Preface	I
List of participants	III
Contents	VII

Keynote lectures

An orchard without fungicides: a promise or utopia of biotechnology? <i>Cesare Gessler, Giovanni A. L. Brogini</i>	3-10
Integrated Fruit Production: Potential, constraints and challenges in year 2012 <i>Carlo Malavolta</i>	11-12
Integrated fruit protection studies in Turkey <i>Biröl Akbaş</i>	13-15

Session 1. Biological control of pests and diseases in fruit production

Reduction of fungicide use and risk in fruit production: are we ready for alternatives? <i>Ilaria Pertot</i>	19-22
Biopesticides for integrated fruit production in Europe: obstacles and perspectives <i>Massimo Benuzzi, Edith Ladurner</i>	23-29
FresaProtect and BerryProtect: control of aphids through constant presence of complementary parasitoids <i>Thierry Thielemans, Nicolas Dassonville, Virginie Gosset, Viola Rosemeyer</i>	31-35
Investigation on adulticide bait (Spintor-Fly [®]) to control the cherry fruit fly in Emilia-Romagna (North Italy). Trials 2010-2012 <i>Stefano Caruso, Maria Grazia Tommasini, Giovanni Barbari</i>	37-42
Improving persistence of entomopathogenic nematodes in aboveground applications for pest control in apple orchards <i>Tim Belien, Stijn Huysecom, Nick Berkvens, Nicole Viaene, Wannes Keulemans, Dany Bylemans</i>	43-47
Effectiveness of entomopathogenic nematodes in the control of chestnut carpophagous Lepidoptera <i>Stefano Caruso, Alberto Reggiani, Nazareno Reggiani, Massimo Bariselli, Giovanna Curto</i>	49-52
Survival of potentially beneficial organisms: <i>Bacillus subtilis</i> , <i>Pseudomonas vranovensensis</i> and <i>Cryptococcus albidus</i> in phyllosphere environment under laboratory conditions <i>Dorota Remlein-Starosta, Jolanta Kowalska</i>	53-57

Isolation of antagonistic fungi towards <i>Venturia inaequalis</i> and preliminary applications in sanitation practice reducing ascospore inoculums <i>Riccardo Fiaccadori, Ivan Portillo, Roberta Roberti, Agostino Brunelli</i>	59-66
--	-------

Session 2. What IFP can learn from the organic fruit production: case studies

What can integrated fruit production learn from organic? <i>Uygun Aksoy, Ahmet Altindisli</i>	69-71
The use of inorganic compounds to control apple scab in integrated fruit production <i>Davide Profaizer, Mario Baldessari, Graziano Giuliani, Gino Angeli</i>	73-79
Contrasting effects of codling moth exclusion netting on the natural control of the rosy apple aphid <i>Gaëlle Marliac, Sylvaine Simon, Amandine Fleury, Aude Alaphilippe, Hazem Dib, Yvan Capowiez</i>	81-85
Organic soil management to prevent soil sickness during integrated fruit production <i>Davide Neri</i>	87-99
The effect of different leaf removal systems and fungicide combinations on phytophagous pests and predatory mite populations, and yield of organic Sultani Cekirdeksiz grape variety <i>Fatma Özsemerci, F. Özlem Altindisli, Fadime Ates, Ahmet Altindisli, Cigdem Takma</i>	101-109
The hail-nets against codling moth and their influence on the behavior of moth species harmful to the pear tree in Emilia-Romagna (Italy) <i>Edison Pasqualini, Stefano Caruso, Matteo Piccinini, Fiorenzo Salvatorelli, Francesca Ventura, Stefano Maini</i>	111-114

Session 3. Integrated control of pome fruit arthropod pests

Importance of naturally occurring predators for pear sucker control <i>Michelle T. Fountain, Csaba Nagy, Adrian Harris, Jerry V. Cross</i>	117-125
Adaptation to exclusion netting of the codling moth (<i>Cydia pomonella</i> L.) in apple orchards <i>Myriam Siegwart, Mylène Pierrot, Jean-François Toubon, Sandrine Maugin, Claire Lavigne</i>	127-131
Semantics and emergent web-3 technologies: modern challenges for Integrated Fruit Production systems towards internationalization <i>Petros Damos</i>	133-142
Effects of amitrole (3-amino-1,2,4-triazole) on the common earwig <i>Forficula auricularia</i> L. (Dermaptera: Forficulidae) <i>Herman Helsen, Kees Booij</i>	143-146
Residual toxicity of six reduced-risk insecticides to codling moth eggs and neonate larvae <i>Daniel Cormier, Francine Pelletier, Gérald Chouinard</i>	147-151

