<i>Woodhead Publishing Series in Food Science, Technology and Nutrition</i>	<i>xv</i>
<i>Preface</i>	<i>xxv</i>
Part I Production and processing practices and influence on nut contaminants	1
1 Agricultural practices to reduce microbial contamination of nuts	3
<i>M. L. Wells, University of Georgia, USA</i>	
1.1 Introduction.....	3
1.2 Tree nut production systems	4
1.3 Good Agricultural Practices (GAPs) for nut production	9
1.4 Conclusion	18
1.5 References.....	19
2 Impact of nut postharvest handling, de-shelling, drying and storage on quality	22
<i>A. A. Kader, formerly of the University of California, Davis, USA</i>	
2.1 Quality attributes of nuts	22
2.2 Impact of maturity at harvest and harvesting procedures on quality	25
2.3 Impact of postharvest handling operations on the quality of raw nuts	27
2.4 Impact of processing operations	29
2.5 Impact of marketing operations	32
2.6 References.....	33

3	Non-thermal processing technologies to improve the safety of nuts	35
	<i>A. Prakash, Chapman University, USA</i>	
3.1	Introduction.....	35
3.2	Propylene oxide (PPO).....	36
3.3	High pressure processing (HPP).....	37
3.4	Irradiation and ultraviolet radiation.....	40
3.5	Ozone, cold plasma, high pressure carbon dioxide (HPCD) and sanitizer treatments.....	43
3.6	Conclusion.....	49
3.7	References.....	52
4	Pest control in postharvest nuts	56
	<i>J. Johnson, USDA-ARS, San Joaquin Valley Agricultural Sciences Center, USA</i>	
4.1	Introduction.....	56
4.2	Common postharvest pests of tree nuts.....	57
4.3	Orchard pest management strategies.....	68
4.4	Processing facility pest management strategies.....	71
4.5	Commodity treatments.....	74
4.6	Future trends.....	78
4.7	Sources of further information and advice.....	79
4.8	References.....	79
5	Mycotoxin contamination of nuts	88
	<i>D. Clavel and C. Brabet, CIRAD, France</i>	
5.1	Introduction.....	88
5.2	Aflatoxin regulations and analysis in nuts.....	89
5.3	From fungal spoilage to aflatoxin contamination in groundnuts.....	94
5.4	Prevention and control of pre-harvest aflatoxin contamination in groundnuts.....	99
5.5	Post-harvest strategies for preventing and reducing aflatoxin contamination in groundnuts.....	103
5.6	Aflatoxin risk management in groundnuts.....	107
5.7	Sources of further information and advice.....	111
5.8	References.....	111
6	Integrating Hazard Analysis Critical Control Point (HACCP) and Statistical Process Control (SPC) for safer nut processing	119
	<i>W. C. Hurst, University of Georgia, USA</i>	
6.1	Introduction.....	119
6.2	Compatibility of Hazard Analysis and Critical Control Point (HACCP) and Statistical Process Control (SPC) management systems.....	121

6.3	Origin of HACCP and planning an HACCP study	122
6.4	HACCP Principle 1: conducting a hazard analysis.....	126
6.5	HACCP Principle 2: using SPC to identify and stabilize variability at CCPs.....	128
6.6	HACCP Principle 3: conducting process capability analyses to verify critical limits (CLs).....	130
6.7	HACCP Principle 4: establishing SPC procedures for monitoring CCPs	132
6.8	HACCP Principle 5: determining corrective action procedures.....	137
6.9	HACCP Principle 6: confirming HACCP implementation through verification and validation activities	137
6.10	HACCP Principle 7: establishing documentation and record keeping	140
6.11	Role of prerequisite programs in HACCP	141
6.12	Conclusion	143
6.13	References.....	143
7	Validation of processes for reducing the microbial load on nuts.....	148
	<i>C. Ivarsson, Napasol AG, Switzerland</i>	
7.1	Introduction.....	148
7.2	The science of validation	149
7.3	Technologies for microbial reduction in nuts	152
7.4	Principal elements of a validation program	155
7.5	Pasteurization performance of technologies used for processing nuts.....	158
7.6	Pasteurization technologies suitable for raw nuts.....	160
7.7	Validation in practice	162
7.8	Future trends for safe nuts	168
7.9	Sources of further information and advice	169
7.10	References.....	169
Part II	Improving nut quality and safety	171
8	Impact of roasting on nut quality.....	173
	<i>R. Perren, RPN EXCELLENCE AG, Switzerland and F. E. Escher, ETH Zurich, Switzerland</i>	
8.1	Introduction.....	173
8.2	Nut roasting technology.....	175
8.3	Microstructure and quality of roasted nuts	181
8.4	Non-enzymatic browning reactions and quality of roasted nuts	190
8.5	Safety and nutritional aspects of nut roasting	191
8.6	Flavoring and seasoning technology for roasted tree nuts.....	192

