|-----------------|-----|
| Preface         | xi  |
| Acknowledgments | xiv |
| Introduction    | xv  |

## PART ONE

### Introduction to Physical Activity Epidemiology

• 1 •

|          |   |           |
|----------|---|-----------|
| <b>1</b> | <b>Origins of Physical Activity Epidemiology</b> .....                        | <b>3</b>  |
|          | Ancient History of Physical Activity and Health .....                         | 4         |
|          | Modern History of Physical Activity and Health .....                          | 6         |
|          | Physical Activity for Health Promotion in the United States and the World ... | 10        |
|          | Summary .....   | 13        |
|          | Bibliography .....  | 14        |
| <b>2</b> | <b>Concepts and Methods in Physical Activity Epidemiology</b> .....           | <b>17</b> |
|          | Epidemiologic Measures .....  | 19        |
|          | Crude, Specific, and Standardized Rates .....                                 | 20        |
|          | Research Design in Epidemiologic Studies .....                                | 21        |
|          | Evaluating Associations in Epidemiologic Studies .....                        | 25        |
|          | Models in Physical Activity Epidemiology .....                                | 30        |
|          | Inferring Cause in Epidemiologic Studies .....                                | 32        |
|          | Criteria for Causation .....  | 33        |
|          | Summary .....   | 35        |
|          | Bibliography .....  | 36        |
| <b>3</b> | <b>Measurement and Surveillance of Physical Activity and Fitness</b> .....    | <b>37</b> |
|          | Why Is Behavioral Epidemiology Important? .....                               | 38        |
|          | What Is Physical Activity? .....  | 39        |
|          | Measures of Physical Activity .....   | 39        |
|          | What Is Physical Fitness? .....   | 49        |
|          | Surveys and Surveillance of Physical Activity .....                           | 57        |
|          | Summary .....   | 68        |
|          | Bibliography .....  | 70        |

## PART TWO

# Physical Activity and Disease Mortality

• 75 •

## 4

### All-Cause Mortality ..... 77

|  |    |
|--|----|
| Life Expectancy at Birth .....   | 78 |
| Major Causes of Mortality .....  | 79 |
| Physical Activity and All-Cause Mortality .....  | 79 |
| Sedentary Behavior and All-Cause Mortality .....                                       | 84 |
| Physical Fitness and All-Cause Mortality .....   | 85 |
| Changes in Physical Activity or Fitness and All-Cause Mortality .....                  | 87 |
| Are the Associations Real? .....   | 89 |
| Strength of the Evidence .....   | 90 |
| How Much Physical Activity Is Needed to Decrease Risk<br>of Premature Mortality? ..... | 91 |
| Summary .....  | 92 |
| Bibliography .....   | 92 |

## 5

### Coronary Heart Disease ..... 95

|  |     |
|--|-----|
| History and Magnitude of the Problem .....   | 96  |
| Coronary Heart Disease Risk Factors .....  | 96  |
| Coronary Heart Disease Etiology .....  | 97  |
| Physical Activity and Coronary Heart Disease .....                                     | 100 |
| Sedentary Behavior and Coronary Heart Disease Risk .....                               | 107 |
| Physical Fitness and Coronary Heart Disease Risk .....                                 | 107 |
| Individuals With Other Risk Factors<br>or Existing Coronary Heart Disease .....        | 109 |
| Physical Inactivity Compared With Other Risk Factors .....                             | 109 |
| Are the Associations Real? .....   | 110 |
| Strength of the Evidence .....   | 111 |
| How Much Physical Activity Is Needed to Decrease<br>Coronary Heart Disease Risk? ..... | 115 |
| Summary .....  | 116 |
| Bibliography .....   | 117 |

## 6

### Cerebrovascular Disease and Stroke ..... 123

|   |     |
|---|-----|
| Magnitude of the Problem .....                        | 125 |
| Risk Factors for Stroke .....                         | 127 |
| Etiology of Stroke .....                              | 128 |
| Physical Activity and Stroke Risk: The Evidence ..... | 129 |
| Strength of the Evidence .....                        | 136 |

|                    |     |
|--------------------|-----|
| Summary .....      | 137 |
| Bibliography ..... | 137 |