Life table demography and population growth of dusky-veined walnut aphid, <i>Panaphis juglandis</i> (Goeze) (Hem., Callaphididae) on different walnut cultivars <i>Evin Polat Akköprü, Remzi Atlıhan</i>	153-154
Applied chemical ecology; filling the volatile gap <i>Marco Tasin, Anders Aak, Mario Porcel Vilchez, Hans Ragnar Norli, Geir K. Knudsen</i>	155-157
Susceptibility to spirotetramat and abamectin of pear psylla <i>Cacopsylla pyri</i> L. (Hemiptera: Psyllidae) in Northern Italy <i>Stefano Civolani, Mauro Boselli, Alda Butturini, Stefano Cassanelli</i>	159-163
Garden chafer (<i>Phyllopertha horticola</i>) and European cockchafer (<i>Melolontha melolontha</i>) monitoring of beetles and white grubs in the orchard <i>Zofia Pluciennik, Barbara H. Łabanowska</i>	165-168
Coragen 200 SC – selective insecticide for the control of codling moth (<i>Cydia pomonella</i> L.) <i>Zofia Pluciennik</i>	169-171
On the track of insects responsible for misshaped apples <i>Patrik Kehrli, Denis Pasquier</i>	173-174
Species variation and abundance of thrips (Thysanoptera) and their natural enemy species in chemically treated and untreated vineyards <i>Fatma Özsemerci, İrfan Tunc, Tulin Aksit</i>	175-184
Influence of hail-nets against Codling moth on the main adversities of pears: first observations carried out in Emilia-Romagna (Northern Italy) during the years 2011 and 2012 <i>Stefano Vergnani, Stefano Caruso, Edison Pasqualini</i>	185-188
Determination of the susceptibility level of the predatory mite <i>Neoseiulus californicus</i> (Acari: Phytoseiidae) populations collected from the apple orchards in Isparta to etoxazole by using bioassay, synergists and detoxification enzymes levels <i>Sibel Yorulmaz Salman, Recep Ay</i>	189-190
Resistance of <i>Cydia pomonella</i> (L.) (Lepidoptera: Tortricidae) to thiacloprid and activities of some detoxification enzymes collected from an apple orchard in Isparta <i>Mesut İşci, Recep Ay</i>	191-192

Session 4. Behavior modifying chemicals: prospects and constraints in IFP

Semiochemicals: the essence of green pest control <i>Marco Tasin, Orkun Baris Kovanci</i>	195-197
Evaluation of Puffer [®] CM, a release device of pheromone to control codling moth on apple in Italy <i>Mario Baldessari, Claudio Ioriatti, Gino Angeli</i>	199-204
Four years of mating disruption for the control of plum fruit moth <i>Cydia funebrana</i> (Treitschke), in plum orchard in Emilia-Romagna region (North Italy) <i>Marco Ardizzoni, Andrea Iodice, Stefano Caruso</i>	205-208

Control of oriental fruit moth, <i>Cydia molesta</i> , in the peach orchards of South-Eastern Bulgaria, using CIDETRAK® OFM-L dispensers <i>Hristina Kutinkova, Vasily Dzhuvinov, Bill Lingren</i>	209-213
General situation of Sumitomo registered pheromone dispensers against fruit insect pests <i>Turkan Koclu, Orhan Akin, Meksen Yagmur, Rahmi Temirtas, Mehmet Coskun, Gokhan Tunalı, Ibrahim Fidanci, Huseyin Gunduz</i>	215-218
Efficacy evaluation of RAK 2 PRO dispensers against <i>Lobesia botrana</i> on Sultani Cekirdeksiz grapes in Turkey <i>F. Özlem Altindisli, Fatma Özsemerci</i>	219-225

