Acknowledgements	XI
CHAPTER 1	
Introduction	1
1.1 Introducing communicative behaviour	1
1.1.1 Social life and the need of communication	2
1.1.2 Linguistic perspectives on communication and language	4
1.1.3 Biological perspectives on communication	6
1.1.4 Comparing linguistic and biological perspectives	9
1.2 Major themes in comparisons between human and animal communication	10
1.2.1 Hockett's design features	10
1.2.2 Methodology and research questions	11
1.2.3 Do animals use displacement?	12
1.2.4 Do animals have combinatorial principles?	14
1.2.5 Do animal systems have arbitrary content/form relations? Do animals learn the system?	14
1.2.6 How did language evolve?	18
1.3 Parent-offspring communication and cooperative breeding	19
1.4 Summary	22
1.5 Suggested readings	22
CHAPTER 2	
Overview of biological signal systems	23
2.1 Introduction	23
2.2 Research methods and observational techniques	24
2.2.1 Playback as a method for investigating communication	24
2.2.2 Advances in technology influence the methods	25
2.3 Acoustic communication	26
2.3.1 When and where?	27
2.3.2 How? Production and perception	27
2.3.3 Echolocation and other sounds in dolphins and whales	29

- 2.4 Visual communication 32
 - 2.4.1 When and where? 33
 - 2.4.2 How? Visual capacities 33
 - 2.4.3 Colour patterns 34
 - 2.4.4 Body postures and facial expressions 34
- 2.5 Tactile communication 35
 - 2.5.1 When and where? 35
 - 2.5.2 How? Skin, whiskers and sidelines 36
- 2.6 Indirect tactile signals – the seismic signal system 37
- 2.7 Chemical communication 38
 - 2.7.1 When and where? 38
 - 2.7.2 How? 39
 - 2.7.3 The olfactory system 41
- 2.8 Electrical communication 42
- 2.9 The multimodal honeybee – acoustic, visual, chemical, seismic communication 42
- 2.10 Summary 45
- 2.11 Suggested readings 45

CHAPTER 3

Human language – its use and learning

47

- 3.1 Introduction 47
 - 3.1.1 Social life and the languages of the world 48
 - 3.1.2 Observation techniques 51
 - 3.1.3 Language functions 53
- 3.2 The child's discovery of language – the first year of life 54
 - 3.2.1 Parent-infant interaction 54
 - 3.2.2 The “little universalist” – early perception of speech sounds 56
 - 3.2.3 Early vocalization – babbling 57
- 3.3 Language in the toddler 59
 - 3.3.1 Mapping forms to meanings 59
 - 3.3.2 Cultural differences reflected in children's language 60
 - 3.3.3 Words and world-views – what do you call your cousin? 62
 - 3.3.4 But what about grammar? 66
 - 3.3.5 Recursion 68
- 3.4 When problems arise – Specific Language Impairment 70
- 3.5 Second language acquisition – organizing language once again 72
- 3.6 Sign language – another modality 75
- 3.7 Summary 76
- 3.8 Suggested readings 77

CHAPTER 4**Human nonverbal communication****79**

- 4.1 Introduction 79
 - 4.1.1 Research methods and observation techniques 80
- 4.2 Functions – what do we use nonverbal communication for? 81
 - 4.2.1 Permanent versus temporary expressions 82
 - 4.2.2 Synchronising in sympathy 83
- 4.3 Acoustic communication 84
 - 4.3.1 Extralinguistic expressions – laughters and cries 84
 - 4.3.2 Paralinguistic expressions – with speech 85
- 4.4 Visual communication 86
 - 4.4.1 Body postures 86
 - 4.4.2 Hand movements – pointing 86
 - 4.4.3 Other hand gestures 89
 - 4.4.4 Head and face 89
 - 4.4.5 Eyes and gaze 92
 - 4.4.6 Complexion 94
- 4.5 Tactile communication 94
- 4.6 Chemical communication 96
- 4.7 A model for analyzing gestures – The Ekman and Friesen model 98
- 4.8 Where verbal and nonverbal communication meet:
 - Speech-related gestures 100
 - 4.8.1 The McNeill model 101
 - 4.8.2 Using knowledge of nonverbal expressions in verbal descriptions 103
- 4.9 When production is not automatized 106
- 4.10 Summary 107
- 4.11 Suggested readings 108