## PART THREE

### Physical Activity and Risk Factors

• 143 •

|          |  |            |
|----------|--|------------|
| <b>7</b> | <b>Physical Activity and Hypertension .....</b>                                      | <b>145</b> |
|          | Magnitude of the Problem .....   | 147        |
|          | Treating Hypertension .....  | 149        |
|          | Hypertension Etiology .....  | 150        |
|          | Autonomic Nervous System .....   | 151        |
|          | Physical Activity and Reduced Hypertension Risk: The Evidence .....                  | 152        |
|          | Physical Activity and Treatment of Hypertension: The Evidence .....                  | 157        |
|          | Strength of the Evidence .....   | 158        |
|          | Summary .....  | 162        |
|          | Bibliography .....   | 162        |
| <b>8</b> | <b>Physical Activity and Dyslipidemia.....</b>                                       | <b>167</b> |
|          | Magnitude of the Problem .....   | 169        |
|          | Drug Treatment .....   | 174        |
|          | Dyslipidemia Etiology and Physical Activity .....                                    | 177        |
|          | Physical Activity and Lipoprotein Levels: The Evidence .....                         | 179        |
|          | Strength of the Evidence .....   | 188        |
|          | Summary .....  | 189        |
|          | Bibliography .....   | 189        |
| <b>9</b> | <b>Physical Activity and Obesity.....</b>  | <b>197</b> |
|          | Magnitude of the Problem .....   | 200        |
|          | Treatment of Overweight and Obesity .....  | 204        |
|          | Assessing and Defining Overweight and Obesity .....                                  | 204        |
|          | Etiology of Overweight and Obesity: Set Point or Settling Point? .....               | 208        |
|          | Physical Activity and Fitness and the Health Risks of Obesity:<br>The Evidence ..... | 209        |
|          | Physical Activity and Prevention of Excess Weight Gain: The Evidence .....           | 215        |
|          | Physical Activity and Weight Loss: The Evidence .....                                | 219        |
|          | Physical Activity and Weight Maintenance: The Evidence .....                         | 227        |
|          | Strength of the Evidence .....   | 228        |
|          | The Ultimate Goal: Weight Loss or Risk Reduction? .....                              | 231        |
|          | Summary .....  | 231        |
|          | Bibliography .....   | 231        |

## PART FOUR

### Physical Activity and Chronic Diseases

• 241 •

|           |   |            |
|-----------|---|------------|
| <b>10</b> | <b>Physical Activity and Diabetes</b> .....                       | <b>243</b> |
|           | Magnitude of the Problem .....                                    | 244        |
|           | Demographics of Diabetes .....                                    | 245        |
|           | Clinical Features .....   | 247        |
|           | Health Burden of Diabetes .....                                   | 248        |
|           | Risk Factors .....  | 249        |
|           | Insulin and Glucose Transport .....                               | 249        |
|           | Etiology of Type 2 Diabetes .....                                 | 250        |
|           | Effects of Physical Activity on Diabetes Risk: The Evidence ..... | 254        |
|           | Strength of the Evidence .....                                    | 262        |
|           | Summary .....   | 265        |
|           | Bibliography .....  | 265        |
| <b>11</b> | <b>Physical Activity and Osteoporosis</b> .....                   | <b>273</b> |
|           | Magnitude of the Problem .....                                    | 275        |
|           | Fractures and Mortality .....                                     | 275        |
|           | Etiology of Osteopenia and Osteoporosis .....                     | 277        |
|           | Risk Factors and Prevention .....                                 | 280        |
|           | Bone Measurement Techniques .....                                 | 282        |
|           | Physical Activity and Osteoporosis: The Evidence .....            | 283        |
|           | Strength of the Evidence .....                                    | 292        |
|           | Summary .....   | 296        |
|           | Bibliography .....  | 297        |