Session 5. Pest and disease monitoring and forecasting

PREMISE, a prototype of an empirical model of the epidemiology of apple scab for economic assessment of IPM tools <i>Bart Heijne, Wil Hennen, Jan Buurma</i>	229-234
Past and current situation of forecasting system in Turkey <i>N. Mukerrem Celiker, Ayse Özdem, Ercan Canihos, Cevdet Kaplan, Nursen Ustun, Naim Öztürk, F. Özlem Altindisli</i>	235-241
Decision support for sustainable management of the main orchard pests with the Swiss forecasting system SOPRA <i>Jörg Samietz, Heinrich Höhn, Elisabeth Razavi, Lukas Schaub, Benno Graf</i>	243-251
Real time pest modeling through the World Wide Web: decision making from theory to praxis <i>Petros Damos, Sotiris Karabatakis</i>	253-258
Biology of grape thrips [<i>Rubiothrips vitis</i> (Priesner) (Thysanoptera: Thripidae)] and their damage to the Sultani Cekirdeksiz (<i>Vitis vinifera</i> L.) vineyards of Manisa, Turkey <i>Fatma Özsemerci, Tulin Aksit, Irfan Tunc</i>	259-267
DNA barcoding: an innovative tool to identify internal lepidopterans in apples <i>Annabelle Firlej, Jean-Philippe Légaré, Jean-François Landry, Richard Hogue, Gérald Chouinard, Daniel Cormier</i>	269-271
Present status of olive knot disease caused by <i>Pseudomonas savastanoi</i> pv. <i>savastanoi</i> in Aegean region of Turkey <i>Nursen Üstün, Nezih Arslan</i>	273-277

Session 6. Integrated control in soft fruits

The possibility to control the big bud mite (<i>Cecidophyopsis ribis</i> Westw.) on blackcurrant in Poland with a new active ingredient spirotetramat (Movento 100 SC) <i>Barbara H. Łabanowska, Mirosław Korzeniowski</i>	281-286
Evaluation of integrated strawberry production field recording process in Atibaia, São Paulo State, Brazil <i>Fagoni Fayer Calegario, Maria Carolina Pezzo Kmit, Antonio Luiz Cerdeira</i>	287-291

Impact of the methods of cultivation on the size of pest populations in raspberry plantations in Latvia <i>Apenīte Ilze, Ciematnieks Rinalds</i>	293-296
Movento 100 SC – efficacy in the control of aphids on blackcurrant plantations in Poland <i>Barbara H. Łabanowska, Tomasz Gasparski, Mirosław Korzeniowski</i>	297-300

Session 7. *Drosophila suzukii*

The Swiss approach to combat <i>Drosophila suzukii</i> <i>Patrik Kehrli, Serge Fischer, Christian Linder, Jörg Samietz,</i> <i>Catherine Baroffio</i>	303-304
Short range communication in <i>Drosophila suzukii</i> <i>Valerio Mazzoni, Gianfranco Anfora, Meta Virant-Doberlet</i>	305-307
Olfactory responses of <i>Drosophila suzukii</i> to host plant volatiles <i>Santosh Revadi, Francesca Eccher, Valerio Mazzoni, Shuhub Al Ani,</i> <i>Silvia Carlin, Urska Vrhovsek, Gianfranco Anfora</i>	309-313
<i>Drosophila suzukii</i> in the USA; monitoring and management in berries and cherries <i>Peter W. Shearer, Elizabeth H. Beers, Preston Brown, Hannah J. Burrack,</i> <i>Rufus Isaacs, Jana Lee, Betsey Miller, Lauren Novotny, Steve Van Timmeren,</i> <i>Robert Van Steenwyk, Vaughn Walton, Caroline Wise</i>	315-316
The potential economic impact of <i>Drosophila suzukii</i> on small fruits production in Trentino (Italy) <i>Giorgio De Ros, Gianfranco Anfora, Alberto Grassi, Claudio Ioriatti</i>	317-321
DROSKII: a transnational attempt for insight on the damage potential of <i>Drosophila suzukii</i> and on the development of risk management and control measures <i>Sauro Simoni, Peter Baufeld, Phil Northing, Howard Bell, Elisabetta Gargani,</i> <i>Andrew Cuthbertson, Christa Lethmayer, Alois Egartner, Sylvia Bluemel,</i> <i>Patrik Kehrli, Gianfranco Anfora, Alberto Grassi, Catherine Baroffio,</i> <i>Alberto Masci, Christian Linder, Claudio Ioriatti</i>	323-326

