# Contents

Preface ..... xv

**1 What Is a Non-Inferiority Trial?** ..... 1
1.1 Definition of Non-Inferiority ..... 1
1.2 Reasons for Non-Inferiority Trials ..... 3
1.3 Different Types of Comparisons ..... 7
1.4 A History of Non-Inferiority Trials ..... 10
References ..... 13

**2 Non-Inferiority Trial Considerations** ..... 15
2.1 Introduction ..... 15
2.2 External Validity and Assay Sensitivity ..... 16
2.3 Critical Steps and Issues ..... 17
2.3.1 Historical Evidence of Sensitivity to Drug Effects ..... 18
2.3.2 Designing a Trial ..... 19
2.3.3 Selecting the Margin ..... 20
2.3.4 Study Conduct and Analysis Populations ..... 27
2.4 Sizing a Study ..... 30
2.5 Example of Anti-Infectives ..... 36
References ..... 40

**3 Strength of Evidence and Reproducibility** ..... 43
3.1 Introduction ..... 43
3.2 Strength of Evidence ..... 44
3.2.1 Overall Type I Error ..... 44
3.2.2 Bayesian False-Positive Rate ..... 44
3.2.3 Relative Evidence between the Null and Alternative Hypotheses ..... 47
3.2.4 Additional Considerations ..... 49
3.3 Reproducibility ..... 50
3.3.1 Correlation across Identical Non-Inferiority Trials ..... 52
3.3.2 Predicting Future and Hypothetical Outcomes ..... 52
References ..... 56

**4 Evaluating the Active Control Effect** ..... 57
4.1 Introduction ..... 57
4.2 Active Control Effect ..... 58
4.2.1 Defining the Active Control Effect ..... 58
4.2.2 Modeling the Active Control Effect ..... 58

Rothmann, Mark D.
Design and analysis of non-inferiority trials
2012

4.2.3 Extrapolating to the Non-Inferiority Trial ..... 59
4.2.4 Potential Biases and Random Highs ..... 62
4.3 Meta-Analysis Methods ..... 74
4.3.1 Fixed Effects Meta-Analysis ..... 75
4.3.2 Peto's Method ..... 76
4.3.3 Random-Effects Meta-Analysis ..... 77
4.3.4 Sampling Distributions ..... 78
4.3.5 Concerns of Random-Effects Meta-Analyses ..... 81
4.3.6 Adjusting over Effect Modifiers ..... 85
4.4 Bayesian Meta-Analyses ..... 87
References ..... 89

**5 Across-Trials Analysis Methods** ..... 91
5.1 Introduction ..... 91
5.2 Two Confidence Interval Approaches ..... 92
5.2.1 Hypotheses and Tests ..... 92
5.3 Synthesis Methods ..... 98
5.3.1 Introduction ..... 98
5.3.2 Retention Fraction and Hypotheses ..... 99
5.3.3 Synthesis Frequentist Procedures ..... 102
5.3.3.1 Relative Metrics ..... 102
5.3.3.2 Absolute Metrics ..... 102
5.3.4 Synthesis Methods as Prediction Interval Methods ..... 108
5.3.5 Addressing the Potential for Biocreep ..... 110
5.3.6 Bayesian Synthesis Methods ..... 110
5.3.7 Application ..... 115
5.3.8 Sample Size Determination ..... 117
5.4 Comparing Analysis Methods and Type I Error Rates ..... 120
5.4.1 Introduction ..... 120
5.4.2 Comparison of Methods ..... 121
5.4.3 Asymptotic Results ..... 124
5.4.4 More on Type I Error Rates ..... 128
5.4.4.1 Non-Inferiority Trial Size Depends on Estimation of Active Control Effect ..... 131
5.4.4.2 Incorporating Regression to Mean Bias ..... 132
5.5 A Case in Oncology ..... 141
5.5.1 Applying the Arithmetic Definition of Retention Fraction ..... 142
5.5.2 Applying the Geometric Definition of Retention Fraction ..... 143
5.5.3 Power of Such Procedures ..... 144
References ..... 146