## PART FIVE

### Physical Activity, Cancer, and Immunity

• 305 •

|           |   |            |
|-----------|---|------------|
| <b>12</b> | <b>Physical Activity and Cancer</b> .....                                 | <b>307</b> |
|           | Magnitude of the Problem .....  | 308        |
|           | Etiology of Cancer .....  | 309        |
|           | Risk Factors .....  | 311        |
|           | Population Studies of Physical Activity: Specificity of Protection? ..... | 311        |
|           | Colon and Rectal Cancer .....   | 312        |
|           | Breast Cancer .....   | 322        |
|           | Other Cancers .....   | 335        |

|  |     |
|--|-----|
| Physical Activity and Cancer Survivors ..... | 336 |
| Summary .....                                | 337 |
| Bibliography .....                           | 337 |

## **13 Physical Activity and the Immune System.....343**

|  |     |
|--|-----|
| An Abridged History of Immunology .....  | 345 |
| HIV and AIDS .....   | 346 |
| The Immune System .....  | 347 |
| Immunomodulation by the Nervous and Endocrine Systems .....  | 357 |
| Physical Activity and Immunity: The Evidence .....   | 359 |
| Mechanisms of Alterations in Monocytes, Granulocytes,<br>and Natural Killer Cells After Acute Exercise ..... | 367 |
| Exercise and Cytokines .....   | 367 |
| Summary .....  | 369 |
| Bibliography .....   | 370 |

### **PART SIX**

## **Physical Activity and Special Concerns**

• 377 •

## **14 Physical Activity and Mental Health.....379**

|  |     |
|--|-----|
| Depression .....   | 383 |
| Magnitude of the Problem .....                               | 385 |
| Results From the National Comorbidity Survey .....           | 385 |
| Etiology of Depression .....                                 | 386 |
| Brain Neurobiology in Depression .....                       | 387 |
| Treatment of Depression .....                                | 389 |
| Physical Activity and Depression: The Evidence .....         | 391 |
| Anxiety Disorders .....                                      | 408 |
| Magnitude of the Problem .....                               | 410 |
| Etiology of Anxiety Disorders .....                          | 410 |
| Brain Neurobiology in Anxiety Disorders .....                | 410 |
| Treatment of Anxiety Disorders .....                         | 411 |
| Physical Activity and Anxiety: The Evidence .....            | 413 |
| Cognitive Function and Dementia .....                        | 420 |
| Physical Activity and Cognitive Function: The Evidence ..... | 421 |
| Summary .....  | 425 |
| Bibliography .....   | 426 |

## **15 Physical Activity and Special Populations.....441**

|   |     |
|---|-----|
| Physical Activity Among Diverse Racial–Ethnic Populations ..... | 442 |
| Physical Activity and Disability .....                          | 448 |

|   |     |
|---|-----|
| Inactivity and Aging .....  | 454 |
| Physical Activity and Long-Term Health Among People<br>With Disabilities .....  | 456 |
| Role of Physical Activity in the Prevention<br>of Secondary Complications ..... | 458 |
| Summary .....   | 460 |
| Bibliography .....  | 460 |

## **16 Adverse Events and Hazards of Physical Activity.....469**

|  |     |
|--|-----|
| Magnitude of the Problem .....                         | 470 |
| Evaluating Risk .....                                  | 476 |
| Methods of Research .....                              | 485 |
| Myocardial Infarction and Sudden Death .....           | 487 |
| Joint and Muscle Injury .....                          | 489 |
| Injury Features .....                                  | 491 |
| Risk of Physical Activity Injuries: The Evidence ..... | 491 |
| Other Medical Hazards .....                            | 492 |
| Psychological Hazards .....                            | 493 |
| Summary .....  | 496 |
| Bibliography .....                                     | 496 |

## **17 Adopting and Maintaining a Physically Active Lifestyle .....503**

|   |     |
|---|-----|
| Individual Barriers to Physical Activity .....                                  | 508 |
| How Do People Decide to Be Active? .....  | 510 |
| Environmental Barriers to Physical Activity .....                               | 512 |
| Genetics of Physical Activity .....   | 521 |
| Environmental Intervention and Self-Regulation .....                            | 523 |
| Effectiveness of Physical Activity Interventions .....                          | 527 |
| Interventions to Increase Physical Activity .....                               | 528 |
| Mediators and Moderators of Physical Activity Change<br>and Interventions ..... | 535 |
| Features of Physical Activity That Promote Adoption and Maintenance ..          | 537 |
| Summary .....   | 540 |
| Bibliography .....  | 541 |
