PREFACE

xix

UNIT I METHODOLOGICAL PRELIMINARIES

1	Qualitative Fundamentals	3
1.1	Economic Theory and Managerial Economics	3
1.2	Some Methodological Fallacies	5
1.3	Paradigms, Models, and the Scientific Method	6
1.4	The Descriptive and Prescriptive Treatments	8
1.5	The Profit Function: Accounting versus Economics	8
1.6	Entrepreneurship, Management, and Leadership	9
	Summary	11
	Key Terms	12
	Exercises	12
2	Quantitative Fundamentals	13
2.1	Introduction	13
2.2	Functions	14
2.3	Exponents	16
2.4	Logarithms and the Number e	18
2.5	Differential Calculus	19
2.6	Multivariate and Equality Constrained Optimization	22
2.7	Inequality Constrained Optimization: Linear Programming	30
2.8	Selected Statistical Concepts	30
2.9	Maximum Likelihood Estimation	36
2.10	Ordinary and Nonlinear Least Squares Estimation	37

Summary	38
Key Terms	40
List of Formulas	40
Exercises	42

UNIT II DECISIONS AT THE CONSUMER LEVEL

3 Theory of Consumer Choice	47
3.1 Consumer Preferences	47
3.1.1 Indifference Curve	50
3.1.2 Marginal Rate of Substitution (MRS)	52
3.1.3 Nontypical Indifference Curves	55
3.2 Consumer's Affordability	58
3.2.1 Budget Line	58
3.2.2 Slope of the Budget Line	60
3.2.3 Shift, Swing, and Kink of the Budget Line	60
The Shift	60
The Swing	63
The Kink	64
3.2.4 Three-Dimensional Budget	66
3.3 The Optimal Choice	68
3.3.1 Interior and Corner Solutions	69
3.3.2 Utility and Its Measurability	71
3.3.3 Utility Maximization	76
3.4 Effects on the Optimal Choice	81
3.4.1 Change in Income	81
Normal and Inferior Commodities	82
Income–Consumption Curve	83
Engel Curve: Nominal and Real	83
Engel Curve and Income–Consumption Curve for Homothetic and Quasi-Linear Preferences	85
Income Elasticity of Demand	86
3.4.2 Change in Prices	88
Giffen and Non-Giffen Commodities	90
Price–Consumption Curve	90
Price Change and the Demand Curve	91
Price Elasticity of Demand	91
Substitutes and Complements	93
Cross-Price Elasticity of Demand	94
3.5 Income and Substitution Effects	95
3.6 Slutsky Equation	96
Summary	98
Key Terms	99
List of Formulas	99
Exercises	101

4	Consumer Demand: Theoretical Analysis	103
4.1	Demand and Supply: Functions and Laws	103
4.2	Deriving a Demand Function from Utility Maximization	105
4.3	Homogeneity and the Numeraire	109
4.4	Inverse Demand Function	111
4.5	Demand and Supply: Table and Curves	111
4.6	Market Equilibrium	114
4.7	From Individual to Market Demand	120
4.8	Demand and Network Externalities	122
4.8.1	The Case of the Bandwagon Effect	122
4.8.2	The Case of the Snob Effect	124
4.9	Deriving a Market Demand Function under Externalities	126
4.10	Changes in Q_D and Q_S versus Changes in D and S	129
4.11	Changes in Equilibrium	131
4.11.1	The Case of Thanksgiving Turkey	132
4.11.2	The Case of Sales and Excise Taxes	134
4.12	Market Disequilibrium	138
4.12.1	The Case of a Price Ceiling	139
4.12.2	The Case of a Price Floor	142
4.13	Marshallian versus Hicksian Demand Curves	144
4.13.1	Shephard Lemma and the Expenditure Function	145
4.14	Deriving the Hicksian (Compensated) Demand Curve	147
4.15	Revealed Preferences	149
4.16	Interdependent Demand	152
	Summary	155
	Key Terms	157
	List of Formulas	157
	Exercises	157
5	Consumer Demand: Empirical Estimation	160
5.1	Simple Market Experimentation	160
5.2	Linearity of the Demand Function: From Visual to Regression	163
5.3	Reliability of the Estimation	168
5.4	Quality of Fitting	170
5.5	Fitting by Computerized Regression	172
5.6	Demand Estimation by the Multiple Regression Method	174
5.6.1	Results and Interpretation	179
5.6.2	Goodness of Fit	181
5.6.3	The Overall Explanatory Power of the Model	182
5.6.4	Major Problems to Check On	183
	Multicollinearity	183
	Autocorrelation	184
	Heteroscedasticity	185
5.7	Nonregression Approaches to Estimation	186
5.7.1	Market Experimentation	186

