

## Content

### PREFACE

### INTRODUCTION

7	GEOLOGICO-GEOGRAPHICAL DELIMITATION AND DIVISION OF THE BOHEMIAN MASSIF	<i>J. Svoboda</i>
14	HISTORY OF THE GEOLOGICAL INVESTIGATION OF THE BOHEMIAN MASSIF	<i>J. Svoboda</i>
17	GEOLOGICAL DEVELOPMENT OF THE BOHEMIAN MASSIF	
40	CRYSTALLINE COMPLEXES	
40	MOLDANUBICUM	<i>O. Kodym jun.</i>
40	Delimitation of the area	
41	Geomorphology	
42	Geology	
44	<b>The Moldanubian Metamorphics</b>	
48	The Monotonous Group	
52	The Varied Group	
53	The Sušice-Votice unit of the Varied Group	
53	The Krumlov unit of the Varied Group	
55	The Moravian unit of the Varied Group	
56	Rocks of the Varied Group	
58	The mica-schist complexes	
59	The Kaplice mica-schists	
60	The Královský hvozď complex	
61	The Chýnov mica-schists	
61	The Uherčice mica-schists	
62	Orthoschists	
68	<b>Variscan igneous rocks</b>	
69	The Central Bohemian Pluton	
72	Plutonic rocks	
78	Dykes and sills	
80	The Moldanubian Pluton	
81	Plutonic rocks	
85	Dykes and sills	
86	<b>Tectonics</b>	
89	Tectonics of the Central Bohemian Pluton	
90	Tectonics of the Moldanubian Pluton	
93	<b>Mineral resources</b> ( <i>L. Odehnal - A. Polák</i> )	
96	Selected bibliography	

99	<b>CRYSTALLINE COMPLEXES OF THE KUTNÁ HORA AREA</b>	<b>K. Beneš</b>
100	Delimitation and morphology of the area	
100	Geological structure	
102	Petrography	
103	The Kutná Hora crystalline complex s.s.	
104	The crystalline complex of the Čáslav depression	
104	Orthogneiss bodies beneath the Cretaceous of the Dlouhá mez and in the transition zone	
105	The Podhořany crystalline complex	
105	The Oheb crystalline complex	
106	The crystalline complex of the Svratka anticline	
107	The Rataje and transition zones	
108	Basic plutonic rocks	
110	The Polička crystalline complex	
112	Tectonics	
114	Mineral resources	
115	Selected bibliography	
116	<b>CRYSTALLINE COMPLEXES OF NORTH-WESTERN BOHEMIA</b>	<b>V. Sattran-V. Škvor</b>
116	<b>The Krušné hory and Smrčiny Mountains</b>	
116	Delimitation and morphology of the area	
117	Geology	
119	Petrography and stratigraphy	
119	Algonkian	
124	The crystalline complex of uncertain age	
129	Orthogneisses	
131	Ordovician – Silurian	
137	Carboniferous – Permian	
138	Variscan igneous rocks	
143	Tectonics	
146	Mineral resources	
149	<b>The Krušné hory crystalline complex south of the Krušné hory fault</b>	<b>V. Sattran</b>
149	The crystalline complex of the Ohře valley	
150	The crystalline complex in the České středohoří area	
152	The crystalline complex of the Opárno and Labe valleys	
153	<b>The Slavkovský les Mountains and the Tepelská plošina Upland</b>	<b>J. Holubec</b>
153	Delimitation and morphology of the area	
153	Geology	
154	Petrography	
154	The Slavkov core	
155	The envelope complex of the Slavkovský les	
157	The Mariánské Lázně metabasite complex	
157	The crystalline complex of the Tepelská plošina	
158	Granitoids of the Teplá anticlinorium	
159	Variscan granitoids	
160	Tectonics	
161	Synmetamorphic tectonics	
161	The Ohře synclinorium	
161	The Slavkovský les	

