and Nu	rition	xxi
Part I	Expert interview with Dr R. Bruce Tompkin	1
1 Inte	rview with a food safety expert: Dr R. Bruce Tompkin	3
R. E	B. Tompkin, Retired, USA and J. Sofos, Colorado	
Stat	e University, USA	
1.1	Food safety: past and current	4
1.2	Food safety management systems	13
1.3	Future efforts to further control food safety concerns	17
1.4	References	22
Part II	Pathogen updates	23
2 Pat	hogen update: Salmonella	25
Т. Н	lald, DTU, Denmark	
2.1	Introduction	25
2.2	Incidence and burden of human salmonellosis	26
2.3	Epidemiology and disease transmission in humans	- 28
2.4	Classification and subtypes	30
2.5	Tracing the sources of human salmonellosis – source	
	attribution	31
2.6	Discussion on sources of human salmonellosis	39
2.7	References	41

. .

3	Patho	gen update: Listeria monocytogenes	47
	J. Che	n and K. Nightingale, Texas Tech, USA	
	3.1	The genus Listeria, L. monocytogenes and listeriosis	47
	3.2	Listeriosis: epidemiology, virulence factors and	
		evolution	48
	3.3	In vitro and in vivo models to assess virulence	51
	3.4	Ecology, transmission and genetic diversity	
		of L. monocytogenes	53
	3.5	Regulations and risk assessments	59
	3.6	Conclusions	60
	3.7	References	60
4	Patho	gen update: Bacillus species	70
	F. Car	lin, INRA, France and C. Nguyen-The, INRA, France	
	4.1	Introduction	70
	4.2	Bacillus cereus in food: characterization and	•
		taxonomy	71
	4.3	Poisoning caused by <i>B. cereus</i> and other <i>Bacillus</i> spp	76
	4.4	Control of <i>Bacillus</i> species in foods and food	
		processing	83
	4.5	Conclusion	86
	4.6	References	87
