<b>Preface</b>	<i>page</i> ix
<b>Contributors</b>	xii
<b>Our Founders</b>	xiii
<b>Introduction</b>	xv
<b>PART I SIMPLE TYPES <math>\lambda_{\rightarrow}^A</math></b>	<b>1</b>
<b>1 The Simply Typed Lambda Calculus</b>	<b>5</b>
1.1 The systems $\lambda_{\rightarrow}^A$	5
1.2 First properties and comparisons	19
1.3 Normal inhabitants	32
1.4 Representing data types	38
1.5 Exercises	50
<b>2 Properties</b>	<b>55</b>
2.1 Normalization	55
2.2 Proofs of strong normalization	64
2.3 Checking and finding types	68
2.4 Checking inhabitation	77
2.5 Exercises	86
<b>3 Tools</b>	<b>94</b>
3.1 Semantics of $\lambda_{\rightarrow}$	94
3.2 Lambda theories and term models	107
3.3 Syntactic and semantic logical relations	114
3.4 Type reducibility	136
3.5 The five canonical term-models	156
3.6 Exercises	181

<b>4</b>	<b>Definability, unification and matching</b>	
	<i>Written with the collaboration of Gilles Dowek</i>	192
4.1	Undecidability of lambda-definability	192
4.2	Undecidability of unification	207
4.3	Decidability of matching of rank 3	213
4.4	Decidability of the maximal theory	230
4.5	Exercises	240
<b>5</b>	<b>Extensions</b>	
	<i>Written in part with the collaboration of Marc Bezem</i>	243
5.1	Lambda delta	243
5.2	Surjective pairing	255
5.3	Gödel's system $\mathcal{T}$ : higher-order primitive recursion	282
5.4	Spector's system $\mathcal{B}$ : bar recursion	303
5.5	Platek's system $\mathcal{Y}$ : fixed point recursion	312
5.6	Exercises	315
<b>6</b>	<b>Applications</b>	323
6.1	Functional programming	323
6.2	Logic and proof-checking	341
6.3	Proof theory	
	<i>Written with the collaboration of Silvia Ghilezan</i>	351
6.4	Grammars, terms and types	
	<i>Written with the collaboration of Michael Moortgat</i>	363
<b>PART II RECURSIVE TYPES <math>\lambda_{\leq}^A</math></b>		
<i>Written with the collaboration of Felice Cardone and Mario Coppo</i>		377
<b>7</b>	<b>The Systems <math>\lambda_{\leq}^A</math></b>	379
7.1	Type algebras and type assignment	379
7.2	More on type algebras	390
7.3	Recursive types via simultaneous recursion	397
7.4	Recursive types via $\mu$ -abstraction	407
7.5	Recursive types as trees	424
7.6	Special views on trees	437
7.7	Exercises	442
<b>8</b>	<b>Properties of Recursive Types</b>	451
8.1	Simultaneous recursions vs $\mu$ -types	451
8.2	Properties of $\mu$ -types	455
8.3	Properties of types defined by a simultaneous recursion	475
8.4	Exercises	490

<b>9</b>	<b>Properties of Terms with Types</b>	494
9.1	First properties of $\lambda_{\underline{=}}^A$	494
9.2	Finding and inhabiting types	497
9.3	Strong normalization	507
9.4	Exercises	518
<b>10</b>	<b>Models</b>	520
10.1	Interpretations of type assignments in $\lambda_{\underline{=}}^A$	520
10.2	Interpreting $\Pi_{\mu}$ and $\Pi_{\mu}^*$	525
10.3	Type interpretations in systems with explicit typing	541
10.4	Exercises	547
<b>11</b>	<b>Applications</b>	554
11.1	Subtyping	554
11.2	The principal type structures	567
11.3	Recursive types in programming languages	570
11.4	Further reading	573
11.5	Exercises	576
 <b>PART III INTERSECTION TYPES <math>\lambda_{\cap}^S</math></b>		
<i>Written with the collaboration of Fabio Alessi, Mariangiola Dezani-Ciancaglini, Furio Honsell and Paula Severi</i>		577
<b>12</b>	<b>An Example System</b>	579
12.1	The type assignment system $\lambda_{\cap}^{BCD}$	580
12.2	The filter model $\mathcal{F}^{BCD}$	586
12.3	Completeness of type assignment	589
<b>13</b>	<b>Type Assignment Systems</b>	591
13.1	Type theories	594
13.2	Type assignment	606
13.3	Type structures	610
13.4	Filters	614
13.5	Exercises	617
<b>14</b>	<b>Basic Properties of Intersection Type Assignment</b>	619
14.1	Inversion lemmas	622
14.2	Subject reduction and expansion	627
14.3	Exercises	634
<b>15</b>	<b>Type and Lambda Structures</b>	640
15.1	Meet semi-lattices and algebraic lattices	643

15.2	Natural type structures and lambda structures	656
15.3	Type and zip structures	662
15.4	Zip and lambda structures	667
15.5	Exercises	676
<b>16</b>	<b>Filter Models</b>	<b>680</b>
16.1	Lambda models	683
16.2	Filter models	689
16.3	$\mathcal{D}_\infty$ models as filter models	701
16.4	Other filter models	716
16.5	Exercises	724
<b>17</b>	<b>Advanced Properties and Applications</b>	<b>728</b>
17.1	Realizability interpretation of types	730
17.2	Characterizing syntactic properties	735
17.3	Approximation theorems	742
17.4	Applications of the approximation theorem	757
17.5	Undecidability of inhabitation	
	<i>Written with the collaboration of Paweł Urzyczyn</i>	762
17.6	Exercises	786
	<b>References</b>	<b>791</b>
	<b>Indices</b>	<b>814</b>
	<b>Index of terms</b>	<b>815</b>
	<b>Index of citations</b>	<b>823</b>
	<b>Index of symbols</b>	<b>828</b>
