Contents

The Nexus Between Artificial Intelligence and Economics 1
1 Introduction 1
2 Technological Progress: Logistic Growth or Singularity 2
2.1 Empirical Evidence in Favor of the Singularity 4
2.2 Living Forever: Methuselarity 5
2.3 The Avatar Roadmap to Human Immortality 5
2.4 Obstacles to Reaching the Singularity 6
3 Artificial Intelligence 9
3.1 Definition of Artificial Intelligence 10
3.2 Scope and Approaches of Artificial Intelligence 15
3.3 Applications of Artificial Intelligence 26
4 Artificial Happiness 30
4.1 What is Happiness? 31
4.2 What Makes People Happy? 31
4.3 The Current State of Artificial Happiness 33
4.4 Cosmetic Happiness 34
4.5 Synthetic Happiness 34
4.6 Money and Happiness 35
4.7 Pharmacological Avenues to Intelligence? 36
4.8 Can Artificial Intelligence Increase Happiness? 36
5 Issues in Artificial Intelligence 37
5.1 Competition Between Humans and Computers 37
5.2 Threatening Artificial Intelligence 39
5.3 Friendly Artificial Intelligence 40
5.4 Social Nature of Artificial Intelligence 42
5.5 Artificial Intelligence and Robotics 43
5.6 Whole Brain Emulation 54
5.7 Creating Artificial Live: ALife 64
5.8 Artificial Consciousness and Emotions 69
5.9 Artificial Stupidity 81

6 Artificial Intelligence in Economics. 81
6.1 ACE Research Areas 84
6.2 Criticism Against ACE 89
6.3 Open Issues for ACE Research 90
6.4 Potential Costs and Benefits 93
7 The Economics of Artificial Intelligence 94
7.1 Implications of AI for Economic Theory: Back to the Future 94
7.2 Economic History and the Singularity 95
7.3 Economics of Human–Machine Interaction 97
7.4 Methuselarity and Economic Behavior 99
8 State of the Art and Challenges for AGI 100
8.1 The Future of Artificial Intelligence 103