**6 Three-Arm Non-Inferiority Trials** ..... 149
6.1 Introduction ..... 149

6.2 Comparisons to Concurrent Controls ..... 152
6.2.1 Superiority over Placebo ..... 152
6.2.2 Non-Inferior to Active Control ..... 154
6.3 Bayesian Analyses ..... 160
References ..... 165

**7 Multiple Comparisons** ..... 167
7.1 Introduction ..... 167
7.2 Comparing Multiple Groups to an Active Control ..... 168
7.2.1 Unordered Treatments: Subset Selection ..... 169
7.2.2 Ordered Treatments: Subset Selection ..... 170
7.2.3 All-or-Nothing Testing ..... 171
7.3 Non-Inferiority on Multiple Endpoints ..... 171
7.3.1 Multiple Endpoints in a Single Family ..... 172
7.3.2 Multiple Endpoints in Multiple Families ..... 174
7.3.3 Further Considerations ..... 175
7.4 Testing for Both Superiority and Non-Inferiority ..... 175
7.4.1 Testing Superiority after Achieving Non-Inferiority ..... 176
7.4.2 Testing Non-Inferiority after Failing Superiority ..... 178
References ..... 179

**8 Missing Data and Analysis Sets** ..... 181
8.1 Introduction ..... 181
8.2 Missing Data ..... 182
8.2.1 Potential Impact of Missing Data ..... 182
8.2.2 Preventing Missing Data ..... 184
8.2.3 Missing Data Mechanisms ..... 186
8.2.4 Assessing Missing Data Mechanisms ..... 187
8.2.5 Analysis of Data when Some Data Are Missing ..... 189
8.2.5.1 Handling Ignorable Missing Data in Non-Inferiority Analyses ..... 189
8.2.5.2 Handling Non-Ignorable Missing Data ..... 193
8.3 Analysis Sets ..... 196
8.3.1 Different Analysis Populations ..... 197
8.3.2 Influence of Analysis Population on Conclusions ..... 198
8.3.3 Further Considerations ..... 203
References ..... 204

**9 Safety Studies** ..... 207
9.1 Introduction ..... 207
9.2 Considerations for Safety Study ..... 209
9.2.1 Safety Endpoint Considerations ..... 210
9.2.2 Design Considerations ..... 211
9.2.3 Possible Comparisons ..... 212

9.2.3.1 Ruling Out a Meaningful Risk Increase Compared to Placebo ..... 212
9.2.3.2 Ruling Out a Meaningful Risk Increase Compared to an Active Control ..... 213
9.2.3.3 Indirect Comparison to Placebo ..... 215
9.3 Cardiovascular Risk in Antidiabetic Therapy ..... 216
References ..... 218

**10 Additional Topics** ..... 219
10.1 Introduction ..... 219
10.2 Interaction Tests ..... 220
10.2.1 Test Procedures ..... 222
10.2.2 Internal Consistency ..... 224
10.2.3 Conclusions and Recommendations ..... 225
10.3 Surrogate Endpoints ..... 226
10.4 Adaptive Designs ..... 230
10.4.1 Group Sequential Designs ..... 231
10.4.2 Changing the Sample Size or the Primary Objective ..... 235
10.5 Equivalence Comparisons ..... 237
10.5.1 Data Scales ..... 238
10.5.2 Two One-Sided Tests Approach ..... 239
10.5.3 Distribution-Based Approaches ..... 240
10.5.4 Lot Consistency ..... 242
References ..... 247

**11 Inference on Proportions** ..... 251
11.1 Introduction ..... 251
11.2 Fixed Thresholds on Differences ..... 253
11.2.1 Hypotheses and Issues ..... 253
11.2.2 Exact Methods ..... 254
11.2.2.1 Exact Confidence Intervals ..... 257
11.2.3 Asymptotic Methods ..... 259
11.2.4 Comparisons of Confidence Interval Methods ..... 262
11.2.4.1 Inferences on a Single Proportion ..... 263
11.2.4.2 Inferences for a Difference in Proportions ..... 264
11.2.5 Sample Size Determination ..... 268
11.2.5.1 Optimal Randomization Ratio ..... 271
11.3 Fixed Thresholds on Ratios ..... 273
11.3.1 Hypotheses and Issues ..... 273
11.3.2 Exact Methods ..... 273
11.3.2.1 Exact Conditional Non-Inferiority Test ..... 274
11.3.3 Asymptotic Methods ..... 278
11.3.4 Comparisons of Methods ..... 279
11.3.5 Sample-Size Determination ..... 283
11.3.5.1 Optimal Randomization Ratio ..... 286

