<i>Contributor contact details</i> .....	<i>xv</i>
<i>Editorial advisors</i> .....	<i>xxi</i>
<i>Woodhead Publishing Series in Food Science, Technology and Nutrition</i> .....	<i>xxiii</i>
<i>Preface</i> .....	<i>xxxiii</i>
<i>Foreword</i> .....	<i>xxxv</i>
<b>Part I Farm-level production and regulation of fresh produce</b> .....	<b>1</b>
<b>1 Best practice in large-scale production of fresh produce</b> .....	<b>3</b>
<i>I. B. Jochumsen, AgroManagement, Denmark</i>	
1.1 Introduction.....	3
1.2 Risk assessment at the farm level.....	5
1.3 Following the steps in the production chain.....	8
1.4 Conclusion.....	8
<b>2 Niche farm fresh products</b> .....	<b>9</b>
<i>A. N. Jensen and D. L. Baggesen, Technical University of Denmark, Denmark</i>	
2.1 Introduction.....	9
2.2 Human pathogen contamination of ‘niche products’.....	13
2.3 The difference in contamination risk for ‘niche products’.....	18
2.4 Conclusion.....	19
2.5 Questions for discussion.....	19
2.6 Acknowledgments.....	20
2.7 References.....	20
<b>3 Guidelines and protocols for safe practice in fresh produce production: FDA legislation</b> .....	<b>22</b>
<i>E. Snellman, FDA, USA</i>	
3.1 Introduction: a new strategy is tested.....	22

3.2	Early produce safety policy .....	24
3.3	Challenges in good agricultural practices (GAPs) implementation .....	25
3.4	What more can we do? .....	27
3.5	A pivotal outbreak prompts a policy shift.....	28
3.6	New mandates: modernization of food safety .....	29
3.7	Future trends: back to the call .....	29
3.8	Questions for discussion .....	30
3.9	Acknowledgment.....	30
3.10	References.....	31
<b>4</b>	<b>Issues surrounding the European fresh produce trade: a global perspective.....</b>	<b>33</b>
	<i>M. Uyttendaele, L. Jacxsens and S. Van Boxtael, Ghent University, Belgium</i>	
4.1	Introduction.....	33
4.2	Challenges involved in the fresh produce trade.....	34
4.3	Regulatory and economic aspects.....	38
4.4	Best practice in agriculture .....	42
4.5	Troubleshooting approaches .....	43
4.6	Conclusion and future trends .....	46
4.7	Questions for discussion .....	48
4.8	Acknowledgments .....	48
4.9	Sources of further information and advice .....	48
4.10	References.....	50
<b>5</b>	<b>Zoonotic transfer of pathogens from animals to farm products .....</b>	<b>52</b>
	<i>D. J. Bolton, Teagasc – Ashtown Food Research Centre, Ireland and T. S. Edrington, D. J. Nisbet and T. R. Callaway, US Department of Agriculture, USA</i>	
5.1	Introduction.....	52
5.2	Zoonotic foodborne pathogenic bacteria in animals: prevalence estimates in food animal species .....	53
5.3	Survival, spread and transmission .....	56
5.4	How to stop pathogen transfer from and between live animals.....	58
5.5	Pathogen control strategies in live animals: novel solutions.....	61
5.6	Conclusion .....	65
5.7	Questions for discussion .....	66
5.8	References.....	66