Session 8. Integrated plant protection of diseases in fruits

Movement and dispersal of plum pox virus in Turkey <i>Birol Akbaş, Işıl Özdemir, Kemal Değirmenci, M. Selçuk Başaran</i>	329-336
Molecular detection of apple chlorotic leaf spot virus in different hosts in Central Anatolia <i>Kemal Değirmenci, Birol Akbaş</i>	337-343
Reduced sensitivity of <i>Venturia inaequalis</i> to strobilurins and anilinopyrimidines in Italy <i>Riccardo Fiaccadori, Marina Collina, Agostino Brunelli</i>	345-350
Influence of rain protective tree covering on sweet cherry fruit cracking and decay <i>Regina Rancane, Liga Vilka</i>	351-356
Control of brown rot blossom blight (<i>Monilinia laxa</i>) on apricot in organic agriculture <i>Václav Psota, Martin Bagar, Petr Ackermann, Matěj Veselovský</i>	357-360

Screening breeding apple progenies with vf apple scab (<i>Venturia inaequalis</i> (Cke.) Wint.) disease resistance gene specific molecular markers <i>Suat Kaymak, Emel Kaçal, Yusuf Öztürk</i>	361-365
European pear rust control possibilities based on life cycle of the pathogen <i>Baiba Lāce and Inga Moročko-Bičevska</i>	367-370
Sensitivity of <i>Erysiphe necator</i> to quinoxifen in Italian vineyards <i>Marina Collina, Ceren Turan, Ivan Portillo, Leonardo Bacci, Gregory Kemmitt, Agostino Brunelli</i>	371-375
Detection and characterization of phytoplasmas infecting fruit plants in Poland <i>Mirosława Cieślińska, Halina Morgaś, Dorota Kruczyńska, Barbara Kowalik</i> ...	377-382

Session 9. Management of postharvest diseases in Integrated Production

Incidence of <i>Colletotrichum acutatum</i> on apple fruits and possible sources of inoculum <i>Jorunn Børve, Arne Stensvand</i>	385-388
Use of (pulsed) UV-C light to control spore germination and mycelial growth of storage diseases causing fungi, and effect on control of storage rot in apples and pears <i>Marcel Wenneker, Nina Joosten, Ludo Luckerhoff</i>	389-393
Efficiency of cold treatment to cherry fruits infested by Mediterranean fruit fly (<i>Ceratitis capitata</i> Wied.) and cherry fruit fly (<i>Rhagoletis cerasi</i> L.) during storage <i>Turkan Koclu, Özlem Altindisli, Tevfik Turanli, Fatma Özsemerci</i>	395-398

Session 10. Sustainable plant protection strategies to minimize residues in fruit

Management of European cherry fruit fly (<i>Rhagoletis cerasi</i>) with exclusion netting: first results <i>Gisela Brand, Heinrich Höhn, Stefan Kuske, Jörg Samietz</i>	401-404
Zero insecticide residues: the aim of Trentino apple production system <i>Mario Baldessari, Claudio Rizzi, Roberto Larcher, Silvio Canestrini, Claudio Ioriatti</i>	405-409
'Earwig Management Tool': Transferring knowledge of population dynamics and side effects on earwigs (<i>Forficula auricularia</i> L.) into practical sustainable plant protection strategies in pip fruit growing <i>Tim Belien, Rob Moerkens, Herwig Leirs, Gertie Peusens, Dany Bylemans</i>	411-418
Integrated production of grapes for juice in southern Brazil <i>Samar Velho da Silveira, Loiva Maria R. de Mello, Gildo Almeida da Silva, Alexandre Hoffmann, Lucas da Ressurreição Garrido</i>	419-423
The Fruit.Net programme (pome and stone fruit) in Catalonia (NE Spain) <i>Pere Vilardell, Mariano Vilajeliu, Lucía-Adriana Escudero-Colomar, Josep-Lluís Baillori, Ramon Torà, Isidre Llorente, Jordi Cambray, Josep Usall</i>	425-429

Minimising pesticide residues in strawberry through integrated pest, disease and environmental crop management <i>Robert Saville, Angela Berrie, Jean Fitzgerald, Chantelle Jay, Harriet Roberts, Erika Wedgwood, Xiangming Xu, Jerry Cross</i>	431-438
Determination of important parameters for weed control in intensive apple orchards: weed species and its density <i>Ersin Atay, N. Pınar Güzel, Seçkin Gargın, Ahmet Eşitken, Hamza Şenyurt, A. Nilgün Atay, Mesut Altındal, Özgür Çalhan</i>	439-442

