

1	Introduction	1
1.1	Analysis of Sequences	3
1.1.1	Mining Closed Sequential Patterns	5
1.1.2	Mining Partial Orders	6
1.1.3	Mining Association Rules with Order	8
1.1.4	Clustering Input Sequences	9
1.2	Overview of this Book	9
2	Preliminaries	13
2.1	Contexts, Concepts and the Concept Lattice	13
2.2	The Closure System of Itemsets	15
2.2.1	Association Rules	16
2.3	Classical Propositional Horn Logic	17
2.3.1	Closures and Horn Clauses	17
2.4	Learning with Lattices	18
3	Lattice Theory for Sequences	21
3.1	The Ordered Context	22
3.2	A New Closure Operator	22
3.2.1	Defining the Galois Connection	23
3.3	Formal Concepts and the Concept Lattice	26
3.4	Closed Sequential Patterns in the Lattice	27
3.5	Lattice Construction	30
3.5.1	An Algorithm	33
3.6	The Minimum Support Condition	37
4	Horn Axiomatizations for Sequences	39
4.1	Generators of a Closed Set of Sequences	39
4.2	Empirical Horn Approximations for Ordered Contexts	41
4.2.1	Main Result	42

4.3	Computing the Rules with Order	44
4.3.1	Calculating Minimal Generators for Closed Set of Sequences	45
4.3.2	Examples	47
4.3.3	Reconstructing the Rules of a Cellular Automaton	49
5	Transformations on Injective Partial Orders	51
5.1	The Language of Categories	51
5.2	Coproduct Transformations on Maximal Paths	55
5.2.1	The Simultaneity Condition Revisited	57
5.3	The Closure System of Partial Orders	57
5.3.1	The Closure System of Injective Posets	60
5.4	Lattice Isomorphy	61
5.4.1	Examples	62
6	Transformations on General Partial Orders	65
6.1	Notational Review	65
6.2	Partial Orders to Summarize Sequences	68
6.2.1	Path-preserving Transformations	70
6.3	Characterization	70
6.3.1	Colimit Transformation	73
6.3.2	Properties of the Colimit Transformation	76
6.3.3	Facts about Conjecture 6.1	77
6.4	Lattice Isomorphy	80
6.4.1	The Simultaneity Condition Revisited	81
7	Towards Other Structured Data	85
7.1	Acyclic Structured Data	85
7.2	Mining a Set of Sets of Sequences	87
7.2.1	The New Closed Sequential Patterns	88
7.2.2	Obtaining the Closure System	88
7.2.3	Reconstructing Partial Orders	90
7.2.4	An Illustrative Example	90
7.3	An Integrated System for Structural Analysis	92
7.4	Experimental Validation	93
8	Summary of Results	99