<b>Part II Environmental issues impacting the potential safety of fresh produce .....</b>	<b>69</b>
<b>6 Postharvest washing as a critical control point in fresh produce processing: alternative sanitizers and wash technologies.....</b>	<b>71</b>
<i>K. Warriner and A. Namvar, University of Guelph, Canada</i>	
6.1 Introduction.....	71
6.2 When postharvest washing goes wrong.....	72
6.3 Approved sanitizers for fresh-cut processing .....	75
6.4 Current postharvest decontamination methods.....	77
6.5 Best practices in postharvest washing .....	85
6.6 Future trends .....	91
6.7 Conclusion .....	96
6.8 Questions for discussion .....	96
6.9 Acknowledgments .....	97
6.10 Sources of further information and advice .....	97
6.11 References.....	97
<b>7 Preventing cross-contamination during produce wash operations.....</b>	<b>103</b>
<i>Y. Luo, USDA, USA, D. T. Ingram, FDA, USA and K. Khurana, Pulse Instruments, USA</i>	
7.1 Introduction: commercial produce wash operation, water quality and sanitizer concentration .....	103
7.2 Changes in sanitizer concentration during wash .....	105
7.3 Factors affecting pathogen survival and cross-contamination during wash.....	107
7.4 Common industrial practices: process flow and re-wash .....	108
7.5 Conclusion .....	109
7.6 Questions for discussion.....	110
7.7 References.....	110
<b>8 Organic environmental chemical contaminants in fresh produce and fruits .....</b>	<b>112</b>
<i>T. L. Cederberg, Technical University of Denmark, Denmark</i>	
8.1 Introduction.....	112
8.2 Regulatory aspects .....	113
8.3 Modelling of uptake.....	113
8.4 Contaminated sites and risk assessments.....	115
8.5 Conclusion and future trends.....	116
8.6 Questions for discussion.....	117
8.7 References.....	117

<b>9 Water: waste, recycling and irrigation in fresh produce processing .....</b>	<b>119</b>
<i>C. Chaidez, Centro de Investigacion en Alimentacion y Desarrollo, Mexico, M. Soto, The University of Arizona, USA and M. Jimenez, Universidad Autonoma de Sinaloa, Mexico</i>	
9.1 Introduction.....	119
9.2 Technological challenges .....	120
9.3 Significant factors in environmental challenges to food safety.....	121
9.4 Regulatory and economic aspects.....	124
9.5 Market issues .....	126
9.6 Critical factors in using irrigation water.....	127
9.7 Troubleshooting and best practice .....	128
9.8 Conclusion and future trends.....	129
9.9 Questions for discussion.....	129
9.10 References.....	130
<b>10 Maintaining sustainable and environmentally friendly fresh produce production in the context of climate change.....</b>	<b>133</b>
<i>D. Pimentel and M. Burgess, Cornell University, USA</i>	
10.1 Introduction.....	133
10.2 Experimental design .....	134
10.3 Soil content in the organic and conventional farming systems.....	135
10.4 Soil organic matter and biodiversity.....	137
10.5 Conclusion.....	137
10.6 References.....	138
<b>11 Reducing waste in fresh produce processing and households through use of waste as animal feed .....</b>	<b>140</b>
<i>J. Zentek, F. Knorr and A. Mader, Freie Universität Berlin, Germany</i>	
11.1 Introduction.....	140
11.2 Legal aspects for using food waste and byproducts for animal feed.....	141
11.3 Feedstuffs from catering waste.....	142
11.4 Feedstuffs from the processing of fruits and vegetables.....	143
11.5 Feedstuffs from other food processing systems.....	147
11.6 Conclusion .....	148
11.7 Questions for discussion.....	149
11.8 References.....	149