163	Postmetamorphic tectonics	
163	Mineral resources	
165	<b>The Domažlice crystalline complex</b>	<i>O. Kodým, jun.</i>
165	Metamorphic rocks	
166	Assyntian intrusive rocks	
167	Variscan igneous rocks	
169	Tectonics	
169	Mineral resources	
170	Selected bibliography	
172	<b>CRYSTALLINE COMPLEXES OF THE WEST SUDETEN</b>	
		<i>J. Svoboda-J. Chaloupský</i>
172	<b>The Krkonoše, Jizerské hory, and Lužické hory Mountains</b>	
172	Introduction	
175	Stratigraphy and petrography	
176	Algonkian ( <i>J. Chaloupský</i> )	
177	Ordovician – Silurian	
179	Upper Devonian-Lower Carboniferous	<i>J. Chaloupský</i>
180	Igneous rocks	
180	Initial volcanism	
181	Orthogneisses of the Krkonoše and the Jizerské hory Mts.	
184	The Lusatian granite pluton	
187	The Krkonoše-Jizerské hory granite massif	
189	Tectonics	
194	Mineral resources ( <i>J. Svoboda</i> )	
195	<b>Outcrops of crystalline rocks in the Bohemian Cretaceous area</b>	<i>J. Svoboda</i>
195	Crystalline occurrences in the eastern part of the Cretaceous basin	
196	The crystalline complex in the Labe valley, N of Děčín ( <i>M. Malkovský</i> )	
197	The Early Palaeozoic on Maršovický vrch Hill near Dubá ( <i>M. Malkovský</i> )	
197	<b>The Orlické hory and Králický Sněžník Mountains</b>	<i>J. Svoboda</i>
197	Geographical-geological survey	
198	Stratigraphy and petrography	
198	Algonkian, Eocambrian	
198	Orthogneisses and migmatites of the Orlické hory – Kłodzko Dome	
201	The Stronie complex	
202	The Staré Město unit	
202	The Zábřeh complex ( <i>A. Dudek</i> )	
204	The Nové Město phyllites	
204	Ordovician – Silurian	
205	Igneous rocks	
206	Tectonics	
209	Mineral resources	
210	Selected bibliography	
213	<b>CRYSTALLINE COMPLEXES OF THE MORAVO-SILESIA REGION</b>	
213	<b>The Silesicum</b>	<i>Z. Poucha</i>
213	Delimitation and morphology of the area	
213	The main structural units and their development history	
218	Stratigraphy and petrography	
218	Algonkian basement of the Palaeozoic	

219	Algonkian in the Staré Město unit	
220	Algonkian-Early Palaeozoic (?) in the Velké Vrbno Dome	
221	Algonkian-Early Palaeozoic (?) of the Branná unit	
223	Algonkian in the Keprník Dome and in the envelope of the Žulová Massif	
225	Algonkian in the Desná Dome	
228	Algonkian in the Rejvív, Hrabšíin and Červenohorské sedlo units	
230	Devonian	
230	Devonian of the Vrbno Group	
233	Devonian of the Rejvív, Hrabšíin and Červenohorské sedlo units	
234	Devonian in the Branná unit	
234	Variscan magmatites	
234	The Jeseník and Sobotín amphibolite massifs	
235	The earlier intrusive rocks	
236	Postorogenic granitoid massifs	
236	The Žulová massif	
238	The Šumperk granodiorite body	
239	Tectonics	
245	Mineral resources	
247	<b>The Moravicum</b>	<i>A. Dudek-J. Weiss</i>
248	Geology	
252	Petrography and metamorphism	
252	The Svratka Dome	
252	The Vranov-Olešnice Group (Outer phyllites)	
255	The Bíteš orthogneiss	
255	Inner phyllites	
256	The Květnice Group	
257	The Dyje Dome	
257	The Vranov-Olešnice Group	
258	The Bíteš orthogneiss	
258	Inner phyllites	
259	The Dyje massif	
260	The Miroslav Horst and the crystalline complex at Krhovice	
261	The crystalline complex of the Nectava valley	
263	The Svinov-Vranov crystalline complex	
264	The Moravian mica-schist belt	
265	The Letovice crystalline complex	
266	Tectonics	
269	Mineral resources	
270	<b>The Brno massif</b>	<i>J. Weiss</i>
274	Selected bibliography	
281	<b>ALGONKIAN — LOWER CARBONIFEROUS</b>	
281	<b>The Barrandian Basin</b>	<i>J. Svoboda</i>
281	Introduction	
282	Stratigraphy and petrography	
282	Algonkian	
285	Eocambrian	
287	Cambrian ( <i>V. Havlíček</i> )	
294	Ordovician ( <i>V. Havlíček</i> )	
304	Silurian ( <i>J. Svoboda - R. Horný</i> )	

313	Devonian	( <i>J. Sroboda - I. Chlupáč</i> )
327	Igneous rocks	
332	Tectonics	
340	Mineral resources	
342	<b>The Železné hory Mountains</b>	
	and the metamorphic "islets" of central Bohemia (Chrudim-Islets zone)	<i>J. Sroboda</i>
342	Introduction	
345	Stratigraphy and petrography	
345	Algonkian	
348	Eocambrian	
350	Cambrian	
352	Ordovician	
354	Silurian	
358	Igneous rocks	
361	Tectonics	
363	Mineral resources	
364	Selected bibliography	
367	<b>PALAEOZOIC IN MORAVIA</b>	<i>I. Chlupáč</i>
367	<b>The Moravian Karst</b>	
367	Introduction	
369	Stratigraphy and petrography	
369	Devonian	
375	Lower Carboniferous	
376	Tectonics	
378	Mineral resources	
378	<b>The Dražanská vrchovina Upland</b>	
378	Introduction	
379	Stratigraphy and petrography	
379	The basement of the Palaeozoic	
380	Silurian	
381	Devonian	
383	Devonian of the Dražany development	
384	Devonian in the transition development	
385	Devonian in the Moravian Karst development	
391	Devonian near Moravská Třebová	
391	Culm	
393	The Mírov area	
393	Lower Carboniferous near Hranice	
394	Igneous rocks	
395	Tectonics	
396	Mineral resources	
396	<b>The Nízký Jeseník Mountains</b>	
396	Survey of geography and geology	
398	Stratigraphy and petrography	
398	Devonian in the Šternberk-Horní Benešov belt	
399	The Andělská hora Formation	
401	Culm	( <i>V. Havlena</i> )
405	Palaeozoic volcanism	

