## Part I Theoretical and Pathophysiological Background

<b>1 History of Heart Rate Variability</b> .....	3
References .....	7
<b>2 Linear, Nonlinear, and Complex Systems</b> .....	9
Linear Systems .....	9
Nonlinear Systems .....	10
Chaos Theory .....	11
Complexity .....	17
Complex Systems Contain Many Constituents Interacting Nonlinearly .....	19
The Constituents of a Complex System Are Interdependent .....	19
A Complex System Possesses a Structure Spanning Several Scales .....	20
A Complex System Is Capable of Emerging Behavior .....	20
Complexity Involves Interplay Between Chaos and Non-chaos .....	21
Complexity Involves Interplay Between Cooperation and Competition .....	21
Monitoring, Predicting, and Managing Complex Systems .....	22
Summary .....	24
Further Readings .....	24
References .....	24
<b>3 The Autonomic Nervous System</b> .....	27
Introduction .....	27
Anatomical Structures .....	28
Supraspinal Autonomic Network .....	28
Spinal and Peripheral Autonomic Nervous System .....	30
Transmitter Substances .....	35
Basal Sympathetic Tone .....	36

Oscillations in the Sympathetic Nervous System . . . . .	38
Vegetative Control of the Heart. . . . .	40
Vegetative Control of Blood Pressure. . . . .	41
Physiological Background . . . . .	41
Neural Control of Blood Pressure . . . . .	42
Is There Something Like a General Sympathetic or Parasympathetic Activation? Recent Views on the Interaction Between the Sympathetic and the Parasympathetic Systems . . . . .	45
Summary . . . . .	46
References. . . . .	47
<b>4 Methodological Issues . . . . .</b>	<b>51</b>
Introduction. . . . .	51
Technical Requirements . . . . .	52
Time-Domain Analysis . . . . .	54
Geometric Analysis. . . . .	56
Frequency-Domain Analysis . . . . .	59
LF, HF, and LF/HF. . . . .	59
VLF and ULF. . . . .	61
Variants of Frequency-Domain Measures . . . . .	62
Correlations Between Time Domain and Frequency Domain . . . . .	64
Nonlinear Methods . . . . .	64
Introduction . . . . .	64
Entropy. . . . .	66
Fractal Analysis . . . . .	70
Heart Rate Turbulence (HRT) . . . . .	76
Further Methods Combining HRV and Other Measured Parameters . . . . .	80
Modulating and Confounding Factors . . . . .	81
General Reliability. . . . .	81
Short Term Versus Holter Monitoring . . . . .	83
Different Forms of Measurement. . . . .	84
Confounding Factors. . . . .	84
Genetic Factors. . . . .	84
Physiological Factors . . . . .	86
Pathophysiological Factors . . . . .	95
Medicaments. . . . .	98
Antiarrhythmics . . . . .	98
Antihypertensive Drugs . . . . .	99
Antidepressive . . . . .	100
Other Psychopharmacological Drugs. . . . .	100
Catecholamines . . . . .	101
Anesthesiological Drugs . . . . .	101
Other Drugs . . . . .	102
References. . . . .	103

**5 HRV and Alterations in the Vegetative Nervous System** . . . . . 119

Introduction . . . . . 119

Is There an Accordance Between Anatomical Structures Involved  
in HRV and Supraspinal Structures Related to ANV? . . . . . 119

Is There General Increased Autonomic Activity That Might  
Correlate with HRV Measures? . . . . . 121

Does HF Correlate with Parasympathetic Tone? . . . . . 122

Does LF Correlate with Sympathetic Tone? . . . . . 122

Baroreflex Gain . . . . . 124

Conclusion . . . . . 125

References . . . . . 126

**6 Pathophysiological and Systems Biology Considerations** . . . . . 129

General Considerations . . . . . 129

Some Physiological Systems with Influence on Heart Rate  
Variability . . . . . 131

    Sinoatrial Node . . . . . 131

    Respiratory System . . . . . 132

    Endocrinological System . . . . . 132

    Immunological System . . . . . 133

    Glucose Metabolism . . . . . 135

    Psychological Functioning, Cardiac Health, and HRV . . . . . 137

HRV and Complexity: Revisited . . . . . 140

Conclusions . . . . . 140

References . . . . . 140

**Part II Clinical Studies and Applications**

**7 General Mortality** . . . . . 149

HRV as General Risk Factor in Population Samples . . . . . 150

Conclusion . . . . . 152

References . . . . . 154

**8 Cardiology** . . . . . 157

Introduction . . . . . 157

Coronary Heart Disease and Myocardial Infarction . . . . . 158

HRV and General Prognosis After MI . . . . . 159

    Angina Pectoris . . . . . 162

Chronic Heart Failure . . . . . 163

    Introduction . . . . . 163

    Pathophysiology and Phenomenology . . . . . 164

    Heart Failure and HRV . . . . . 165

    Conclusion . . . . . 171

Risk Prediction for Sudden Cardiac Death . . . . . 172

    SCD Summarized . . . . . 175

    SCD in Heart Failure Patients . . . . . 175

Special Subgroups . . . . .	177
Cachexia . . . . .	177
Hypertrophic Cardiomyopathy . . . . .	177
HRV Biofeedback Training in Heart Failure Patients . . . . .	178
Chronic Heart Failure and Heart Rate Turbulence . . . . .	178
Other Newer Approaches . . . . .	178
Paroxysmal and Permanent Atrial Fibrillation . . . . .	179
Introduction . . . . .	179
Pathophysiology . . . . .	179
HRV Changes Prior to the Onset of Paroxysmal AF . . . . .	180
HRV to Predict the Onset of AF After Thoracic Surgery . . . . .	182
HRV to Predict Recurrence After Cardioversion of Paroxysmal AF . . . . .	183
HRV in Persistent AF: A Challenge . . . . .	183
Effects of the Maze Procedure on HRV . . . . .	187
Discussion and Conclusion . . . . .	188
Hypertension . . . . .	188
Introduction . . . . .	188
A Short Description of the Pathophysiology of Hypertension . . . . .	189
HRV in Normotensive Individuals Developing Hypertension . . . . .	192
HRV in Hypertensive Compared to Normotensive Persons . . . . .	193
Conclusion . . . . .	194
Other Cardiologic Diseases and Problems . . . . .	194
References . . . . .	195
<b>9 Perioperative Care . . . . .</b>	<b>207</b>
Introduction . . . . .	207
Induction and Maintenance of General Anesthesia . . . . .	208
Prediction of Hypotension . . . . .	208
Prediction of Cardiac Events . . . . .	208
Effects of Anesthesia on HRV . . . . .	209
Spinal Anesthesia . . . . .	211
Maintenance of Anesthesia . . . . .	212
Postoperative Course . . . . .	212
Conclusion . . . . .	214