<b>12 Risk assessment of microbial and chemical contamination in fresh produce</b> .....	<b>153</b>
<i>S. Koseki, National Food Research Institute, Japan</i>	
12.1 Introduction .....	153
12.2 The frequency with which bacterial pathogens contaminate fresh produce .....	155
12.3 How bacterial pathogens contaminate fresh produce .....	155
12.4 How bacterial pathogens respond on fresh produce .....	158
12.5 Future trends .....	164
12.6 Questions for discussion .....	165
12.7 Acknowledgements.....	166
12.8 References.....	166
<b>Part III Commercial solutions for fresh produce safety</b> .....	<b>173</b>
<b>13 Modified atmosphere packaging for fresh produce</b> .....	<b>175</b>
<i>S. Shayanfar, German Institute of Food Technologies (DIL), Germany</i>	
13.1 Introduction.....	175
13.2 Challenges of modified atmosphere packaging (MAP) storage .....	176
13.3 Regulatory aspects, economic aspects and market issues .....	181
13.4 Novel trends in modified atmosphere packaging.....	182
13.5 Troubleshooting approaches .....	184
13.6 Future trends .....	184
13.7 Questions for discussion.....	185
13.8 Sources of further information and advice .....	185
13.9 References.....	186
<b>14 Biocontrol of <i>Listeria monocytogenes</i> on fresh produce</b> .....	<b>187</b>
<i>K. Jordan and A. Casey, Teagasc Food Research Centre, Ireland, A. Hoehl, BOKU – University of Natural Resources and Life Sciences, Austria and G. Bruggeman, Nutrition Sciences N. V., Belgium</i>	
14.1 Introduction.....	187
14.2 Outbreaks and control of <i>Listeria monocytogenes</i> on fresh produce .....	189
14.3 Opportunities for biocontrol .....	192
14.4 Conclusion .....	197
14.5 Acknowledgements.....	198
14.6 References.....	198
<b>15 Commercial and novel solutions for fresh produce safety</b>	
<i>A. Lee, Illinois Institute of Technology, USA</i>	
15.1 Introduction.....	203

15.2	Sanitizers used in fresh-cut processing.....	206
15.3	Use of novel processing technologies.....	210
15.4	Conclusion .....	216
15.5	References.....	216
<b>16</b>	<b>Ionizing irradiation for phytosanitary applications and fresh produce safety .....</b>	<b>221</b>
	<i>S. Pillai and C. Bogran, Texas A&amp;M University, USA and C. Blackburn, International Atomic Energy Agency, Austria</i>	
16.1	Introduction.....	221
16.2	Technology.....	222
16.3	Pathogen issues in fresh produce.....	225
16.4	Regulatory aspects and consumer acceptance .....	229
16.5	Challenges facing food irradiation.....	229
16.6	Conclusion and future trends.....	231
16.7	Acknowledgments .....	231
16.8	References.....	232
<b>17</b>	<b>Edible coatings for fresh and minimally processed fruits and vegetables.....</b>	<b>233</b>
	<i>L. Ciolacu and A. I. Nicolau, Dunarea de Jos University of Galati, Romania and J. Hoorfar, Technical University of Denmark, Denmark</i>	
17.1	Introduction: development of edible coatings .....	233
17.2	Types of edible coatings .....	234
17.3	Antimicrobial properties of edible films.....	234
17.4	Challenges for ecology .....	237
17.5	Consumer perceptions .....	238
17.6	Regulatory and economic aspects.....	238
17.7	Production and market issues .....	239
17.8	Further developments .....	241
17.9	Questions for discussion.....	241
17.10	Sources of further information and advice .....	242
17.11	References.....	242
<b>Part IV</b>	<b>Laboratory testing for fresh produce safety.....</b>	<b>245</b>
<b>18</b>	<b>Pathogen testing in fresh produce: Earthbound Farm.....</b>	<b>247</b>
	<i>W. Daniels, Earthbound Farm, USA</i>	
18.1	Introduction.....	247
18.2	The investigation .....	248
18.3	A multi-hurdle approach to food safety .....	248
18.4	Testing is not the only answer.....	251
18.5	Examining the data .....	253