11.4 Fixed Thresholds on Odds Ratios ..... 289
11.4.1 Hypotheses ..... 289
11.4.2 Exact Methods ..... 290
11.4.3 Asymptotic Methods ..... 291
11.4.4 Sample Size Determination ..... 292
11.5 Bayesian Methods ..... 293
11.6 Stratified and Adjusted Analyses ..... 297
11.6.1 Adjusted Rates ..... 298
11.6.2 Adjusted Estimators ..... 300
11.7 Variable Margins ..... 304
11.8 Matched-Pair Designs ..... 308
11.8.1 Difference in Two Correlated Proportions ..... 309
11.8.2 Ratio of Two Correlated Proportions ..... 311
References ..... 314

**12 Inferences on Means and Medians** ..... 319
12.1 Introduction ..... 319
12.2 Fixed Thresholds on Differences of Means ..... 320
12.2.1 Hypotheses and Issues ..... 320
12.2.2 Exact and Distribution-Free Methods ..... 321
12.2.3 Normalized Methods ..... 322
12.2.3.1 Test Statistics ..... 323
12.2.4 Bayesian Methods ..... 326
12.2.5 Sample Size Determination ..... 331
12.3 Fixed Thresholds on Ratios of Means ..... 334
12.3.1 Hypotheses and Issues ..... 334
12.3.2 Exact and Distribution-Free Methods ..... 334
12.3.3 Normalized and Asymptotic Methods ..... 335
12.3.3.1 Test Statistics ..... 335
12.3.4 Bayesian Methods ..... 338
12.3.5 Sample Size Determination ..... 340
12.4 Analyses Involving Medians ..... 342
12.4.1 Hypotheses and Issues ..... 343
12.4.2 Nonparametric Methods ..... 344
12.4.3 Asymptotic Methods ..... 351
12.5 Ordinal Data ..... 353
References ..... 355

**13 Inference on Time-to-Event Endpoints** ..... 357
13.1 Introduction ..... 357
13.2 Censoring ..... 361
13.3 Exponential Distributions ..... 363
13.3.1 Confidence Intervals for a Difference in Means ..... 364
13.3.2 Confidence Intervals for the Hazard Ratio (Ratio of Means) ..... 366

13.4 Nonparametric Inference Based on a Hazard Ratio ..... 368
13.4.1 Event and Sample Size Determination ..... 375
13.4.2 Proportional Hazards Assessment Procedures ..... 377
13.5 Analyses Based on Landmarks and Medians ..... 380
13.5.1 Landmark Analyses ..... 380
13.5.2 Analyses on Medians ..... 384
13.6 Comparisons over Preset Intervals ..... 389
References ..... 392

**Appendix: Statistical Concepts** ..... 395
A.1 Frequentist Methods ..... 395
A.1.1 *p*-Values ..... 395
A.1.2 Confidence Intervals ..... 401
A.1.3 Comparing and Contrasting Confidence Intervals and *p*-Values ..... 404
A.1.4 Analysis Methods ..... 405
A.1.4.1 Exact and Permutation Methods ..... 405
A.1.4.2 Asymptotic Methods ..... 408
A.2 Bayesian Methods ..... 410
A.2.1 Posterior Probabilities and Credible Intervals ..... 410
A.2.2 Prior and Posterior Distributions ..... 412
A.2.3 Statistical Inference ..... 415
A.3 Comparison of Methods ..... 419
A.3.1 Relationship between Frequentist and Bayesian Approaches ..... 419
A.3.1.1 Exact Confidence Intervals and Credible Intervals Using a Jeffreys Prior ..... 419
A.3.1.2 Comparison Involving a Retention Fraction ..... 421
A.3.1.3 Likelihood Function for a Non-Inferiority Trial ..... 423
A.3.2 Dealing with More than One Comparison ..... 425
A.4 Stratified and Adjusted Analyses ..... 427
A.4.1 Stratification ..... 427
A.4.2 Analyses ..... 429
References ..... 431