405	Tectonics ( <i>I. Chlupáč - V. Havlena</i> )	
408	Mineral resources	
409	Selected bibliography	
413	<b>UPPER CARBONIFEROUS AND PERMIAN BASINS</b>	
414	<b>THE UPPER SILESIAN BASIN</b>	<i>V. Havlena</i>
415	The Ostrava Group	
424	The Karviná Group	
428	Tectonics of the Productive Carboniferous	
431	Red beds	
432	The quality of coal	
433	The relief of the Carboniferous	
434	<b>THE INTRA-SUDETIC BASIN</b>	<i>R. Tásler</i>
434	Lower Carboniferous	
434	Upper Carboniferous	
441	Permian	
444	Mineral resources	
445	<b>THE KRKONOŠE-PIEDMONT BASIN</b>	<i>R. Tásler</i>
449	Tectonics of the Permo-Carboniferous of the Intra-Sudetic and Krkonoše-piedmont Basins	
452	<b>THE CARBONIFEROUS OF CENTRAL BOHEMIA AND THE PERMO-CARBONIFEROUS OF THE KRUŠNÉ HORY MOUNTAINS</b>	<i>V. Havlena</i>
454	The Lower Grey (First) Group	
457	The Lower Red (Second) Group	
558	The Upper Grey (Third) Group	
461	The Upper Red (Fourth) Group	
462	<b>The Plzeň district (Carboniferous of West Bohemia)</b>	
464	<b>The Kladno-Rakovník district and small basins between Plzeň and Beroun</b>	
467	<b>The Permo-Carboniferous of the Krušné hory Mts. and the Carboniferous near Malé Žernoseky</b>	
467	<b>THE BLANICE AND BOSKOVICE FURROWS</b>	<i>V. Havlena</i>
468	<b>The Blanice Furrow</b>	
469	<b>The Boskovice Furrow</b>	
472	<b>The Permian of the Orlice valley and the Železné hory Mts.</b>	
473	<b>THE CENTRAL SUB-CRETACEOUS BASIN</b>	<i>V. Havlena</i>
473	Selected bibliography	
479	<b>MESOZOIC</b>	
479	Introduction	<i>M. Malkovský</i>
481	<b>Triassic</b>	<i>R. Tásler</i>
483	<b>Jurassic</b>	<i>J. Dvořák</i>
487	<b>The Bohemian Cretaceous Basin</b>	<i>V. Klein-J. Soukup</i>
487	Geology	
489	Stratigraphy and petrography	
489	Lower Cretaceous	

489	Albian	
490	Upper Cretaceous	
490	Lower and Middle Cenomanian fresh-water deposits	
493	Brackish and marine Upper Cenomanian — Zone <i>Inoceramus pictus</i> and <i>Neithea aequicostata</i>	
495	Lower Turonian — Zone <i>Inoceramus labiatus</i> with <i>Z. Actinocamax plenus</i>	
497	Middle Turonian — Zone <i>Inoceramus lamarcki</i> and <i>Inoceramus costellatus</i>	
499	Upper Turonian — Zone <i>Inoceramus schloenbachi</i> and <i>Inoceramus inconstans</i>	
501	Coniacian — Zones <i>Inoceramus koeneni</i> and <i>I. involutus</i> , <i>I. subquadratus</i> ; Lower Santonian — Zone <i>Inoceramus undulaticus</i> and <i>I. cordiformis</i> ?	
504	Palaeogeography	
507	Tectonics	
510	Mineral resources	
513	<b>TERTIARY</b>	
513	Introduction ( <i>L. Kopecký - M. Malkovský - J. Václ</i> )	
516	<b>The Cheb Basin</b>	<i>J. Václ</i>
522	<b>The Sokolov Basin</b>	
532	<b>The North Bohemian Basin</b>	<i>M. Malkovský</i>
535	First sedimentary stage (Oligocene)	
536	Second sedimentary stage (Miocene)
