CONTENTS

Preface **xi**

1 **BASIC MATHEMATICAL REDUNDANCY MODELS** **1**
- 1.1 Types of Models 2
- 1.2 Non-repairable Redundant Group with Active Redundant Units 3
- 1.3 Non-repairable Redundant Group with Standby Redundant Units 7
- 1.4 Repairable Redundant Group with Active Redundant Units 10
- 1.5 Repairable Redundant Group with Standby Redundant Units 13
- 1.6 Multi-level Systems and System Performance Estimation 15
- 1.7 Brief Review of Other Types of Redundancy 16
- 1.8 Time Redundancy 24
- 1.9 Some Additional Optimization Problems 27

Chronological Bibliography of Main Monographs on Reliability Theory (with topics on Optimization) 30

2 **FORMULATION OF OPTIMAL REDUNDANCY PROBLEMS** **33**
- 2.1 Problem Description 33

Ushakov, Igor A.
Optimal resource allocation
2013

digitalisiert durch:
IDS Luzern

2.2 Formulation of the Optimal Redundancy Problem with a Single Restriction 35
2.3 Formulation of Optimal Redundancy Problems with Multiple Constraints 39
2.4 Formulation of Multi-Criteria Optimal Redundancy Problems 43
Chronological Bibliography 45

3 METHOD OF LAGRANGE MULTIPLIERS 48
Chronological Bibliography 55

4 STEEPEST DESCENT METHOD 56
4.1 The Main Idea of SDM 56
4.2 Description of the Algorithm 57
4.3 The Stopping Rule 60
4.5 Approximate Solution 66
Chronological Bibliography 68

5 DYNAMIC PROGRAMMING 69
5.1 Bellman's Algorithm 69
5.2 Kettelle's Algorithm 73
Chronological Bibliography 84

6 UNIVERSAL GENERATING FUNCTIONS 85
6.1 Generating Function 85
6.2 Universal GF (U-function) 87
Chronological Bibliography 94

7 GENETIC ALGORITHMS 96
7.1 Introduction 96

7.2 Structure of Steady-State Genetic Algorithms 100
7.3 Related Techniques 102
Chronological Bibliography 104

8 **MONTE CARLO SIMULATION** **107**
8.1 Introductory Remarks 107
8.2 Formulation of Optimal Redundancy Problems in Statistical Terms 108
8.3 Algorithm for Trajectory Generation 108
8.4 Description of the Idea of the Solution 111
8.5 Inverse Optimization Problem 114
8.6 Direct Optimization Problem 124
Chronological Bibliography 129

9 **COMMENTS ON CALCULATION METHODS** **130**
9.1 Comparison of Methods 130
9.2 Sensitivity Analysis of Optimal Redundancy Solutions 135

10 **OPTIMAL REDUNDANCY WITH SEVERAL LIMITING FACTORS** **142**
10.1 Method of "Weighing Costs" 142
10.2 Method of Generalized Generating Functions 146
Chronological Bibliography 149

11 **OPTIMAL REDUNDANCY IN MULTISTATE SYSTEMS** **150**
Chronological Bibliography 170

12 **CASE STUDIES** **172**
12.1 Spare Supply System for Worldwide Telecommunication System Globalstar 172

12.2 Optimal Capacity Distribution of Telecommunication Backbone Network Resources 179
12.3 Optimal Spare Allocation for Mobile Repair Station 183
Chronological Bibliography 190

13 **COUNTER-TERRORISM: PROTECTION RESOURCES ALLOCATION** **191**
13.1 Introduction 191
13.2 Written Description of the Problem 192
13.3 Evaluation of Expected Loss 195
13.4 Algorithm of Resource Allocation 197
13.5 Branching System Protection 201
13.6 Fictional Case Study 210
13.7 Measures of Defense, Their Effectiveness, and Related Expenses 217
13.8 Antiterrorism Resource Allocation under Fuzzy Subjective Estimates 223
13.9 Conclusion 232
Chronological Bibliography 232

About the author **235**
