List of Figures.....	6
List of Tables	7
Preface	9
1 Introduction	11
1.1 Background.....	12
1.1.1 The Search and Matching Model.....	12
1.1.2 The Shimer Puzzle.....	13
1.1.3 Ongoing Debates on Worker Flows.....	14
1.1.4 Definition of Unemployment.....	16
1.2 Overview of the Essays.....	17
1.2.1 The Time Aggregation Bias in Worker Flows.....	17
1.2.2 Unemployment Dynamics Conditional on Shocks.....	18
1.2.3 A Selection-Based Interpretation of the Matching Function	19
2 Worker Flows in Germany: Inspecting the Time Aggregation Bias	21
2.1 Introduction.....	21
2.2 Data Description.....	24
2.3 Time Aggregation Bias.....	27
2.3.1 Related Literature	28
2.3.2 A Monthly Measure.....	29
2.3.3 The Shimer (2012) Correction Approach.....	31
2.3.4 Cyclical Properties	32
2.3.5 Effects on Unemployment Decomposition	35
2.4 Stylized Facts of German Worker Flows.....	37
2.4.1 Cyclical Components.....	37
2.4.2 Contributions to Unemployment Fluctuations.....	39
2.5 Conclusion.....	43
2.A Data Selection.....	45
2.B A Nonemployment Proxy according to Fitzenberger and Wilke (2010)	46
2.C Figures of the Time Aggregation Bias.....	49
2.D Robustness Checks	53

3	Patterns of Unemployment Dynamics in Germany.....	55
3.1	Introduction.....	55
3.2	Data Description.....	57
3.3	Empirical Model.....	60
3.3.1	VAR Specification	60
3.3.2	Identification of Shocks	60
3.3.3	Estimation	61
3.4	Results.....	62
3.4.1	Impulse Responses.....	63
3.4.2	Forecast Error Variance Decomposition.....	69
3.4.3	Discussion.....	71
3.5	Robustness Analysis	72
3.6	Subsample Analysis	75
3.7	Conclusion.....	76
3.A	Further Tables and Figures	78
3.B	Imposing Identifying Restrictions	83
4	The Matching Function: A Selection-Based Interpretation.....	85
4.1	Introduction.....	85
4.2	Estimations from Empirical Data.....	87
4.2.1	Literature Review	88
4.2.2	Data Description.....	89
4.2.3	Estimation Strategy.....	90
4.2.4	Results.....	92
4.3	A Simple Selection Model.....	94
4.3.1	Model Environment.....	94
4.3.2	The Selection Decision.....	95
4.3.3	Firms' Free-Entry Decision.....	96
4.3.4	Wages.....	97
4.3.5	Employment.....	98
4.3.6	Labor Market Equilibrium	98
4.4	Estimations from Simulated Data	98
4.4.1	Parametrization of Model.....	98
4.4.2	Simulation.....	99
4.4.3	Further Statistics.....	101

4.5	Fictional Matching Function Analytics.....	102
4.5.1	Static Toy Model Mechanics.....	102
4.5.2	Intuition.....	103
4.5.3	Connection to Simulation.....	105
4.6	Conclusion.....	106
4.A	Previous Matching Function Studies.....	108
4.B	Reporting Rate of Vacancies.....	110
4.C	Robustness Checks of the CRS Assumption	111
4.D	Control Variables.....	113
4.E	Endogenous Separations.....	115
4.F	Contact Rate	115
5	Conclusion.....	117
	References.....	119
	Abstract	127
	Kurzfassung	129