8.7	Downstream processing, packaging and storage of roasted tree nuts	193
8.8	References.....	195
9	Oxidative rancidity in nuts.....	198
	<i>F. Shahidi and J. A. John, Memorial University of Newfoundland, Canada</i>	
9.1	Introduction.....	198
9.2	Mechanisms of oxidative rancidity in nuts.....	200
9.3	Factors affecting the rate of oxidation	202
9.4	Measuring oxidation in nuts	208
9.5	Effect of oxidation on sensory and nutritional quality and shelf life of nuts and nut oils	214
9.6	Protecting nuts and nut oils against oxidation	214
9.7	Future trends.....	221
9.8	References.....	222
10	Advances in automated nut sorting.....	230
	<i>N. Toyofuku, R. Haff and T. Pearson, USDA ARS WRRRC, USA</i>	
10.1	Introduction.....	230
10.2	Advantages of automation	231
10.3	Computer vision-based sorting (CVBS) systems	232
10.4	Acoustics-based sorting (ABS) systems	235
10.5	Computer processing and algorithm development	237
10.6	Possible avenues of development in sorting nuts	238
10.7	Conclusion	240
10.8	References.....	240
11	Improving the quality and safety of walnuts	245
	<i>D. L. McNeil, University of Tasmania, Australia</i>	
11.1	Introduction.....	245
11.2	Food value	249
11.3	Safety	251
11.4	Quality	259
11.5	Walnut supply chains	263
11.6	Conclusion	267
11.7	References.....	267
12	Improving the quality and safety of macadamia nuts	274
	<i>M. M. Wall, US Department of Agriculture, Agricultural Research Service, USA</i>	
12.1	Introduction	274
12.2	Nut properties	276
12.3	Key safety issues.....	278
12.4	Genetics, breeding and variety selection	280

12.5	Pre- and post-harvest factors affecting safety and quality	282
12.6	Processing effects on safety and quality	284
12.7	Quality assessment, nutritional aspects and food applications ...	288
12.8	Conclusion	291
12.9	References.....	291
13	Improving the safety and quality of pecans.....	297
	<i>L. R. Beuchat and R. B. Pegg, University of Georgia, USA</i>	
13.1	Introduction.....	297
13.2	Historical perspective	298
13.3	Sources and routes of microbiological contamination.....	299
13.4	Safety and spoilage	305
13.5	Quality attributes and nutrients.....	312
13.6	Health benefits	320
13.7	Future trends	323
13.8	Sources of further information and advice	324
13.9	References.....	324
14	Improving the quality and safety of peanuts.....	330
	<i>S. Calhoun, American Peanut Council, USA</i>	
14.1	Introduction.....	330
14.2	Properties of peanuts.....	331
14.3	Key safety issues.....	331
14.4	The Peanut Genome Project	333
14.5	Breeding and varieties	334
14.6	Pre-harvest factors affecting safety and quality of peanuts	335
14.7	Post-harvest factors affecting safety and quality of peanuts.....	336
14.8	Processing effects on safety and quality of peanuts	337
14.9	Quality assessment.....	342
14.10	Nutritional aspects and food applications of peanuts	344
14.11	Future trends	345
14.12	Sources of further information and advice	346
14.13	References.....	346
15	Improving the safety of almonds and pistachios.....	350
	<i>L. J. Harris and L. Ferguson, University of California, Davis, USA</i>	
15.1	Introduction and historical perspective.....	350
15.2	Production, harvest and post-harvest practices.....	352
15.3	Microbiological safety	356
15.4	Sources and routes of contamination with enteric pathogens.....	361
15.5	Aflatoxin	362
15.6	Good Agricultural Practices (GAPs) to minimize pre-harvest contamination	364
15.7	Post-harvest options to reduce microbial loads	368

15.8	Composition.....	370
15.9	Future trends	372
15.10	Sources of further information and advice	372
15.11	References.....	373
Appendix: Detecting tree nut and seed allergens in food		379
<i>S. J. Koppelman, University of Nebraska-Lincoln, USA</i>		
A1.1	Introduction.....	379
A1.2	Prevalence of nut and seed allergies	380
A1.3	Thresholds.....	381
A1.4	Allergenic proteins in nuts and seeds	382
A1.5	Effect of food processing on allergenicity	383
A1.6	Detecting nut and seed residues in food: selecting a method	384
A1.7	Conclusions.....	390
A1.8	References.....	392
<i>Index.....</i>		<i>397</i>