5.7.2	Observational Studies	187
5.7.3	Micromarketing and Virtual Shopping	187
5.8	Advanced Demand Estimation: The Pad Model	188
5.8.1	Model Specification	188
	Desired Demand	188
	Adjustment Equation	188
	Estimating Equation	189
5.8.2	Graph of the Linear PAD Model	189
	Summary	196
	Key Terms	196
	List of Formulas	196
	Exercises	198
6	Consumer Demand: Economic Forecasting	200
6.1	Forecasting Models	201
6.1.1	Quantitative Models	201
6.1.2	Qualitative Models	202
6.2	Time Series Analysis	202
6.2.1	Secular Trends	202
6.2.2	Seasonal Variations	202
6.2.3	Cyclical Fluctuations	203
6.2.4	Random Changes	203
6.3	From Symbolic to Numeric Fitting	203
6.4	Adjusting for Seasonality	207
6.4.1	The Simple Average of Errors Method	208
6.4.2	The Actual-to-Forecast (<i>A/F</i>) Ratio Method	210
6.4.3	The Dummy Variables Method	212
6.5	Smoothed Forecasts	214
6.5.1	Simple Moving Average Method	214
	The RMSE Check	217
6.5.2	The Weighted Moving Average	218
6.5.3	Exponential Smoothing	219
	Mean Absolute Deviation (MAD)	223
6.6	Barometric Forecasting	224
6.7	Econometric Models	226
6.7.1	Single-Equation Model	227
6.7.2	Multiple-Equation Model	229
6.8	Input–Output Matrix	231
6.9	Judgmental Models	233
6.9.1	Opinions and Polls	233
6.9.2	Surveys and Market Research	233
6.10	Forecasting Accuracy and Reliability	234
	Summary	235
	Key Terms	236
	List of Formulas	236
	Exercises	238

UNIT III MANAGERIAL DECISIONS AT THE FIRM LEVEL

7	Production Theory	243
7.1	Variability of Inputs throughout Time	243
7.2	Production Function	244
7.3	Graphical Representation of the Production Function	246
7.4	Short-Run, One Variable Input Function	250
7.5	Dynamic Relations among Production Curves	252
7.6	Law of Diminishing Marginal Returns	260
7.7	Long-Run, Two Variable Input Function	261
	Isoquants	261
7.8	Marginal Rate of Technical Substitution (MRTS)	263
7.9	The Economically Efficient Region of Production	266
7.10	Returns to Scale	267
7.11	Elasticity of Substitution	269
	7.11.1 Elasticity of the Cobb–Douglas Production Function	270
	7.11.2 Elasticity of the Leontief Production Function	271
	7.11.3 Leontief Technology and Linear Programming	272
	7.11.4 Elasticity of the Linear Production Function	273
	7.11.5 Elasticity of the CES Production Function	274
	7.11.6 Graphical Representation of CES	275
7.12	Optimal Employment of an Input	277
7.13	Technological Progress, Invention, and Innovation	278
7.14	Technological Progress and Production Function	280
	Summary	282
	Key Terms	283
	List of Formulas	283
	Exercises	285
8	Cost Theory	287
8.1	Cost Concepts and Categories	287
8.2	Short-Run Costs	289
8.3	The Optimal Combination of Inputs	297
	8.3.1 Isocost	297
8.4	Minimizing Input Cost and Maximizing Output	298
8.5	Long-Run Costs	301
8.6	Short-Run and Long-Run Average Costs: Economies of Scale	303
8.7	Derivation of the Cost Function	306
8.8	Economies of Scope: Basic Concept and Cost Complementarities	311
8.9	Economies of Scope: Synergy and Input Indivisibility	313
8.10	The Learning Curve	316
8.11	Cost–Volume–Profit Analysis and Operating Leverage	321
	8.11.1 Break-Even Quantity and Break-Even Revenue	322
	Fixed Cost	323
	Variable Cost	323
	Contribution Margin	324

8.11.2	Cash Break-Even Technique	326
8.11.3	The Break-Even Point and Target Profit	327
8.11.4	An Algebraic Approach to the Break-Even Point	329
8.11.5	Break-Even Time	330
8.11.6	The Dual Break-Even Points	334
8.12	Leverage	337
8.12.1	Operating Leverage	338
8.12.2	Operating Leverage, Fixed Cost, and Business Risk	341
	Summary	342
	Key Terms	344
	List of Formulas	344
	Exercises	347

9 Production and Cost: Estimation and Forecasting 349

9.1	Estimation of the Production Function	350
9.2	Estimation of the Cost Function	352
9.3	Forecasting Output	355
9.4	Forecasting Cost	359
9.5	Meeting Obligations through Decisions with Probabilistic Results	360
	Summary	361
	Key Terms	361
	List of Formulas	361
	Exercises	363

