<b>Abstract</b>	<b>iii</b>
<b>Zusammenfassung</b>	<b>v</b>
<b>Danksagung</b>	<b>vii</b>
<b>Contents</b>	<b>ix</b>
<b>Introduction</b>	<b>1</b>
<b>I Concepts</b>	<b>5</b>
<b>1 Mathematical preliminaries</b>	<b>7</b>
1.1 Basics . . . . .	7
1.2 The knapsack problem . . . . .	14
1.3 The capacitated network design problem . . . . .	20
1.4 Applications in telecommunication . . . . .	27
<b>2 Optimization under data uncertainty</b>	<b>35</b>
2.1 Stochastic optimization . . . . .	36
2.2 Robust optimization . . . . .	37
2.2.1 Uncertainty sets . . . . .	38
2.2.2 Tractability of robust optimization problems . . . . .	41
2.3 Multi-stage optimization under data uncertainty . . . . .	42
2.3.1 Multi-stage stochastic optimization . . . . .	43
2.3.2 Multi-stage robust optimization . . . . .	43
<b>3 Robustness concepts</b>	<b>45</b>
3.1 $\Gamma$ -robustness . . . . .	45
3.1.1 The concept of $\Gamma$ -robustness . . . . .	46
3.1.2 The $\Gamma$ -robust counterpart . . . . .	48
3.1.3 Probabilistic analysis and feasibility guarantees . . . . .	50

3.2	Multi-band robustness . . . . .	51
3.2.1	The concept of multi-band robustness . . . . .	52
3.2.2	The multi-band robust counterpart . . . . .	55
3.2.3	Probabilistic analysis . . . . .	57
3.3	Submodular robustness . . . . .	57
3.3.1	The concept of submodular robustness . . . . .	58
3.3.2	The submodular robust counterpart . . . . .	59
3.3.3	Submodular functions: $\Gamma$ - and multi-band robustness . . . . .	60
3.4	Recoverable robustness . . . . .	61
3.4.1	The concept of recoverable robustness . . . . .	62
3.4.2	The recoverable robust counterpart . . . . .	63
3.5	Evaluation of robustness . . . . .	64
 <b>II Robust Knapsack Problems</b>		<b>69</b>
<b>4</b>	<b>The <math>\Gamma</math>-robust knapsack problem</b>	<b>71</b>
4.1	Formulations . . . . .	72
4.2	Polyhedral study . . . . .	73
4.2.1	Basic characteristics . . . . .	73
4.2.2	Valid inequalities . . . . .	74
4.3	Algorithms . . . . .	76
4.3.1	Separation of violated $\Gamma$ -robust (extended) cover inequalities . . . . .	76
4.3.2	Solving the $\Gamma$ -RKP . . . . .	78
<b>5</b>	<b>The multi-band robust knapsack problem</b>	<b>79</b>
5.1	Formulations . . . . .	80
5.2	Polyhedral study . . . . .	81
5.2.1	Basic characteristics . . . . .	81
5.2.2	Valid inequalities . . . . .	82
5.3	Algorithms . . . . .	83
5.3.1	Separation of multi-band robust strengthened extended cover inequalities . . . . .	84
<b>6</b>	<b>The submodular knapsack problem</b>	<b>85</b>
6.1	Formulations . . . . .	86
6.2	Polyhedral study . . . . .	87
6.2.1	Basic characteristics . . . . .	87
6.2.2	Valid inequalities . . . . .	87
<b>7</b>	<b>The recoverable robust knapsack problem</b>	<b>95</b>
7.1	Formulations . . . . .	97
7.2	Polyhedral study . . . . .	102
7.2.1	Basic characteristics . . . . .	103

7.2.2	Valid inequalities . . . . .	105
7.3	Algorithms . . . . .	111
7.3.1	Solving the Maximum Weight Set Problem . . . . .	111
7.3.2	Separation of violated recoverable robust extended cover inequalities . . . . .	112
7.3.3	Solving the RRP: an approach using robustness cuts . . . . .	117
<b>8</b>	<b>Computational studies</b>	<b>121</b>
8.1	Instances . . . . .	122
8.2	Robustness parameters . . . . .	123
8.3	Results for the $k, \ell/D$ -RRKP . . . . .	123
8.4	Results for the $k/\Gamma$ -RRKP . . . . .	126
<b>III</b>	<b>Robust Network Design Problems</b>	<b>135</b>
<b>9</b>	<b>The <math>\Gamma</math>-robust network design problem</b>	<b>137</b>
9.1	Formulations . . . . .	139
9.2	Polyhedral study . . . . .	143
9.2.1	Basic characteristics . . . . .	144
9.2.2	Cutset-based inequalities . . . . .	145
9.2.3	$\Gamma$ -robust arc residual capacity inequalities . . . . .	156
9.2.4	$\Gamma$ -robust metric inequalities . . . . .	160
9.3	Algorithms . . . . .	165
9.3.1	Separation of cutset-based inequalities . . . . .	165
9.3.2	Separation of $\Gamma$ -robust arc residual capacity inequalities . . . . .	167
9.3.3	Separation of $\Gamma$ -robust metric inequalities . . . . .	170
<b>10</b>	<b>The multi-band robust network design problem</b>	<b>175</b>
10.1	Formulations . . . . .	176
10.2	Polyhedral study . . . . .	179
10.2.1	Basic characteristics . . . . .	180
10.2.2	Cutset-based inequalities . . . . .	181
10.3	Algorithms . . . . .	185
10.3.1	Separation of multi-band robust cutset inequalities . . . . .	185
10.3.2	Separation of multi-band robust length inequalities . . . . .	186
<b>11</b>	<b>Computational studies</b>	<b>189</b>
11.1	Instances . . . . .	189
11.2	Robustness parameters . . . . .	193
11.3	Comparison of formulations . . . . .	194
11.4	Strength of valid inequalities . . . . .	196
11.5	Speed-up of the compact link flow formulation . . . . .	199
11.6	Speed-up of the capacity formulation . . . . .	201
11.7	Handling large instances using the capacity formulation . . . . .	203

11.8 Quality of optimal robust network designs . . . . .	205
<b>Conclusions</b>	<b>209</b>
