence Results and Identification of Simple Invariant Measures 106
Chapter 2 The Symmetric Simple Exclusion Process 111
Chapter 3 The Asymmetric Simple Exclusion Process 122
Chapter 4 The Exclusion Process with Speed Change 129
Bibliographie 135

Topics in Propagation of Chaos **139**
A.-S. Sznitman

Chapter 0 Introduction 141
Chapter I Generalities and first examples 146
Chapter II A local interaction leading to Burgers' equation 169
Chapter III The constant mean free travel time regime 192
Chapter IV Uniqueness for the Boltzmann process 212
References 223

Ten Lectures on Particle Systems **227**
R. Durrett

1. Overview (two lectures) 230
2. Construction, Basic Properties 249
3. *Percolation Substructures, Duality* *256*
4. A Comparison Theorem 268
5. Threshold Models 277
6. *Cyclic Models* *286*
7. Long Range Limits 294
8. Rapid Stirring Limits 301
9. Predator Prey Systems 310

Appendix. Proofs of the Comparison Results 321
References 328