18.6	Lessons learned.....	253
18.7	Conclusion.....	256
18.8	Questions for discussion.....	257
<b>19</b>	<b>Capacity building of legislative fresh produce testing in China.....</b>	<b>258</b>
	<i>Z. Ye, S. Chen, F. Wang and T. Chen, Chinese Academy of Agricultural Sciences, China and L. Xiao, National Certification and Accreditation Administration, China</i>	
19.1	Introduction.....	258
19.2	General situation of the Chinese legislative testing system for agro-product quality and safety.....	259
19.3	Challenges in building capability of legislative testing.....	260
19.4	Regulations and policies for legislative testing.....	262
19.5	The role of legislative testing in agricultural economy development.....	264
19.6	The role played by legislative testing in production and trade.....	266
19.7	Achievements in capacity building of legislative testing for agro-product quality and safety.....	268
19.8	Future trends.....	271
19.9	References.....	271
<b>20</b>	<b>Bottlenecks and limitations in testing for pathogens in fresh produce.....</b>	<b>274</b>
	<i>J. Hoorfar, Technical University of Denmark, Denmark, P. Feng, US Food and Drug Administration, USA, G. Duffy, Teagasc Food Research Centre, Ireland, B. Malorny, Bundesinstitut für Risikobewertung (BfR), Germany and R. Binet, US Food and Drug Administration, USA</i>	
20.1	Introduction.....	274
20.2	Logistics in sample preparation.....	276
20.3	Logistics in field testing.....	278
20.4	Logistics in product testing.....	280
20.5	Conclusion.....	288
20.6	Questions for discussion.....	288
20.7	Acknowledgements.....	289
20.8	References.....	289
<b>21</b>	<b>New developments in safety testing of soft fruits.....</b>	<b>292</b>
	<i>R. Morales-Rayas and M. W. Griffiths, University of Guelph, Canada and A. C. Shultz, Technical University of Denmark, Denmark</i>	
21.1	Introduction.....	292
21.2	Soft fruit.....	293
21.3	Microbial pathogens of safety concern in soft fruits.....	296

21.4	Methods for evaluation of microbial safety in soft fruit.....	301
21.5	Conclusion and future trends.....	307
21.6	Questions for discussion.....	308
21.7	References.....	308
<b>22</b>	<b>Cases of public emetic events caused by foodborne viruses and potential issues for fresh produce.....</b>	<b>314</b>
	<i>S. M. Markland, D. H. D'Souza and K. E. Knier,</i> <i>University of Delaware, USA</i>	
22.1	Introduction.....	314
22.2	Challenges in containing virus spread.....	317
22.3	Significant factors affecting outbreaks.....	317
22.4	Regulatory and economic aspects.....	318
22.5	Production and market issues.....	319
22.6	Troubleshooting approaches and laboratory methods.....	321
22.7	Future trends.....	321
22.8	Conclusion.....	322
22.9	Questions for discussion.....	322
22.10	Acknowledgments.....	323
22.11	References.....	323
<b>Part V</b>	<b>Case studies in real-life situations.....</b>	<b>325</b>
<b>23</b>	<b>Sprout-associated outbreaks and development of preventive controls.....</b>	<b>327</b>
	<i>M. A. Smith, US Food and Drug Administration, USA</i>	
23.1	Introduction.....	327
23.2	Initial sprout safety concerns and recommendations.....	329
23.3	Challenges in sprout safety.....	331
23.4	Knowledge and research needs.....	332
23.5	Further developments in sprout safety hazards.....	333
23.6	Addressing sprout safety hazards.....	335
23.7	Conclusion.....	337
23.8	Questions for discussion.....	338
23.9	Sources of further information and advice.....	338
23.10	References.....	338
<b>24</b>	<b>Leafy greens: the case study and real-life lessons from a Shiga-toxin-producing <i>Escherichia coli</i> (STEC) O145 outbreak in romaine lettuce.....</b>	<b>340</b>
	<i>M. A. Baloch, US Centers for Disease Control and Prevention, USA</i>	
24.1	Introduction.....	340
24.2	Challenges faced by the experts involved.....	341
24.3	Significance of the pathogen that caused the case.....	343