CHAPTER 5**Our closest relatives – nonhuman primates****109**

- 5.1 Introduction 109
 - 5.1.1 The primate family 109
 - 5.1.2 Social life 110
 - 5.1.3 Studying nonhuman primates – how it all began 112
 - 5.1.4 Observation techniques 113
- 5.2 Communicative functions 115
 - 5.2.1 The referential function – first reported in vervet monkeys 115
 - 5.2.2 The social function – with focus on synchronization of behaviour 118

- 5.3 Acoustic communication 119
 - 5.3.1 Some vocalizations and their use 120
 - 5.3.2 Vocal learning in nonhuman primates 121
 - 5.3.3 Structural aspects of vocalizations – do nonhuman primates have syntax? 122
- 5.4 Visual communication 122
 - 5.4.1 Body postures 123
 - 5.4.2 Hand and arm gestures 123
 - 5.4.3 Face and gaze 125
- 5.5 Tactile communication – a lot of grooming 126
- 5.6 Chemical communication 127
- 5.7 Cultural/dialectal differences – results of social learning 128
- 5.8 Teaching human language to nonhuman primates 129
 - 5.8.1 Speech 129
 - 5.8.2 Sign language 130
 - 5.8.3 Plastic chips 132
 - 5.8.4 Computers and lexigrams 133
- 5.9 Discussion – primary versus secondary communication in nonhuman primates 135
 - 5.9.1 Primary communication – data base 135
 - 5.9.2 Primary communication – functions and structures 136
 - 5.9.3 Secondary communication – human language as a second variety 137
- 5.10 Summary 137
- 5.11 Suggested readings 138

CHAPTER 6

Man's best friend – the dog

139

- 6.1 Introduction 139
 - 6.1.1 The Canine class 140
 - 6.1.2 Social life of wolves and dogs 143
 - 6.1.3 Observation techniques 145
- 6.2 Functions of Canine communication 146
 - 6.2.1 Social functions 146
 - 6.2.2 Studies of the referential function 147
- 6.3 Acoustic communication 148
 - 6.3.1 Barking 150
 - 6.3.2 Growling 151
 - 6.3.3 Chorus howling in wolves 151

6.4	Visual communication	152
6.4.1	Head and face	152
6.4.2	Tail	153
6.5	Tactile communication	154
6.6	Chemical communication	154
6.7	Developmental patterns in intra-specific communication	155
6.8	The dog in the human family – learning to communicate with another species	156
6.8.1	Dogs' understanding of humans	157
6.8.2	Humans' understanding of dogs	158
6.8.3	Not interactional synchrony – but accommodation	158
6.9	Summary	160
6.10	Suggested readings	160

CHAPTER 7

Communication in birds

163

7.1	Introduction	163
7.1.1	The Aves class	163
7.1.2	Social life of birds	165
7.1.3	Observation techniques	166
7.2	Functions – why do birds communicate?	167
7.2.1	Alignment of songs – counter-singing and duetting	168
7.2.2	Referential function in birds – the calls of the domestic fowl	169
7.3	Acoustic communication	171
7.3.1	Variation across and within species	172
7.3.2	Structural aspects of song	174
7.4	Learning how to sing	176
7.4.1	Sensitive phases and developmental stages	177
7.4.2	Dialectal differences	181
7.5	Visual communication	182
7.5.1	Talking with the tail	182
7.6	Chemical communication	183
7.7	Birds and humans	183
7.7.1	Teaching language to birds	183
7.8	Summary	186
7.9	Suggested readings	186

CHAPTER 8

Discussion and outlook – why language?	187
8.1 Introduction	187
8.1.1 Social life and communication in humans and animals	188
8.2 What is so special about language? Revisiting Hockett's predictions	189
8.3 Why and how did language evolve?	191
8.3.1 Why and when did it happen?	191
8.3.2 Are there any parallel changes in human physiology?	193
8.3.3 Is language a result of cooperative breeding?	195
8.4 Learning intraspecific communication – not only for humans	195
8.4.1 Child language and animal communication	196
8.5 Can language be taught to nonhumans?	198
8.6 Summary	199
8.7 Suggested readings	199
Glossary	201
References	205
Index	241
