Contributors	xv

SECTION I Examples of Some Key Gene–Diet Interactions

Chapter 1	Nutrigenetics and Nutrigenomics: Importance for Functional Foods and Personalized Nutrition	3
	<i>Lynnette R. Ferguson</i>	
Chapter 2	Variations in Solute Transporter Genes Affecting Micronutrient Solute Transport and Human Health.....	25
	<i>Peter Eck</i>	
Chapter 3	Genetic Variants in the Omega-6 and Omega-3 Fatty Acid Metabolic Pathway: Their Role in the Determination of Nutritional Requirements and Chronic Disease Risk	83
	<i>Artemis P. Simopoulos</i>	
Chapter 4	Nutrigenomic Approaches to Unraveling the Physiological Effects of Complex Foods.....	105
	<i>Peter J. Gillies and John P. Vanden Heuvel</i>	

SECTION II Modifying Disease Risk through Nutrigenetics and Nutrigenomics

Chapter 5	Modulating the Risk of Cardiovascular Disease through Nutrigenetics	119
	<i>Antonio Garcia-Rios, Javier Delgado-Lista, Pablo Perez-Martinez, Francisco Pérez-Jimenez, and Jose Lopez-Miranda</i>	

Chapter 6 Modulating the Risk of Obesity and Diabetes through Nutrigenetics 131
Helen M. Roche and Catherine Phillips

Chapter 7 Nutrigenetics and Crohn’s Disease..... 153
Lynnette R. Ferguson

Chapter 8 Microbiome and Host Interactions in Inflammatory Bowel Diseases: Relevance for Personalized Nutrition 169
Wayne Young, Bianca Knoch, and Nicole C. Roy

Chapter 9 Importance of Cell-Specific Gene Expression Patterns for Understanding Nutrient and Gene Interactions in Inflammatory Bowel Diseases..... 191
Anna E. Russ, Jason S. Peters, Warren C. McNabb, and Nicole C. Roy

**SECTION III Technologies in Nutrigenetics/
 Nutrigenomics**

Chapter 10 Data Mining and Network Analysis: Potential Importance in Nutrigenomics Research 207
Vijayalakshmi Varma and Jim Kaput

Chapter 11 Metabolomics: An Important Tool for Assessing State of Health and Risk of Disease in Nutrigenomics Research 229
Hui-Ming Lin and Daryl Rowan

Chapter 12 Epigenetics—What Role Could This Play in Functional Foods and Personalised Nutrition?..... 243
Matthew P.G. Barnett, Shalome A. Bassett, and Emma N. Bermingham

Chapter 13 Foodomics to Study Efficacy of Human Dietary Interventions: Proof of Principle Study 269
Stephanie Ellett, Isobel R. Ferguson, Shuotun Zhu, Nishi Karunasinghe, Gareth Marlow, Daniel Hurley, Wen J. Lam, Dug Yeo Han, and Lynnette R. Ferguson

Chapter 14	Considerations in Estimating Genotype in Nutrigenetic Studies.....	281
	<i>Angharad R. Morgan</i>	
 SECTION IV <i>Bringing Nutrigenomics to Industry, Health Professionals, and the Public</i>		
Chapter 15	Bringing Nutrigenomics to the Food Industry: Industry–Academia Partnerships as an Important Challenge	293
	<i>Ralf C. Schlothauer and Joerg Kistler</i>	
Chapter 16	Commercialisation and Potential of Nutrigenetics and Nutrigenomics	305
	<i>Virginia Parslow and Lynnette R. Ferguson</i>	
Chapter 17	Bringing Nutrigenomics to the Public: Is Direct-to-Consumer Testing the Future of Nutritional Genomics?	333
	<i>David Castle</i>	
Chapter 18	Nutritional Genomics in Practice: Interaction with Health Professionals in Bringing Nutritional Genomics to the Public	347
	<i>Colleen Fogarty Draper</i>	
Chapter 19	Harvesting Normative Potential for Nutrigenomic Research	361
	<i>Bart Penders and Michiel Korthals</i>	
Chapter 20	Public Health Context for Nutrigenomics and Personalized Nutrition	375
	<i>Elizabeth H. Marchlewicz, Karen E. Peterson, and Gilbert S. Omenn</i>	
Chapter 21	Nutrigenomics and Public Health	399
	<i>Maria Agelli and John A. Milner</i>	
Index		419
