<i>Preface</i>	<i>page xv</i>
<i>Notation and Abbreviations</i>	<i>xix</i>
<i>List of Contributors</i>	<i>xxv</i>
<b>1 Initial Tasks and Overview</b>	<b>1</b>
<i>Helmut Lütkepohl</i>	
1.1 Introduction	1
1.2 Setting Up an Econometric Project	2
1.3 Getting Data	3
1.4 Data Handling	5
1.5 Outline of Chapters	5
<b>2 Univariate Time Series Analysis</b>	<b>8</b>
<i>Helmut Lütkepohl</i>	
2.1 Characteristics of Time Series	8
2.2 Stationary and Integrated Stochastic Processes	11
2.2.1 Stationarity	11
2.2.2 Sample Autocorrelations, Partial Autocorrelations, and Spectral Densities	12
2.2.3 Data Transformations and Filters	17
2.3 Some Popular Time Series Models	22
2.3.1 Autoregressive Processes	22
2.3.2 Finite-Order Moving Average Processes	25
2.3.3 ARIMA Processes	27
2.3.4 Autoregressive Conditional Heteroskedasticity	28
2.3.5 Deterministic Terms	30
2.4 Parameter Estimation	30
2.4.1 Estimation of AR Models	30
2.4.2 Estimation of ARMA Models	32
2.5 Model Specification	33
	<i>ix</i>

2.5.1	AR Order Specification Criteria	33
2.5.2	Specifying More General Models	35
2.6	Model Checking	40
2.6.1	Descriptive Analysis of the Residuals	40
2.6.2	Diagnostic Tests of the Residuals	43
2.6.3	Stability Analysis	47
2.7	Unit Root Tests	53
2.7.1	Augmented Dickey–Fuller (ADF) Tests	54
2.7.2	Schmidt–Phillips Tests	57
2.7.3	A Test for Processes with Level Shift	58
2.7.4	KPSS Test	63
2.7.5	Testing for Seasonal Unit Roots	65
2.8	Forecasting Univariate Time Series	70
2.9	Examples	73
2.9.1	German Consumption	73
2.9.2	Polish Productivity	78
2.10	Where to Go from Here	85
<b>3</b>	<b>Vector Autoregressive and Vector Error Correction Models</b>	<b>86</b>
	<i>Helmut Lutkepohl</i>	
3.1	Introduction	86
3.2	VARs and VECMs	88
3.2.1	The Models	88
3.2.2	Deterministic Terms	91
3.2.3	Exogenous Variables	92
3.3	Estimation	93
3.3.1	Estimation of an Unrestricted VAR	93
3.3.2	Estimation of VECMs	96
3.3.3	Restricting the Error Correction Term	105
3.3.4	Estimation of Models with More General Restrictions and Structural Forms	108
3.4	Model Specification	110
3.4.1	Determining the Autoregressive Order	110
3.4.2	Specifying the Cointegrating Rank	112
3.4.3	Choice of Deterministic Term	120
3.4.4	Testing Restrictions Related to the Cointegration Vectors and the Loading Matrix	121
3.4.5	Testing Restrictions for the Short-Run Parameters and Fitting Subset Models	122
3.5	Model Checking	125
3.5.1	Descriptive Analysis of the Residuals	125
3.5.2	Diagnostic Tests	127
3.5.3	Stability Analysis	131