Session 11. Climate change and implication for plant protection

Climate change and implication for plant protection: a general view <i>Ahmet Uludag</i>	445-447
Impact of climate change on phenology and sustainable management of the codling moth (<i>Cydia pomonella</i>) <i>Jörg Samietz, Sibylle Stoeckli, Martin Hirschi, Christoph Spirig, Heinrich Höhn, Pierluigi Calanca, Mathias Rotach</i>	449-457
Using Eco-Climatic diagrams to create a model for forecasting <i>Sahin Ince, Vincenzo Verrasto, Francesco Porcelli</i>	459-461

Session 12. Application technology

Orchard spray application in Europe – state of the art and research challenges <i>Jerry Cross, Paolo Balsari, Grzegorz Doruchowski, Jean-Paul Douzals, Andreas Herbst, Paolo Marucco, David Nuyttens, Peter Walklate</i>	465-475
Innovations in orchard spraying: sensor guided precision sprayers <i>Marcel Wenneker, Ard Nieuwenhuizen, Jan van de Zande</i>	477-481
Performance evaluation of two different air injection nozzles in vineyard application <i>Oncul K. Caner, Huseyin Guler, Erkan Urkan, Murat Apaydin</i>	483-492
Evaluation of spray drift in apple orchards of Trentino: comparison of different solutions to reduce environmental contamination <i>Daniel Bondesan, Claudio Rizzi, Gino Angeli, Claudio Ioriatti</i>	493-499
Biological efficacy evaluation of low-drift nozzles compared to classic hollow cone nozzles for chemical control of key pests <i>Cacopsylla pyri</i> (pear sucker) and <i>Eriosoma lanigerum</i> (woolly apple aphid) in apple and pear <i>Eva Bangels, Nico Hendrickx, Tim Belien</i>	501-510

Session 13. Pesticide risk indicators to assess the sustainable use of pesticides in IFP

Building sustainability in European agriculture through the common agricultural policy and sustainable use of pesticides <i>Ettore Capri, Alexandru Marchis, Amalia Kafka</i>	513-517
VIGNETO: a GIS-based model to evaluate environmental impact of the Italian viticulture <i>Matteo Balderacchi, Andrea Di Guardo, Lucrezia Lamastra, Ettore Capri</i>	519-521

Dual indicator set for crop protection sustainability surveys DISCUSS: preconditions for implementation on fruit farms <i>Hilde Wustenberghs, Ilse Delcour, Tessa De Baets, Charles de Schaetzen, Karoline D'Haene, Ludwig Lauwers, Fleur Marchand, Walter Steurbaut, Pieter Spanoghe</i>	523-529
Application of DEXiPM® as a tool to co-design pome fruit systems towards sustainability <i>Aude Alaphilippe, Frédérique Angevin, Jan Buurma, Tito Caffi, Yvan Capowiez, Gabriele Fortino, Bart Heijne, Herman Helsen, Imre Holb, Martina Mayus, Vittorio Rossi, Sylvaine Simon, Jörn Strassemeyer</i>	531-535
How to optimize fruit production systems using Life Cycle Assessment <i>Aude Alaphilippe, Sylvaine Simon, Laurent Brun, Frank Hayer, Gérard Gaillard</i>	537-538
HAIR risk indicators used for evaluating sustainable plant protection in fruit orchards <i>Roel Kruijne</i>	539-543
Worker exposure to plant protection products in the framework of the BROWSE project <i>Kim Doan Ngoc, Erik van den Berg, Richard Glass, Lynn Frewer, Kyriaki Machera, Ettore Capri, Marc Kennedy, Andy Hart, Pieter Spanoghe</i>	545-549
The database PESAP to design pomefruit protection strategies <i>Martina Mayus, Aude Alaphilippe, Jan Buurma, Tito Caffi, Yvan Capowiez, Gabriele Fortino, Bart Heijne, Herman Helsen, Imre Holb, Vittorio Rossi, Sylvaine Simon, Christian Scheer, Martin Trautmann, Jörn Strassemeyer</i>	551-555
Establishment of national maximum residue limits of pesticides used in grapes <i>Alev Burçak, A. Uğur Duru, Meryem Kaya, Ergün Cönger, Öner Tatlı, Özgür Gölge, Suna Dokumacı</i>	557-558