24.4	Geographical and climate factors .....	343
24.5	Regulatory and economic aspects.....	347
24.6	Industry and market aspects.....	348
24.7	Addressing the outbreak .....	349
24.8	Troubleshooting approaches and laboratory methods .....	352
24.9	Future trends .....	353
24.10	Questions for discussion .....	353
24.11	Acknowledgments .....	354
24.12	Sources of further information and advice .....	354
24.13	References.....	355
<b>25</b>	<b>The case of the European <i>Escherichia coli</i> outbreak from sprouts</b>	<b>356</b>
	<i>P. Luber, Federal Office of Consumer Protection and Food Safety (BVL), Germany</i>	
25.1	Introduction: investigation of foodborne disease outbreaks in Germany .....	356
25.2	The German <i>E. coli</i> outbreak from detection to highly likely clarification .....	357
25.3	Challenges encountered during the clarification of this outbreak.....	360
25.4	Significance of the pathogen that caused the case .....	361
25.5	Burden of disease and geographical and regional significance	361
25.6	Regulatory aspects .....	362
25.7	Market and economic issues .....	362
25.8	The second <i>E. coli</i> O104:H4 outbreak in France.....	363
25.9	Conclusion .....	364
25.10	Questions for discussion .....	365
25.11	Sources of further information and advice .....	365
25.12	References.....	366
<b>26</b>	<b>Case study on the safety and sustainability of fresh bottled coconut water</b>	<b>367</b>
	<i>E. H. M. Walter, Embrapa Food Technology, Brazil, A. Y. Kuaye, State University of Campinas, Brazil and J. Hoorfar, Technical University of Denmark, Denmark</i>	
26.1	Introduction.....	367
26.2	Safety control challenges and foodborne outbreaks .....	371
26.3	Sustainability aspects.....	372
26.4	Economic issues.....	373
26.5	Regulatory aspects in Brazil .....	375
26.6	Technical control strategies .....	377
26.7	Conclusion and future trends .....	380
26.8	Questions for discussion .....	380
26.9	Acknowledgments .....	380
26.10	References.....	380

<b>27 Control of fresh produce safety in Denmark</b> .....	<b>383</b>
<i>J. Hoorfar, Technical University of Denmark, Denmark</i>	
27.1 Introduction.....	383
27.2 Inspection principles.....	385
27.3 How foodservice and food establishments are controlled.....	387
27.4 How Denmark controls fruit and vegetable safety.....	393
27.5 Lessons from the Danish control model.....	394
27.6 References.....	395
27.7 Appendix: the largest outbreak.....	395
<b>28 Mushroom production in China: the illegal use of fluorescent whitening agents (FWAs) and related outbreaks</b> .....	<b>401</b>
<i>Z. Xing and X. Zhao, Shanghai Academy of Agricultural Sciences, China</i>	
28.1 Introduction.....	401
28.2 Contamination of mushrooms with fluorescent whitening agents (FWAs).....	403
28.3 Significant factors affecting the outbreak.....	404
28.4 Regulatory and economic aspects.....	406
28.5 Production and market issues and further developments.....	407
28.6 Troubleshooting approaches and laboratory methods.....	407
28.7 Future trends.....	408
28.8 Acknowledgements.....	408
28.9 Sources of further information and advice.....	408
28.10 References.....	408
<b>29 The case of lemons in caves: a sustainable storage system for Turkish lemons</b> .....	<b>409</b>
<i>A. I. Nicolau, Dunarea de Jos University of Galati, Romania</i>	
29.1 Introduction.....	409
29.2 Microbiological problems during storage.....	410
29.3 Troubleshooting approaches.....	410
29.4 Challenges for lemon storage.....	412
29.5 Geographical and regional significance, climate and general consumer perceptions.....	412
29.6 Regulatory aspects.....	413
29.7 Economic aspects.....	413
29.8 Production and market issues.....	414
29.9 Further developments.....	414
29.10 Research and training needs.....	415
29.11 Questions for discussion.....	416
29.12 Sources of further information and advice.....	416
29.13 References.....	416