UNIT IV MANAGERIAL DECISIONS AT THE MARKET LEVEL

10 Market Structure and Business Organization 367

10.1	Perfect Competition	368
10.1.1	Characteristics of Perfect Competition	368
10.1.2	Profit Maximization for Competitive Firms	369
10.1.3	The Decision to Shut Down	373
10.1.4	The Competitive Firm in the Long Run	377
10.2	Monopoly	381
10.2.1	Monopoly's Equilibrium in the Short Run	381
10.2.2	Monopoly's Equilibrium in the Long Run	385
10.2.3	Monopoly Power and the Lerner Index	388
10.3	Monopolistic Competition	389
10.3.1	Monopolistic Competition Equilibrium in the Short Run	390
10.3.2	Monopolistic Competition Equilibrium in the Long Run	391
10.4	Oligopoly	393
10.4.1	The Concentration Ratio and the Herfindahl Index	394
10.4.2	Models of Oligopoly	395
	Cournot Model	395
	Stackelberg Model	399
	Bertrand Model	403
	Sweezy Model	407

Summary	410
Key Terms	411
List of Formulas	411
Exercises	412
11 Pricing Decisions and Practices	414
11.1 Basics of Price Setting	414
11.2 The Markup Rule	415
11.3 Multiproduct Pricing Strategies	418
11.4 Joint Products with Independent Demands	419
11.4.1 Product Set of Fixed Proportions	419
11.4.2 Product Set of Variable Proportions	421
11.5 Transfer Pricing	423
11.5.1 The Intermediate Product in a Perfectly Competitive Market	424
11.5.2 The Intermediate Product in an Imperfectly Competitive Market	429
11.6 Pricing Strategies and Practices	430
11.7 Price Discrimination	433
11.7.1 First-Degree Price Discrimination	434
11.7.2 Second-Degree Price Discrimination	436
11.7.3 Third-Degree Price Discrimination	437
Summary	445
Key Terms	446
List of Formulas	446
Exercises	447

UNIT V MANAGERIAL DECISIONS IN THE LONG RUN

12 Capital Budgeting and Investment Project Evaluation	451
12.1 What is Capital Budgeting?	451
12.2 Basic Model of Capital Budgeting	453
12.3 Selection Process and Project Evaluation	454
12.4 Methods of Evaluation for Proposed Investment Projects	455
12.4.1 Net Present Value	455
12.4.2 Internal Rate of Return	459
12.4.3 NPV versus IRR for Mutually Exclusive Projects	462
12.4.4 NPV Profile, Crossover Rate, and the Ranking Reversal	465
12.5 Profitability Index and Capital Rationing	467
12.6 Payback Method	469
12.7 Cost of Capital	471
12.7.1 Cost of Debt Capital	472
12.7.2 Cost of Equity Capital	473
The CAPM Estimation	473
The Dividend Valuation Estimation	474
12.7.3 The Weighted Marginal Cost of Capital	476
12.7.4 Capitalization and Capitalized Cost	478
12.7.5 Last Words on the Cost of Capital	481

Summary	481
Key Terms	483
List of Formulas	483
Exercises	485
13 Risk Analysis and Managerial Decisions under Uncertainty	487
13.1 Risk and Uncertainty	487
13.2 Sources of Risk	488
13.2.1 Economic Sources	488
13.2.2 Political Sources	488
13.2.3 Social Sources	489
13.2.4 International Sources	489
13.3 Measurement of Risk	489
13.3.1 The Absolute Measure	490
13.3.2 The Relative Measure	495
13.4 Risk Aversion	495
13.5 Risk Attitudes and Utility of Money	496
13.6 Expected Utility of Money versus Expected Monetary Return	498
13.7 Risk Discount and Certainty Equivalent	501
13.8 Risk Impact on the Valuation Model	503
13.8.1 Risk Premium Adjustment	503
13.8.2 Certainty-Equivalent Adjustment	506
13.9 Diversifiable versus Nondiversifiable Risk	509
13.10 Portfolio Risk	510
13.11 Risk of Two-Asset Portfolio	518
13.12 Lending and Borrowing at the Risk-Free Rate of Return	520
13.13 Measuring the Systematic Risk by Beta (β)	522
13.14 The CAPM Model	525
13.15 The Security Market Line (SML)	526
13.15.1 SML Shift by Inflation	527
13.15.2 SML Swing by Risk Aversion	528
13.16 Managerial Decision Tree	532
13.17 Mathematical Simulation and Sensitivity Analysis	533
13.18 Advanced Choice under Risk, Ambiguity, and Uncertainty	536
13.18.1 Stochastic Dominance	536
Assumptions	537
Expected Utility	537
First-Degree Stochastic Dominance	537
Interpretation of FSD Conditions	538
Second-Degree Stochastic Dominance	538
Interpretation of FSD Conditions	538
Applications of SSD Conditions	539
13.18.2 Choice under Ambiguity	539
13.18.3 Choice under Uncertainty	539
Summary	541
Key Terms	542

List of Formulas	543
Exercises	544
14 Management Consultants and Information	546
14.1 Measuring Information and Its Impact on Uncertainty	546
14.2 Perfect Management Information	548
14.3 Valuing Perfect Management Information	549
14.4 Valuing Less-than-Perfect Management Information	549
Summary	556
Key Terms	557
List of Formulas	557
Exercises	558
APPENDIX	560
FURTHER READING	569
INDEX	573