3.6	Forecasting VAR Processes and VECMs	140
3.6.1	Known Processes	141
3.6.2	Estimated Processes	143
3.7	Granger-Causality Analysis	144
3.7.1	The Concept	144
3.7.2	Testing for Granger-Causality	148
3.8	An Example	150
3.9	Extensions	158
<b>4</b>	<b>Structural Vector Autoregressive Modeling and Impulse Responses</b>	<b>159</b>
	<i>Jörg Breitung, Ralf Brüggemann, and Helmut Lütkepohl</i>	
4.1	Introduction	159
4.2	The Models	161
4.3	Impulse Response Analysis	165
4.3.1	Stationary VAR Processes	165
4.3.2	Impulse Response Analysis of Nonstationary VARs and VECMs	167
4.4	Estimation of Structural Parameters	172
4.4.1	SVAR Models	172
4.4.2	Structural VECMs	175
4.5	Statistical Inference for Impulse Responses	176
4.5.1	Asymptotic Estimation Theory	176
4.5.2	Bootstrapping Impulse Responses	177
4.5.3	An Illustration	179
4.6	Forecast Error Variance Decomposition	180
4.7	Examples	183
4.7.1	A Simple AB-Model	183
4.7.2	The Blanchard–Quah Model	185
4.7.3	An SVECM for Canadian Labor Market Data	188
4.8	Conclusions	195
<b>5</b>	<b>Conditional Heteroskedasticity</b>	<b>197</b>
	<i>Helmut Herwartz</i>	
5.1	Stylized Facts of Empirical Price Processes	197
5.2	Univariate GARCH Models	198
5.2.1	Basic Features of GARCH Processes	199
5.2.2	Estimation of GARCH Processes	201
5.2.3	Extensions	203
5.2.4	Blockdiagonality of the Information Matrix	206
5.2.5	Specification Testing	207
5.2.6	An Empirical Illustration with Exchange Rates	207
5.3	Multivariate GARCH Models	212

5.3.1	Alternative Model Specifications	214
5.3.2	Estimation of Multivariate GARCH Models	217
5.3.3	Extensions	218
5.3.4	Continuing the Empirical Illustration	220
<b>6</b>	<b>Smooth Transition Regression Modeling</b>	<b>222</b>
	<i>Timo Teräsvirta</i>	
6.1	Introduction	222
6.2	The Model	222
6.3	The Modeling Cycle	225
6.3.1	Specification	225
6.3.2	Estimation of Parameters	228
6.3.3	Evaluation	229
6.4	Two Empirical Examples	234
6.4.1	Chemical Data	234
6.4.2	Demand for Money (M1) in Germany	238
6.5	Final Remarks	242
<b>7</b>	<b>Nonparametric Time Series Modeling</b>	<b>243</b>
	<i>Rolf Tschernig</i>	
7.1	Introduction	243
7.2	Local Linear Estimation	245
7.2.1	The Estimators	245
7.2.2	Asymptotic Properties	248
7.2.3	Confidence Intervals	250
7.2.4	Plotting the Estimated Function	251
7.2.5	Forecasting	254
7.3	Bandwidth and Lag Selection	254
7.3.1	Bandwidth Estimation	256
7.3.2	Lag Selection	258
7.3.3	Illustration	261
7.4	Diagnostics	262
7.5	Modeling the Conditional Volatility	263
7.5.1	Estimation	264
7.5.2	Bandwidth Choice	265
7.5.3	Lag Selection	266
7.5.4	ARCH Errors	267
7.6	Local Linear Seasonal Modeling	268
7.6.1	The Seasonal Nonlinear Autoregressive Model	269
7.6.2	The Seasonal Dummy Nonlinear Autoregressive Model	270
7.6.3	Seasonal Shift Nonlinear Autoregressive Model	271

7.7	Example I: Average Weekly Working Hours in the United States	272
7.8	Example II: XETRA Dax Index	280
<b>8</b>	<b>The Software JMuLTi</b>	<b>289</b>
	<i>Markus Krätzig</i>	
8.1	Introduction to JMuLTi	289
8.1.1	Software Concept	289
8.1.2	Operating JMuLTi	290
8.2	Numbers, Dates, and Variables in JMuLTi	290
8.2.1	Numbers	290
8.2.2	Numbers in Tables	291
8.2.3	Dates	291
8.2.4	Variable Names	292
8.3	Handling Data Sets	292
8.3.1	Importing Data	292
8.3.2	Excel Format	292
8.3.3	ASCII Format	293
8.3.4	JMuLTi .dat Format	293
8.4	Selecting, Transforming, and Creating Time Series	293
8.4.1	Time Series Selector	293
8.4.2	Time Series Calculator	295
8.5	Managing Variables in JMuLTi	296
8.6	Notes for Econometric Software Developers	296
8.6.1	General Remark	296
8.6.2	The JStatCom Framework	297
8.6.3	Component Structure	297
8.7	Conclusion	299
	<i>References</i>	301
	<i>Index</i>	317
