Foreword <i>Clifford Lynch</i> .....	ix
Acknowledgements .....	xiii
Note to readers.....	xv
Glossary.....	xvii

## **1 What is access management, and why do libraries do it?.....1**

Historical role of libraries in managing access to information .....	1
The role of libraries in the 21st century .....	2
The history of access management of online information resources.....	4
The role of e-commerce in library access management.....	5
The 'birth' of access management principles – Clifford Lynch's white paper.....	6
References.....	7

## **2 Electronic resources: public and not so public.....9**

Managing access to electronic collections.....	9
How and where users may want to access e-resources .....	10
What needs to be protected, and why .....	11
Commercially produced resources that need to be protected .....	12
Publicly available information that may also require access management.....	14
Publishers and licensing issues .....	15
Library management of licences .....	17
Summary.....	19
References.....	19

### **3 Principles and definitions of identity and access management.....21**

Introduction .....	21
Managing access? . . . or identities? . . . or both? .....	22
The business relationships .....	23
The processes of identity and access management .....	24
Identifying the person using a resource – or not.....	27
Obligations to protect personal data about users.....	28
Summary.....	28
References.....	29

### **4 Current access management technologies .....31**

IP address.....	31
Barcode patterns.....	33
Proxy servers.....	33
Shared passwords .....	34
User registration with publishers.....	35
Federated access .....	36
Summary.....	37

### **5 Authentication technologies.....39**

‘Something you know, something you have, or something you are’ .....	39
Authentication technologies overview .....	40
Authentication by third parties .....	49
Choosing an authentication system .....	50
Summary.....	51
References.....	52

### **6 Authorization based on physical location: how does the internet know where I am? .....55**

Introduction .....	55
Domains and domain names .....	55
(How) is all this governed? .....	56
IP addresses.....	58
IP spoofing .....	65
Benefits and problems of using IP address-based licensing .....	66
Summary.....	66
References.....	66

### **7 Authorization based on user identity or affiliation with a library: who you are? Or what you do? .....69**

Basing access on identity, or on affiliation with a library.....	69
Role-based authorization .....	71
Matching roles against licence conditions.....	75
Benefits of role-based authorization .....	76

Summary .....	79
References .....	79

**8 Federated access: history, current position and future developments .....81**

Single sign-on and the origins of federated access management .....	81
The development of standards .....	83
Federated access in academia .....	85
The future of federated access .....	93
Summary .....	94
References .....	95

**9 How to choose access management and identity management products and services .....99**

Introduction .....	99
Identity management and access management solution capabilities .....	101
Establishing requirements with suppliers .....	102
Asserting library requirements in a wider-scale system procurement .....	106
Implementation options .....	108
The range of access and identity management products .....	110
Conclusions .....	110
References .....	111

**10 Internet access provided by (or in) libraries .....113**

Introduction .....	113
Wired access .....	117
Wireless access .....	118
Public access issues .....	121
Summary .....	125
References .....	125

**11 Library statistics .....127**

Why libraries collect electronic resource usage statistics .....	127
Challenges in collecting electronic resource usage data .....	128
How libraries collect usage data .....	130
Concluding thoughts .....	134
References and further reading .....	135

**12 The business case for libraries .....139**

Introduction .....	139
Key benefits of quality identity management .....	143
Designing an IdM project .....	145
Putting together a business case .....	150

Conclusions.....	153
References and further reading .....	154
<b>Afterword .....</b>	<b>155</b>
References.....	157
<b>Appendix 1: Case studies.....</b>	<b>159</b>
Extending access management to business and community engagement activities at Kidderminster College, UK .....	160
Moving from Athens to Shibboleth at University College London, UK .....	163
Online reciprocal borrowing registration for Western Australian University Libraries .....	167
Library and IT collaboration: driving strategic improvements to identity and access management practices and capabilities.....	172
Managing affiliated users with federated identity management at UNC-Chapel Hill, USA .....	182
Tilburg University and the SURFfederatie, the Netherlands.....	186
Delivering access to resources in a joint academic and public library building, UK .....	190
Single sign-on across the USMAI Consortium, USA.....	194
<b>Appendix 2: A White Paper on Authentication and Access Management Issues in Cross-organizational Use of Networked Information Resources <i>Clifford Lynch, editor</i> .....</b>	<b>201</b>
<b>Index.....</b>	<b>237</b>
