

# Table of Contents

List of Editors .....	VIII
Structural Abbreviations .....	IX
<b>A Motivation and Methodology .....</b>	<b>1</b>
I Introduction .....	1
II Measurement Techniques .....	5
1 Double Resonance .....	5
2 Fourier Transform NMR .....	5
III Spin-Lattice Relaxation Times .....	9
IV The $^{31}\text{P}$ Nuclear Overhauser Effect .....	13
<b>B Coupling Constants .....</b>	<b>16</b>
I One-Bond Metal-Phosphorus Coupling Constants .....	16
II Two-Bond Phosphorus-Phosphorus Coupling Constants .....	28
III One-Bond Metal-Phosphorus Coupling Constants - A Survey .....	34
IV Two-Bond Phosphorus-Phosphorus Coupling Constants - Data .....	46
<b>C Chemical Shifts .....</b>	<b>47</b>
<b>D Applications .....</b>	<b>56</b>
<b>E <math>^{13}\text{C}</math> Studies of Phosphorus Containing Complexes .....</b>	<b>65</b>
I Studies of Coordinated Phosphorus Ligands .....	65
II Studies of Non-Phosphorus Ligands in Phosphorus-Complexes .....	72
<b>F Appendices</b>	
A The Influence of $\pi$ -Orbitals on the Coupling Constant .....	75
B Numerical Values of $ \psi_{\text{ns}}(\text{O}) ^2$ .....	80
C Differences in $^1\text{J}(\text{M},\text{P})$ , $^2\text{J}(\text{P},\text{P})_{\text{cis}}$ and $^2\text{J}(\text{P},\text{P})_{\text{trans}}$ .....	86
<b>G Tables .....</b>	<b>89</b>
<b>H References .....</b>	<b>145</b>
<b>Index .....</b>	<b>155</b>
